Process and Summary

VAP-Info19.7
Process and summary: Executive summary

This On-site Initial Audit Manufacturing VAP to 8 Xiasheng Road, Suzhou Industrial Park, Suzhou, Jiangsu Province evaluates the company's practices, and supporting management systems against the RBA Audit criteria as contained in the RBA Audit Protocol and applicable laws and regulations. It was a Full Scope audit of all manufacturing buildings and common spaces. The audit is held from 7. RBA qualified auditors spent a total of 7 days on site. Integrity issues are encountered during the audit: No integrity issues are encountered during the audit. Exception management during the audit: As per facility business confidential policy, no photos could be taken in the facility. And only photos on non-conformances are taken by the facility and provided by the facility to confirm. Besides, photos for documents on sensitive information could not be taken but could provide for review. The facility signs the NDA to confirm this business policy. The audit verification is based on objective evidence gathered through management, staff and worker interviews, documents review and workplace observations. During the audit, the following is identified: Priority findings: 0 Major findings: 4 minor findings: 0 Risk of non-conformance: 0 Opportunity for improvement: 0
List of Major Findings:
VAP-A3.1; Hours worked in a workweek does not exceed 60 hours.; however, WRITE CONCLUSION for the Major Non-Conformance based on the following DP observations
VAP-A3.1.1.1.4 Above local law and below or equal to 60 h/workweek: (Oct 2025) 83 % with a highest of 84 hrs/workmonth
(Mar 2025) 80 % with a highest of 44 hrs/workmonth
(Dec 2024) 81.5 % with a highest of 104 hrs/workmonth
VAP-A3.1.2 Waiver 1: No working hour waiver is available as the factory does not apply for a working hour waiver from the local government labor authority.
Legal Reference: [PRC Labor Law article 41, effective from August 27, 2009/《中华人民共和国劳动法》第41条2009年8月27日生效 / The employer may extend working hours due to the requirements of its production or business after consultation with the trade union and laborers, but the extended working hour for a day shall generally not exceed one hour; if such extension is called for due to special reasons, the extended hours shall not exceed three hours a day under the condition that the health of laborers is guaranteed. However, the total extension in a month shall not exceed thirty-six hours. / 用人单位由于生产经营需要，经与工会和劳动者协商后可以延长工作时间，一般每日不得超过一小时；因特殊原因需要延长工作时间的，在保障劳动者身体健康的条件下延长工作时间每日不得超过三小时，但是每月不得超过三十六小时。];
VAP-A4.3; Deductions or withholdings are calculated correctly and submitted to the appropriate government agency within the local law time; however, WRITE CONCLUSION for the Major Non-Conformance based on the following DP observations
VAP-A4.3.1.1 Calculations of employer contributions to worker insurance schemes are available on a monthly basis that allows for analysis by individual worker and total per contribution type. 1) The housing provident fund contribution base of 44 out of 54 (81.5%) sampled workers is based on the lower limit of local contribution base RMB 4952, which lower than the law required workers' average monthly wage of previous year (ranged from RMB 5279 to RMB 16507). 2) The social insurance contribution base of 44 out of 54 (81.5%) sampled workers is based on the lower limit of local contribution base RMB 4952 for pension insurance, occupational injury insurance and unemployment insurance, which lower than the law required workers' average monthly wage of previous year (ranged from RMB 5279 to RMB 16507).
Legal Reference: [1) Regulation on the Administration of Housing Provident Fund, Article 16 & Article 17, effective from March 24, 2019 /《住房公积金管理条例》第十六条和第十七条，2019年3月24日生效 / Article 16: The monthly payment and deposit of the housing provident fund paid by the unit for its employees is the average monthly salary of the employee in the previous year multiplied by the unit's housing provident fund payment and deposit ratio. Article 17: The employee who is new to work starts to pay the housing provident fund from the second month of working, and the monthly payment is the employee's salary of the current month multiplied by the employee's housing provident fund payment ratio. / 第十六条：职工住房公积金的月缴存额为职工本人上一年度月平均工资乘以职工住房公积金缴存比例。 第十七条：新参加工作的职工从参加工作的第二个月开始缴存住房公积金 月缴存额为职工本人当月工资乘以职工住房公积金缴存比例。 单位新调入的职工从调入单位发放工资之日起缴存住房公积金，月缴存额为职工本人当月工资乘以职工住房公积金缴存比例。 2) Notice on Regularizing the issues related to contribution base of social insurance [2006] No. 60, Article 5 (1) & (2), effective from November 15, 2006 / 《关于规范社会保险缴费基数有关问题的通知》[劳社险中心函〔2006〕60]五、关于统一缴费基数问题（一）&（二），2006年11月15日生效 / (1) The contribution base of the basic pension insurance of employer part can be the sum of employee's salary or the sum of personal contribution base. However, it should be unified as one method within the province. In principle, the contribution base of pension insurance of personal part is the employee's average monthly salary in the previous year and shall be assessed within the range of 60% to 300% of the average salary of the society of previous year. (2) the contribution base of Medical Insurance, unemployment insurance, occupational injury insurance and maternity insurance of employer part shall be the sum of employee's salary. In order to facilitate the collection, contribution base can be changed to employee's average monthly salary in the previous year. /（一）参保单位缴纳基本养老保险费的基数可以为职工工资总额，也可以为本单位职工个人缴费工资基数之和，但在全省区市范围内应统一为一种核定办法。单位职工本人缴纳基本养老保险费的基数原则上以上一年度本人月平均工资为基础，在当地职工平均工资的60 %——300 % 的范围内进行核定。（二）参保单位缴纳基本医疗保险、失业保险、工伤保险、生育保险费的基数为职工工资总额，基本医疗保险、失业保险职工个人缴费基数为本人工资，为便于征缴可以以上一年度个人月平均工资为缴费基数。]
; VAP-A.M.2.2; Adequate and effective Labor policies and control processes are established; however, WRITE CONCLUSION for the Major Non-Conformance based on the following DP observations
VAP-A.M.2.2.1.1.1 control measures are in place for identified risks Labor policies and control processes are established. However, system process failure: one major non-conformance noted in A3.1, the working hours control system is not effectively implemented to ensure the workers' monthly overtime hours meeting the legal requirements, workers' monthly overtime hours exceed the local law of 36 h/month (Average=81.5% with the maximum of 104 hours per month).; VAP-E4.3; An adequate and effective process is established to ensure that the next-tier major suppliers implement the RBA Code; however, WRITE CONCLUSION for the Major Non-Conformance based on the following DP observations
VAP-E4.3.4.1 Adequate and effective facility compliance process for Major next tier supplier which includes a third-party qualified firm audit OR for non-high risk facilities validated self-Assessment (SAQ), a major health and safety or environmental non-conformance or risk requires a Corrective Action plan and an audit is performed if there is any allegation or indication of nonconformance with a Major Supplier Hours of workers from 2 out of 2 on-site service providers (security, cleaner and catering) worked in a workweek over the last 12 months do not exceed 60 hours and the daily overtime hours do not exceed the local law of 3 h/day. Overtime hours of workers from 2 out of 2 on-site service providers (security, cleaner and catering) exceed the local law of 36 h / month. The months of October 2025 (random), March 2025 (random) and December 2024 (random) are reviewed. There is no obvious peak or low season for on-site service provider workers. The highest weekly working hours are 51.5 h/workweek. a) Monthly overtime hours of workers from 2 out of 2 on-site service providers (security, cleaner and catering) exceed the local law of 36 h/month: a.a) Average = 6.7% with a highest of 64 hours in March 2025. a.b) October 2025 (random) = 13% on-site service workers with the highest of 57 hours. a.c) March 2025 (random) = 7% on-site service workers with the highest of 47 hours. a.d) December 2024 (random) = 0% on-site service workers with the highest of 32 hours. a.d) No young service workers. PRC Labor Law article 41, effective from August 27, 2009/《中华人民共和国劳动法》第41条2009年8月27日生效 / The employer may extend working hours due to the requirements of its production or business after consultation with the trade union and laborers, but the extended working hour for a day shall generally not exceed one hour; if such extension is called for due to special reasons, the extended hours shall not exceed three hours a day under the condition that the health of laborers is guaranteed. However, the total extension in a month shall not exceed thirty-six hours. / 用人单位由于生产经营需要，经与工会和劳动者协商后可以延长工作时间，一般每日不得超过一小时；因特殊原因需要延长工作时间的，在保障劳动者身体健康的条件下延长工作时间每日不得超过三小时，但是每月不得超过三十六小时。

Validated Audit Report

Question #	Process and Summary	Description
VAP-Info19.1	Management attitude	Managements are cooperative during the entire audit process.
VAP-Info19.2	Worker attitude	All workers feel comfortable and are open while talking with auditors.
VAP-Info19.3	Process Integrity	No integrity issues are encountered during the audit.
VAP-Info19.4	Closing meeting	All findings are communicated with the facility management during the closing meeting.
VAP-Info19.5	Exception management	As per facility business confidential policy, no photos could be taken in the facility. And only photos on non-conformances are taken by the facility and provided by the facility to confirm. Besides, photos for documents on sensitive information could not be taken but could provide for review. The facility signs the NDA to confirm this business policy.

Full Listing of Questionnaire Results

A) LABOR	
A3) WORKING HOURS	
Question #	VAP-A3.1
Question Text	Hours worked in a workweek does not exceed 60 hours.
Rating	Major Non-Conformance
Conclusion	Hours worked in a workweek over the last 12 months do not exceed 60 hours and the daily overtime hours do not exceed the local law of 3 h/day. The monthly overtime hours exceed the local law of 36 h/month. The months of October 2025 (random month), March 2025 (random month) and December 2024 (random month) are reviewed. There is no obvious peak or low season in the factory. The highest weekly working hours are 60 h/workweek. a) 132 out of 162 workers (81.5% of the workers) do not meet local law regarding maximum monthly overtime hours of 36 h/month: a.a) Average = 132 out of 162 workers (81.5% of the workers) with the maximum of 104 hours in October 2025. a.b) For October 2025 (random month) =44 out of 54 workers (81% of the workers) with highest of 104 hours; a.c) For March 2025 (random month) =43 out of 54 workers (80% of the workers) with highest of 44 hours; a.d) For December 2024 (random month) = 45 out of 54 workers (83% of the workers) with highest of 84 hours. b) No young workers. [PRC Labor Law article 41, effective from August 27, 2009/《**中华人民共和国劳动法**》**第**41**条**2009**年**8**月**27**日生效** / The employer may extend working hours due to the requirements of its production or business after consultation with the trade union and laborers, but the extended working hour for a day shall generally not exceed one hour; if such extension is called for due to special reasons, the extended hours shall not exceed three hours a day under the condition that the health of laborers is guaranteed. However, the total extension in a month shall not exceed thirty-six hours. / **用人单位由于生产经营需要，经与工会和劳动者协商后可以延长工作时间，一般每日不得超过一小时；因特殊原因需要延长工作时间的，在保障劳动者身体健康的条件下延长工作时间每日不得超过三小时，但是每月不得超过三十六小时。**]
Data points	**Data Point:** Record Review: 54 out of 54 working hour records for the period November 2024 to October 2025 covering each month of the period of Oct 2025 (random), Mar 2025 (random) and Dec 2024 (random) demonstrate hours worked in a workweek are in compliance in the following categories: However, Above local law and below or equal to 60 h/workweek: (Oct 2025) 83 % with a highest of 84 hrs/workmonth (Mar 2025) 80 % with a highest of 44 hrs/workmonth (Dec 2024) 81.5 % with a highest of 104 hrs/workmonth Comments: Record Review: 54 out of 54 working hour records covering each month of the period of October 2025 (Random month), March 2025 (Random month) and December 2024 (Random month) demonstrate: Hours worked in a workweek over the last 12 months do not exceed 60 hours and the daily overtime hours do not exceed the local law of 3 h/day. The monthly overtime hours exceed the local law of 36 h/month. The months of October 2025 (random month), March 2025 (random month) and December 2024 (random month) are reviewed. There is no obvious peak or low season in the factory. The highest weekly working hours are 60 h/workweek. a) 132 out of 162 workers (81.5% of the workers) do not meet local law regarding maximum monthly overtime hours of 36 h/month: a.a) Average = 132 out of 162 workers (81.5% of the workers) with the maximum of 104 hours in October 2025. a.b) For October 2025 (random month) =44 out of 54 workers (81% of the workers) with highest of 104 hours; a.c) For March 2025 (random month) =43 out of 54 workers (80% of the workers) with highest of 44 hours; a.d) For December 2024 (random month) = 45 out of 54 workers (83% of the workers) with highest of 84 hours. b) No young workers. **Data Point:** No working hours waiver in place **Data Point:** Record Review: 54 out of 54 Production records for the period November 2024 to October 2025 confirm working hours **Data Point:** Record Review: 12 out of 12 preventive maintenance records for the period November 2024 to October 2025 confirm time recording devices are functional and accurate **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct. All findings are confirmed
A4) WAGES AND BENEFITS	
Question #	VAP-A4.3
Question Text	Deductions or withholdings are calculated correctly and submitted to the appropriate government agency within the local law time frame.

Validated Audit Report

Rating	Major Non-Conformance
Conclusion	Deductions or withholdings are calculated and submitted to the appropriate government agency within the local law time frame. However, two legal non-compliances: 1) The housing provident fund contribution base of 44 out of 54 (81.5%) sampled workers is based on the lower limit of local contribution base RMB 4952, which lower than the law required workers' average monthly wage of previous year (ranged from RMB 5279 to RMB 16507). 2) The social insurance contribution base of 44 out of 54 (81.5%) sampled workers is based on the lower limit of local contribution base RMB 4952 for pension insurance, occupational injury insurance and unemployment insurance, which lower than the law required workers' average monthly wage of previous year (ranged from RMB 5279 to RMB 16507). [1) Regulation on the Administration of Housing Provident Fund, Article 16 & Article 17, effective from March 24, 2019 /《住房公积金管理条例》第十六条和第十七条，2019年3月24日生效 / Article 16: The monthly payment and deposit of the housing provident fund paid by the unit for its employees is the average monthly salary of the employee in the previous year multiplied by the unit's housing provident fund payment and deposit ratio. Article 17: The employee who is new to work starts to pay the housing provident fund from the second month of working, and the monthly payment is the employee's salary of the current month multiplied by the employee's housing provident fund payment ratio. / 第十六条：职工住房公积金的月缴存额为职工本人上一年度月平均工资乘以职工住房公积金缴存比例。 第十七条：新参加工作的职工从参加工作的第二个月开始缴存住房公积金 月缴存额为职工本人当月工资乘以职工住房公积金缴存比例。 单位新调入的职工从调入单位发放工资之日起缴存住房公积金，月缴存额为职工本人当月工资乘以职工住房公积金缴存比例。 2) Notice on Regularizing the issues related to contribution base of social insurance [2006] No. 60, Article 5 (1) & (2), effective from November 15, 2006 / 《关于规范社会保险缴费基数有关问题的通知》[劳社险中心函〔2006〕60]五、关于统一缴费基数问题（一）&（二），2006年11月15日生效 / (1) The contribution base of the basic pension insurance of employer part can be the sum of employee's salary or the sum of personal contribution base. However, it should be unified as one method within the province. In principle, the contribution base of pension insurance of personal part is the employee's average monthly salary in the previous year and shall be assessed within the range of 60% to 300% of the average salary of the society of previous year. (2) the contribution base of Medical Insurance, unemployment insurance, occupational injury insurance and maternity insurance of employer part shall be the sum of employee's salary. In order to facilitate the collection, contribution base can be changed to employee's average monthly salary in the previous year. /（一）参保单位缴纳基本养老保险费的基数可以为职工工资总额，也可以为本单位职工个人缴费工资基数之和，但在全省区市范围内应统一为一种核定办法。单位职工本人缴纳基本养老保险费的基数原则上以上一年度本人月平均工资为基础，在当地职工平均工资的60 %——300 % 的范围内进行核定。（二）参保单位缴纳基本医疗保险、失业保险、工伤保险、生育保险费的基数为职工工资总额，基本医疗保险、失业保险职工个人缴费基数为本人工资，为便于征缴可以以上一年度个人月平均工资为缴费基数。]
Data points	**Data Point:** Record Review: 54 out of 54 payroll for the period November 2024 to October 2025 demonstrate conformance However: 1) The housing provident fund contribution base of 44 out of 54 (81.5%) workers is based on the lower limit of local contribution base RMB 4952, which lower than the law required workers' average monthly wage of previous year (ranged from RMB 5279 to RMB 16507). 2) The social insurance contribution base of 44 out of 54 (81.5%) workers is based on the lower limit of local contribution base RMB 4952 for pension insurance, occupational injury insurance and unemployment insurance, which lower than the law required workers' average monthly wage of previous year (ranged from RMB 5279 to RMB 16507). **Data Point:** Record Review: 12 out of 12 contribution payment for the period November 2024 to October 2025 demonstrate conformance Payment records for these contributions are available and payments are made timely. **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct. All findings are confirmed
A.M.2) CONTROL PROCESSES	
Question #	VAP-A.M.2.2
Question Text	Adequate and effective labor policies and control processes are established.
Rating	Major Non-Conformance
Conclusion	Labor policies and control processes are established. However, system process failure: one major non-conformance noted in A3.1, the working hours control system is not effectively implemented to ensure the workers' monthly overtime hours meeting the legal requirements, workers' monthly overtime hours exceed the local law of 36 h/month (Average=81.5% with the maximum of 104 hours per month).

Data points	**Data Point:** Site Observation: records are securely stored with authorized access only; time recording devices are present, and all are in working order However: Labor policies and control processes are established. However, system process failure: one major non-conformance noted in A3.1, the working hours control system is not effectively implemented to ensure the workers' monthly overtime hours meeting the legal requirements, workers' monthly overtime hours exceed the local law of 36 h/month (Average=81.5% with the maximum of 104 hours per month). **Data Point:** Record Review: Forbidden Force Labor Management Policy, Record reference: 820-5024, Version Number: 1, Issue date: December 29, 2020, Expiry date: Nil, States: adequate and effective prohibition of forced labor policy and procedure ensuring no forced, bonded, involuntary or exploitative prison, trafficked or slave labor is used, workers are not required to pay prohibited fees, deposits or incur debt as part of the employment, worker are paid appropriate amounts for all hours worked when employment is terminated voluntarily or involuntarily, no government issued identification or originals of personal records are held or stored and freedom of movement; a process is in place for safe keeping of personal records required by law to be kept by the employer; a process is in place to determine the specific amount of any fees and expenses paid by each individual foreign migrant and internal migrant worker prior to commencement of work. **Data Point:** Record Review: Child labor and young worker management Policy, Record reference: 820-5021, Version Number: V1, Issue date: December 29, 2020, Expiry date: Nil, States: adequate and effective prohibition of child labor policy and procedure ensuringchild labor prohibition, the worker's job application after the "child" worker's age meets legal requirements is not refused and assistance/remediation process is place and implemented to provide for the welfare of the child if child labor is identified; a process to verify the reliability of age records including visual verification of a government recognized photographic identification record, areliable ID verification system to control the workers' access into the facility **Data Point:** Record Review: Vulnerable Staff Management Policy, Record reference: 820-5031, Version Number: V1, Issue date: March 12, 2025, Expiry date: Nil, States: adequate and effective vulnerable worker policy and procedure including young workers, pregnant workers, nursing mothers, health checks for young workers, identification of young workers, assignment of young workers to non-hazardous positions, restrictions on time of day worked for young workers and young workers are not allowed night work or overtime **Data Point:** Record Review: Learner policy, Record reference: 820-5022, Version Number: V1.1, Issue date: March 11, 2024, Expiry date: Nil, States: a written policy stating learners are not hired **Data Point:** Record Review: Employee Handbook, Record reference: Nil, Version Number: Nil, Issue date: April 18, 2025, Expiry date: Nil, States: adequate and effective working time and days off policy and procedure stating the compliance requirements on hours worked, days off, sick leave, holidays, vacation, paternity/maternity leave, mandated meal, rest breaks and other leave periods and written process to accurately determine, record, manage and control working hours including overtime and days off. **Data Point:** Record Review: Employee Handbook, Record reference: Nil, Version Number: Nil, Issue date: April 18, 2025, Expiry date: Nil, States: adequate and effective compensation policy and procedure stating the compliance requirements on "Pay equals time worked" for any company-required activity, all workers are paid no less than the agreed wage for all regular hours, overtime are paid and are on top of wage for regular hours, other compensation are paid and are on top of wage for regular hours, benefits are paid and are on top of wage for regular hours and payment to leavers **Data Point:** Record Review: Anti-Harassment and Discrimination Management, Record reference: 820-5025, Version Number: V1, Issue date: December 29, 2020, Expiry date: Nil, States: adequate and effective disciplinary policy and procedure stating the compliance requirements on the prohibition of disciplinary wage deductions and assures "Pay equals time worked" **Data Point:** Record Review: Facility CSR Code of Conduct, Record reference: 810-9005-02, Version Number: V4, Issue date: May 05, 2025, Expiry date: Nil, States: adequate and effective non-Discrimination/Non-Harassment/Humane Treatment policy and procedure with a clear commitment to decisions in hiring, employing or terminating workers are based solely on the candidate's ability to perform the job's requirements, no harsh or inhumane treatment, including violence, gender-based violence, sexual harassment, sexual abuse, corporal punishment, mental or physical coercion, bullying, public shaming, or verbal abuse of workers or threat of any such treatment, no discrimination or harassment based on race, color, age, gender, sexual orientation, gender identity or expression, ethnicity or national origin, disability, pregnancy, religion, political affiliation, union membership, covered veteran status, protected genetic information, or marital status in hiring and employment practices such as wages, promotions, rewards, and access to training **Data Point:** Record Review: Reasonable Religious Practices Management Policy, Record reference: 820-9121, Version Number: V1, Issue date: November 21, 2022, Expiry date: Nil, States: adequate and effective reasonable accommodation policy and procedure with a clear commitment to provide reasonable accomodations for disability and religious requests **Data Point:** Record Review: Freedom of Association and Collective Bargaining Management Policy, Record reference: 820-9138, Version Number: V1, Issue date: March 16, 2023, Expiry date: Nil, States: adequate and effective Freedom of Association policy and procedure with a clear commitment to respect the right of workers to form or enroll in a trade union, or to refrain from doing so and non-interferance with and will not finance a trade union **Data Point:** Record Review: Freedom of Association and Collective Bargaining Management Policy, Record reference: 820-9138, Version Number: V1, Issue date: March 16, 2023, Expiry date: Nil, States: adequate and effective collective

	bargaining policy and procedure with a clear commitment to respect to bargaining collectively or refrain from doing so **Data Point:** Record Review: Freedom of Association and Collective Bargaining Management Policy, Record reference: 820-9138, Version Number: V1, Issue date: March 16, 2023, Expiry date: Nil, States: adequate and effective peaceful assembly policy and procedure with a clear commitment to respect the right of workers; individually or collectively; to express, promote, pursue, and defend their concerns or ideas; or to refrain from doing so **Data Point:** Record Review: 7 out of 7 Service providers, Labor Agents and Labor Contractors contracts for the period November 2024 to October 2025 demonstrate executed contracts including requirements to ensure conformance with the policies and process. **Data Point:** Record Review: 2 out of 2 labor records for the period November 2024 to October 2025 demonstrate appropriate retention on-site and off-site with appropriate levels of access to ensure privacy and conforming to legal and customer requirements
E) SUPPLY CHAIN MANAGEMENT	
E4) SUPPLIER RESPONSIBILITY	
Question #	VAP-E4.3
Question Text	An adequate and effective process is established to ensure that the next-tier major suppliers implement the RBA Code.
Rating	Major Non-Conformance
Conclusion	A process is established to ensure that the next tier major suppliers implement the RBA Code, however, for indirect full-time assigned workers of on-site service providers, three major non-conformances are confirmed on provision A3: 1) Hours of workers from 2 out of 2 on-site service providers (security, cleaner and catering) worked in a workweek over the last 12 months do not exceed 60 hours and the daily overtime hours do not exceed the local law of 3 h/day. Overtime hours of workers from 2 out of 2 on-site service providers (security, cleaner and catering) exceed the local law of 36 h / month. The months of October 2025 (random), March 2025 (random) and December 2024 (random) are reviewed. There is no obvious peak or low season for on-site service provider workers. The highest weekly working hours are 51.5 h/workweek. a) Monthly overtime hours of workers from 2 out of 2 on-site service providers (security, cleaner and catering) exceed the local law of 36 h/month: a.a) Average = 6.7% with a highest of 64 hours in March 2025. a.b) October 2025 (random) = 13% on-site service workers with the highest of 57 hours. a.c) March 2025 (random) = 7% on-site service workers with the highest of 47 hours. a.d) December 2024 (random) = 0% on-site service workers with the highest of 32 hours. a.d) No young service workers. [1) PRC Labor Law article 41, effective from August 27, 2009/《中华人民共和国劳动法》第41条2009年8月27日生效 / The employer may extend working hours due to the requirements of its production or business after consultation with the trade union and laborers, but the extended working hour for a day shall generally not exceed one hour; if such extension is called for due to special reasons, the extended hours shall not exceed three hours a day under the condition that the health of laborers is guaranteed. However, the total extension in a month shall not exceed thirty-six hours. / 用人单位由于生产经营需要， 经与工会和劳动者协商后可以延长工作时间，一般每日不得超过一小时；因特殊原因需要延长工作时间的，在保障劳动者身体健康的条件下延长工作时间每日不得超过三小时，但是每月不得超过三十六小时。

Validated Audit Report

Data points	**Data Point:** Site Observation: No evident presence of violence and explicit threats of any kind; No evidence present of management's control of a trade union exists; No evident presence of a prohibition of association with a trade union **Data Point:** Record Review: 10 out of 10 Grievance records for the period November 2024 to October 2025 demonstrate There are no recorded episodes of violence, explicit threats of any kind or any other violations of the right to freedom of association; Grievance records on Freedom of Association should the grievance is acted upon **Data Point:** Record Review: 20 out of 20 External media records for the period November 2024 to October 2025 demonstrate There are no recorded episodes of violence, explicit threats of any kind or any other violations of the right to freedom of association **Data Point:** Record Review: 5 out of 5 worker representative meeting records for the period November 2024 to October 2025 demonstrate The source of funding and materials; Management contributions are limited to providing meeting space and/or meeting materials (such as note taking material) **Data Point:** Record Review: 54 out of 54 pay roll records for the period November 2024 to October 2025 demonstrate No difference in payment with other workers in similar job functions **Data Point:** Record Review: 5 out of 5 Communication records for the period November 2024 to October 2025 demonstrate There are no restrictions on workers' freedom of association, and communications regarding freedom of association are not prohibited. **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-A6.2
Question Text	The legal rights of all workers to bargain collectively, or refrain from doing so, are respected.
Rating	Conformance
Conclusion	Legal rights of all workers to bargain collectively, or refrain from doing so, are respected
Data points	**Data Point:** Site Observation: No evidence of refusal by management to enter negotiations upon request by the trade union certified to represent workers **Data Point:** Record Review: 10 out of 10 Grievance records for the period November 2024 to October 2025 demonstrate No evidence of refusal by management to enter negotiations upon request by the trade union; Auditee participates in good faith in the collective bargaining process with the trade union certified to bargain on behalf of the workers; **Data Point:** Record Review: 10 out of 10 worker representative meeting records for the period November 2024 to October 2025 demonstrate No evidence of refusal by management to enter negotiations upon request by the trade union; Auditee participates in good faith in the collective bargaining process with the trade union certified to bargain on behalf of the workers; **Data Point:** Record Review: NA, Record reference: NA, Version Number: NA, Issue date: NA, Expiry date: NA, States: Comments: No CBA is available since no such requirement per legal requirement. **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-A6.3
Question Text	Participants respect the legal right of all workers to peacefully assemble.
Rating	Conformance
Conclusion	Participants respect the legal right of all workers to peacefully assemble

Validated Audit Report

Data points	**Data Point:** Site Observation: No signs of explicit prohibition of the right of peaceful assembly. **Data Point:** Record Review: 10 out of 10 Grievance records for the period November 2024 to October 2025 demonstrate Respects the right of workers to individually or collectively; to express, promote, pursue, and defend their concerns or ideas; Does not interfere with, restrain, or coerce workers in the exercise of their right to individually or collectively; to express, promote, pursue, and defend their concerns or ideas **Data Point:** Record Review: 3 out of 3 worker representative meeting records for the period November 2024 to October 2025 demonstrate Respects the right of workers to individually or collectively; to express, promote, pursue, and defend their concerns or ideas; Does not interfere with, restrain, or coerce workers in the exercise of their right to individually or collectively; to express, promote, pursue, and defend their concerns or ideas **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
A.M.1) RISK ASSESSMENT	
Question #	VAP-A.M.1.1
Question Text	An adequate and effective labor compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Rating	Conformance
Conclusion	An adequate and effective labor compliance process to monitor, identify, understand and ensure compliance with applicable laws and regulations and customer requirements is established
Data points	**Data Point:** Record Review: Law Requirement and Other Compliance Management Procedure, Record reference: 810-4046, Version Number: V3.1, Issue date: May 13, 2024, Expiry date: Nil, States: Adequate and efffective quarterly compliance review procedure including applicable legal requirements and applicable customer requirements; to identify, assess, integrate, implement and record; and to ensure timely renewal for the expiration of permits, licenses and testing reports **Data Point:** Record Review: Labor & Ethics Compliance Calendar , Record reference: 810-4046-01, Version Number: Nil, Issue date: October 10, 2025, Expiry date: Nil, States: Compliance calendar is accurate, up to date including applicable legal requirements and applicable customer requirements; a reminder system is in place **Data Point:** Record Review: Law, Regulations and Customer Requirements Evaluation List, Record reference: Nil, Version Number: Nil, Issue date: October 10, 2025, Expiry date: Nil, States: Accurate, up to date compliance register with summaries of applicable laws, regulations and key RBA code related customer requirements that impact the operations **Data Point:** No Students/learners of apprentices in the facility **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations
Question #	VAP-A.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential labor risks where the facility caused or contributed to adverse labor impacts (including applicable requirements).
Rating	Conformance
Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential labor risks where the facility caused or contributed to adverse labor impacts including applicable requirements.

Validated Audit Report

Question #	VAP-A.M.3.2
Question Text	An adequate and effective process is established to anonymously report labor grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance
Conclusion	An adequate and effective confidential Labor grievance without fear of reprisal or intimidation is established
Data points	**Data Point:** Site Observation: grievance channels are clearly communicated; internal communication of the grievance mechanism must be in workers' native language(s) and visible **Data Point:** Record Review: Communication and Grievance Management Procedure, Record reference: 820-5016, Version Number: V3, Issue date: October 12, 2025, Expiry date: Nil, States: adequate and effective grievance process for internal and external stakeholders to anonymously report grievances without fear of reprisal through clear grievance channels so reporting is encouraged and comfortable **Data Point:** Record Review: 10 out of 10 Grievance records for the period November 2024 to October 2025 demonstrate grievances from stakeholders are adequately received **Data Point:** Record Review: 10 out of 10 Investigation records for the period November 2024 to October 2025 demonstrate the validity of any grievance is promptly investigated and each valid grievance has an action plan **Data Point:** Record Review: 10 out of 10 Correspondence to workers and managers and external stakeholders for the period November 2024 to October 2025 demonstrate they are provided with written information on how to report a grievance **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
A.M.4) PERFORMANCE REVIEW AND CONTINUOUS IMPROVEMENT	
Question #	VAP-A.M.4.1
Question Text	An adequate and effective labor management performance review and continuous improvement process is established.
Rating	Conformance
Conclusion	An adequate and effective Labor management Performance review and continuous improvement process is established
Data points	**Data Point:** Record Review: Labor and Ethic Compliance Operation Management Procedure, Record reference: 810-4044-01, Version Number: V3, Issue date: Jauanry 25, 2022, Expiry date: Nil, States: adequate and effective performance management process to annually review the performance and management system and take additional action plans if indicators, objectives or targets are off track **Data Point:** Record Review: Management System Internal Review Management Procedure, Record reference: 810-1002, Version Number: V7, Issue date: May 20, 2025, Expiry date: Nil, States: formal indicator, target and objective communication to workers with clearly defined forward looking numeric and greater than 0 goal within the time period for each indicator, target and objective **Data Point:** Record Review: 2 out of 2 Action plans for the period November 2024 to October 2025 demonstrate All indicators, objectives or targets are on-track or an action plan is in place for those off-track **Data Point:** Record Review: 2 out of 2 Progress reports for the period November 2023 to October 2025 demonstrate each indicator, objective and target has progress reported regularly **Data Point:** Record Review: 2 out of 2 Labor system evaluations reports for the period November 2024 to October 2025 demonstrate Regular evaluations are done for the effectiveness of training, grievances and labor practices **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-A.M.4.2
Question Text	An adequate and effective labor self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Rating	Conformance
Conclusion	An adequate and effective labor self-audit process is established to assess conformance with the RBA Code and customer requirements periodically

Validated Audit Report

Data points	**Data Point:** Record Review: Management System Internal Review Management Procedure (Doc, Record reference: 810-1002, Version Number: V7, Issue date: May 20, 2025, Expiry date: Nil, States: adequate and effective self audit process to periodically assess conformance with applicable regulatory, RBA, customer and other requirements the facility subscribes to. The audit findings are reviewed by senior management. **Data Point:** Record Review: 2 out of 2 labor self audits for the period November 2024 to October 2025 demonstrate Self audits are performed regularly and audit findings are reviewed by senior management. **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations
Question #	VAP-A.M.4.3
Question Text	An adequate and effective labor corrective action process is established to rectify and close non-conformances.
Rating	Conformance
Conclusion	An adequate and effective labor corrective action process is established to rectify and close non-conformances.
Data points	**Data Point:** Record Review: Labor and Ethics Corrective and Preventive Actions Procedure, Record reference: 810-4007, Version Number: V5.3, Issue date: June 24, 2025, Expiry date: Nil, States: adequate and effective corrective action process is in place to ensure recorded corrective action plans for any nonconformance are tracked, additional actions are taken when a corrective action is off-track, all actions are verifiably closed and closure is confirmed by a management representative. and there is a demonstrated link between the CAP and the performance management objectives and targets. **Data Point:** Record Review: 2 out of 2 labor self audits for the period November 2024 to October 2025 demonstrate all audited aspects are in conformance **Data Point:** No government inspections for the period November 2022 to October 2025 **Data Point:** Record Review: 2 out of 2 corrective action plans for the period November 2024 to October 2025 demonstrate management system review findings, self audit findings, government inspection findings and off-track indicators, objectives and targets have a corrective action plan **Data Point:** Record Review: 2 out of 2 corrective action plan closure reports for the period November 2024 to October 2025 demonstrate closure verification reports with mgmt. confirmation exist for each corrective action plan item **Data Point:** Management Interview Not disclosed; Title: HR Manger confirms audit observations
B) HEALTH AND SAFETY	
B1) OCCUPATIONAL HEALTH AND SAFETY	
Question #	VAP-B1.1
Question Text	All required permits, licenses, and test reports for Occupational Health and Safety are in place and communicated timely to the government (if required).
Rating	Conformance
Conclusion	All required permits, licenses and test reports for occupational health & safety are in place. Reporting to government is not legally required.

Validated Audit Report

Data points	**Data Point:** Site Observation: Pregnant workers are not working in a job which is hazardous to the pregnant worker and her child; Nursing mothers are not working in a job which is hazardous to the worker and her child; Reasonable accommodations for nursing mothers are in place: cannot be a toilet stall or a bathroom, private, shieled from view and free from intrusion, close to the workspace , clean, secure, has a water supply and has access to hygienic storage **Data Point:** Record Review: 2 out of 2 personnel files of pregnant worker and nursing mothers demonstrate Pregnant workers are only assigned to jobs safe for them; Nursing mothers are only assigned to jobs safe for them; Risk assessment specific to worker including before, during and after pregnancy **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
B2) EMERGENCY PREPAREDNESS	
Question #	VAP-B2.1
Question Text	Adequate and effective fire detection, alarm and suppression systems are in place
Rating	Conformance
Conclusion	Adequate and effective fire detection, alarm and suppression systems are in place
Data points	**Data Point:** Site Observation: Automatic heat detection as required by insurance company; Smoke detection as required by insurance company; Detector devices and systems are functioning and well maintained; All buildings have a manual or automatic fire alarm system; All buildings have a manual or automatic notification system; Fire alarm control system is free of trouble or supervisory signals; Fire alarm manual call-points or pull-stations are provided along egress routes to exits; Portable fire extinguishers are installed, with unimpeded access and inspection tags; Automatic fire sprinklers as required by insurance company; Fire hoses with unimpeded access and inspection tags; Fire water tank and water pressure are normal; Asbestos-containing fire-suppression materials—for example, blankets—are prohibited. **Data Point:** Record Review: 12 out of 12 fire safety equipment inspection reports for the period November 2024 to October 2025 demonstrate Inspection frequency for portable fire extinguishers is at least monthly.; Inspection frequency for single unit fire detectors is at least every 6 months.; Inspection frequency for all other fire safety equipment is not less than the required frequency; All fire safety equipment is in good working condition **Data Point:** Record Review: 2 out of 2 fire safety equipment test records for the period November 2024 to October 2025 demonstrate Test frequency is not less than the required frequency; All fire safety equipment is in good working condition **Data Point:** Record Review: 12 out of 12 maintenance records for the period November 2024 to October 2025 demonstrate Test frequency is not less than the required frequency; All fire safety equipment is in good working condition **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B2.2
Question Text	Effective emergency preparedness and response programs (plans/process) are established
Rating	Conformance
Conclusion	Effective emergency preparedness and response programs (plans/process) are established

Data points	**Data Point:** Site Observation: Combustible storage is minimized and limited to areas with adequate fire detection and protection.; Flammable and combustible materials are properly stored to prevent the accumulation of vapors, ignition hazards are eliminated in areas where combustible and flammable materials, are stored and used if there is a flammable atmosphere **Data Point:** Record Review: Business continuity plan, Record reference: 810-4066, Version Number: 2.2, Issue date: August 15, 2023, Expiry date: Nil., States: A current and adequate business continuity plan is available **Data Point:** Record Review: Business resumption plan, Record reference: 810-4061-01, Version Number: 1.1, Issue date: February 05, 2025, Expiry date: Nil., States: A current and adequate business resumption plan is available **Data Point:** Record Review: Emergency response plan , Record reference: XCKJ-YA-2024, Version Number: A2, Issue date: November 15, 2024, Expiry date: November 14, 2027, States: A current and adequate emergency response plan (ERP) is available reflecting the risk assessment and includes contact information for emergency responders. **Data Point:** Record Review: Post-emergency plans, Record reference: 810-4061-01, Version Number: 1.1, Issue date: February 08, 2025, Expiry date: Nil., States: A current and adequate post-emergency plan is available **Data Point:** Record Review: 6 out of 6 incident reports for the period November 2024 to October 2025 demonstrate A root cause investigation including corrective and preventative actions is available for each incident **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B2.3
Question Text	Effective emergency exit access, exits, and exit discharge are adequate in number and location, readily accessible, and properly maintained
Rating	Conformance
Conclusion	Effective emergency exit access, exits, and exit discharge are adequate in number and location, readily accessible, and properly maintained
Data points	**Data Point:** Site Observation: An adequate number of effective exit routes from every area; Exit routes are separated by an appropriate distance and do not share a common exit.; Exit routes are clear of obstructions; Exit discharges discharge to open space/parking lot, and do not discharge to an enclosed/gated/locked area; Exits are free of material storage; and enclosures are not used for any other purpose except for egress; All exit route doors (i.e. exit access doors, exit discharge doors) which serve high occupancy (=>50) or hazardous areas, open in the direction of egress.; All Exit Route doors (i.e. Exit Access doors and Exit Discharge doors) should open without using a key, badge, code, special knowledge, or effort.; All Exit Discharge doors must be a single motion exit; All Exit Discharge doors must have listed panic hardware installed which is pushed open in a single motion; Exit signs are provided to mark exits on every floor; Exit signs are illuminated and/or lighted in the event of a power failure; Additional exit and/or directional signs are provided at main passageways/aisles, long corridors and at other locations where the way to the nearest exit is not clear.; Exit signs are illuminated and/or lighted in the event of a power failure.; Additional exit and/or directional signs are provided at main passageways/aisles, long corridors and at other locations where the way to the nearest exit is not clear.; Emergency lighting provided and installed to illuminate means of egress in the event of a power failure.; Lighting shall provide adequate, functional emergency lighting in stairs, aisles, corridors, ramps, and passageways leading to exits, and in other areas as required by applicable laws.; Either battery or backup generator may power emergency lighting.; Penetrations are limited to sprinkler pipes, standpipes, and electrical services, pipe and duct installation serving the enclosures; Openings into the enclosures are protected by fire rated doors or window; Fire doors are in good condition, self-closing or automatic closing (upon fire alarm or detection of smoke; Integrity of exit enclosures is maintained; Inside and outside muster points have been established in safe locations to enable employee accountability during an emergency.; Emergency response kits are easily located and accessible near muster points **Data Point:** Record Review: 12 out of 12 emergency support equipment inspection records for the period November 2024 to October 2025 demonstrate Emergency lighting inspection records are available per insurance requirements or local practice whichever is stricter; Emergency exit sign inspection records are available per insurance requirements or local practice whichever is stricter; Evacuation path inspection records are available per insurance requirements or local practice whichever is stricter; Exit enclosure inspection records are available per insurance requirements or local practice whichever is stricter **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B2.4
Question Text	Adequate and effective fire and other identified emergency evacuation drills are conducted with all workers and people on site
Rating	Conformance

Validated Audit Report

Conclusion	Adequate and effective fire and other identified emergency evacuation drills are conducted with all workers and people on site
Data points	**Data Point:** Record Review: Emergency Response and Preparedness Management Procedures, Record reference: 810-4019, Version Number: 6, Issue date: May 28, 2025, Expiry date: Nil., States: An adequate and effective emergency evacuation drill program including all workers, every area and all shifts is performed at least annually during the day and when it is dark; Fire drill frequency is at least annual; Other than fire identified emergency drill frequency is at least annual **Data Point:** Record Review: 4 out of 4 Emergency evacuation drill reports for the period November 2023 to October 2025 demonstrate Emergency evacuation drill reports demonstrate all workers are participating, drills are executed at least annually for fire and other than fire emergency, include all work shifts, include one drill that is conducted while it is dark outside **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
B3) OCCUPATIONAL INJURY AND ILLNESS	
Question #	VAP-B3.1
Question Text	Work-related accidents, near-misses, and illnesses are reported, tracked, accurate, investigated, and analyzed, and workers are not in situations that can cause them imminent harm.
Rating	Conformance
Conclusion	Work-related accidents, near-misses, and illnesses are reported, tracked, accurate, investigated, and analyzed, and workers are not in situations that can cause them imminent harm
Data points	**Data Point:** Site Observation: Workers are not in situations that can cause imminent harm; Areas that can cause imminent harm to workers are free of workers and are signed, and access is restricted **Data Point:** Record Review: 4 out of 4 OHS incident investigation reports for the period November 2024 to October 2025 demonstrate Accurate occupational safety reporting includes all reportable and non-reportable accidents, all incidents, all near misses; Accurate and current occupational safety reporting on occupational illness and surveillance data **Data Point:** Record Review: 2 out of 2 investigation reports for the period November 2024 to October 2025 demonstrate all accidents and incidents are investigated; all accidents and incidents are analyzed to minimize the potential for future occurrence **Data Point:** Record Review: 2 out of 2 occupational safety trends analysis reports for the period November 2024 to October 2025 demonstrate Trend analysis of the occupational Injury is performed at least annually.; Trend analysis of the occupational illness data is performed at least annually. **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B3.2
Question Text	Adequate first response equipment and first aid kits to provide medical treatment for injured or ill workers are available
Rating	Conformance
Conclusion	Adequate first response equipment and first aid kits to provide medical treatment for injured or ill workers are available

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	**Data Point:** Site Observation: Assigned first aid kits are available in designated locations.; Assigned first aid kits are appropriate; Assigned first aid kits are completely stocked; First aid kits are unlocked; First response equipment is available in designated locations.; First response equipment is appropriate; First response equipment is well maintained; No asbestos blankets are used; Alternative resources such as outside medical services are communicated to employees when onsite clinic is not available **Data Point:** Record Review: 12 out of 12 First Aid / First Response kits/equipment inventory lists for the period November 2024 to October 2025 demonstrate First Aid / First Response kits/equipment have an inventory list; First Aid / First Response kits/ equipment inventory inspection frequency is at least monthly; First Aid / First Response kits/equipment have adequate supplies **Data Point:** Record Review: 12 out of 12 First Aid / First Response kits/equipment inspection records for the period November 2024 to October 2025 demonstrate Up-to-date inspection tracking records are available and show at least a monthly inspection frequency **Data Point:** Record Review: In-house infirmary operation logs or medical clinic operations logs are not applicable as there is no in-house infirmary or clinic in the factory and no such requirement as per local law., Record reference: NA, Version Number: NA, Issue date: NA, Expiry date: NA, States: **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
B4) INDUSTRIAL HYGIENE	
Question #	VAP-B4.1
Question Text	Workers' exposures to chemical, biological, and physical hazards are identified, evaluated, and adequately controlled in accordance with the hierarchy of controls, which is maintained through ongoing, systematic monitoring of worker's health.
Rating	Conformance
Conclusion	Workers' exposures to chemical, biological, and physical hazards are identified, evaluated, and adequately controlled in accordance with the hierarchy of controls, which is maintained through ongoing, systematic monitoring of worker's health.

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	**Data Point:** Site Observation: Chemicals are adequately and effectively categorized; Chemicals are adequately and effectively handled; Chemicals are adequately and effectively stored; Chemicals are adequately and effectively moved within a single facility/ multiple facility; Chemicals are adequately and effectively access controlled; Chemicals are adequately and effectively segregated; Chemicals have adequate and effective secondary containment; Chemicals have adequate and effective ventilation; Chemicals have adequate and effective fire protection; Chemicals have adequate and effective storage cabinets; Adequate and effective engineering controls to reduce or eliminate worker exposure to chemical agents are in place; Adequate and effective engineering controls to reduce or eliminate worker exposure to biological agents are in place; Adequate and effective engineering controls to reduce or eliminate worker exposure to physical agents are in place; Workplace is free from obvious odor; Workplace is free from visible fume; Workplace is free from dust; Workplace is free from other conditions leading to potential unhealthy feelings **Data Point:** Record Review: 4 out of 4 Chemical inventory records for the period November 2024 to October 2025 are Chemical inventory records are maintained, accurate, up-to-date **Data Point:** Record Review: Chemical Management Procedure, Record reference: 810-4034, Version Number: 4.1, Issue date: September 26, 2025, Expiry date: Nil., States: Adequate and effective chemical control program with an administrative controls process to control the identified potential hazards to chemical , biological and physical agents **Data Point:** Record Review: InnoLight Specification for Restriction of Hazardous Substances , Record reference: 820-6253, Version Number: 5, Issue date: May 09, 2025, Expiry date: N/A, States: Adequate and effective hazardous chemical process to track, review, approve the use and purchase of all hazardous chemicals; Adequate and effective hazardous chemical process to evaluate chemicals for less hazardous or non-hazardous alternatives including Greenhouse Gas and ozone depletion impact and to approve all purchases of new hazardous chemicals prior to use. **Data Point:** Record Review: 12 out of 12 Hazardous chemical inspection records for the period November 2024 to October 2025 demonstrate Accurate hazardous chemical inspection records are maintained for all hazardous substances, points of use and storage; Effective process and administrative controls to track use of all hazardous chemicals **Data Point:** Record Review: 2 out of 2 Medical surveillance records for the period November 2024 to October 2025 demonstrate Respiratory evaluations to determine if worker is being harmed from exposure to agents are maintained; Hearing loss evaluations related to specific job activities are maintained; Other medical evaluations related to specific job activities are maintained **Data Point:** Record Review: 6 out of 6 hazardous substances manifests and shipping papers for the period November 2024 to October 2025 demonstrate Chemical inventory records are accurate; Inspection records of hazardous substances and their points of storage and use are accurate. **Data Point:** Record Review: 2 out of 2 Approvals for purchase of hazardous chemicals for the period November 2024 to October 2025 demonstrate Approvals for purchase of hazardous chemicals and for all new purchases of hazardous chemicals prior to use include evaluations of chemicals of less hazardous or non-hazardous alternatives including Greenhouse Gas and ozone depletion impact is implemented **Data Point:** Record Review: 4 out of 4 hazardous chemicals evaluations for the period November 2024 to October 2025 demonstrate Evaluations of chemicals of less hazardous or non-hazardous alternatives including Greenhouse Gas and ozone depletion impact is implemented **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
B5) PHYSICALLY DEMANDING WORK	
Question #	VAP-B5.1
Question Text	Worker exposure to the hazards of physically demanding work is controlled effectively
Rating	Conformance
Conclusion	Worker exposure to the hazards of physically demanding work is controlled effectively
Data points	**Data Point:** Site Observation: Adequate engineering controls to reduce or eliminate physically demanding work are in place and effective **Data Point:** Record Review: 2 out of 2 Medical surveillance records for the period November 2024 to October 2025 demonstrate Effective process and administrative controls to track physically demanding work **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations Comments: Medical surveillance records is not avaliable as no worker sought medical treatment for this reason **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

B6) MACHINE SAFEGUARDING	
Question #	VAP-B6.1
Question Text	An adequate and effective machine-safeguarding program is implemented, and workers operate machinery safely.
Rating	Conformance
Conclusion	An adequate and effective machine-safeguarding program is implemented, and workers operate machinery safely
Data points	**Data Point:** Site Observation: All machines have adequate emergency stops; All machines have adequate safeguards; All workers operate machine safely. **Data Point:** Record Review: 6 out of 6 Work instructions demonstrate Work instructions are available at the machine in a language understood by the worker and demonstrate administrative controls **Data Point:** Record Review: 6 out of 6 Safe machine operation records for the period November 2024 to October 2025 demonstrate Safe machine operation records are available at the machine in a language understood by the worker and demonstrate administrative controls **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

B7) FOOD, SANITATION AND HOUSING	
Question #	VAP-B7.1
Question Text	Worker housing is clean, safe and well-maintained and meet international housing standards
Rating	Conformance
Conclusion	Worker housing is clean, safe and well-maintained and meet international housing standards
Data points	**Data Point:** Not Applicable, There are no dormitories present in the facility **Data Point:** Not Applicable, There are no dormitories present in the facility **Data Point:** Not Applicable, There are no dormitories present in the facility **Data Point:** Not Applicable, There are no dormitories present in the facility **Data Point:** Not Applicable, There are no dormitories present in the facility **Data Point:** Not Applicable, There are no dormitories present in the facility
Question #	VAP-B7.2
Question Text	Bathrooms, employee spaces, cafeterias, food areas are safe, clean, well maintained, and well managed
Rating	Conformance
Conclusion	Bathrooms, employee spaces, cafeterias, food areas are safe, clean, well maintained, and well managed

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Validated Audit Report

Data points	**Data Point:** Site Observation: Toilets are clean and well maintained; Employee spaces are clean and well maintained; Prayer or religious areas are clean and well maintained; Cafeterias and food areas are clean and well maintained; Toilets are provided with adequate hand washing facilities.; Cafeterias and food areas are provided with adequate hand washing facilities.; Food service workers wear masks, hairnets and gloves as necessary to prevent food contamination.; Food storage and preparation areas are clean and well maintained; Food is stored properly, used or disposed of before the marked expiration date, kept covered with raw and cooked food stored separately **Data Point:** Record Review: Canteen management standard, Record reference: 820-9139, Version Number: 1.2, Issue date: April 29, 2025, Expiry date: Nil., States: Adequate and effective food preparation and storage requirements demonstrate process and administrative controls are in place and effective **Data Point:** Record Review: 24 out of 24 Food handling and hygiene inspection reports for the period November 2024 to October 2025 demonstrate Up-to-date regular food handling and hygiene inspection reports demonstrate food handling is safe, meets or exceeds food hygiene requirements and process and administrative controls are in place and effective **Data Point:** Record Review: 24 out of 24 Sanitation records for the period November 2024 to October 2025 demonstrate Up-to-date sanitation records demonstrate process and administrative controls are effective **Data Point:** Record Review: 12 out of 12 maintenance records for the period November 2024 to October 2025 demonstrate Up-to-date maintained records demonstrate process and administrative controls are effective **Data Point:** Record Review: 12 out of 12 pest control records for the period November 2024 to October 2025 demonstrate Up-to-date maintained pest control records demonstrate process and administrative controls are effective **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
B.M.1) RISK ASSESSMENT	
Question #	VAP-B.M.1.1
Question Text	An adequate and effective Occupational Health and Safety compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Rating	Conformance
Conclusion	An adequate and effective occupational Health & Safety compliance process to monitor, identify, understand and ensure compliance with applicable laws and regulations and customer requirements is established
Data points	**Data Point:** Record Review: Environmental, Health and Safety Manual, Record reference: 800-0003, Version Number: 6, Issue date: February 23, 2023, Expiry date: Nil., States: Adequate and effective quarterly compliance review procedure including applicable legal requirements and applicable customer requirements; To identify, assess, integrate, implement and record; And to ensure timely renewal for the expiration of permits, licenses and testing reports **Data Point:** Record Review: Compliance calendar, Record reference: Nil., Version Number: Nil., Issue date: November 17, 2025, Expiry date: Nil., States: An accurate, up to date compliance calendar including applicable legal requirements and applicable customer requirements; A reminder system is in place **Data Point:** Record Review: Compliance register, Record reference: Nil., Version Number: Nil., Issue date: November 17, 2025, Expiry date: Nil., States: Accurate, up to date compliance register with summaries of applicable laws, regulations and key RBA code related customer requirements that impact the operations **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations
Question #	VAP-B.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential occupational health and safety risks where the facility caused or contributed to adverse occupational health and safety impacts (including applicable requirements).
Rating	Conformance
Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential labor risks where the facility caused or contributed to adverse occuptational health & safety impacts including applicable requirements.

Validated Audit Report

Data points	**Data Point:** Record Review: Environmental Factors and Hazards Identification and Control Procedure, Record reference: 810-4043, Version Number: 5, Issue date: May 10, 2022, Expiry date: Nil., States: adequate and effective risk assessment process to identify the most significant actual and potential occupational health and safety risks, including specific risks of relevant demographics, such as gender and age, where the facility caused or contributed to adverse health and safety impacts for internal and external stakeholders at least for harm to life, property, fire, chemical spill, earthquake, severe weather, workplace violence, strike and asbestos/lead; The risk assessment is updated when there is a Significant Change; The scope of the risk assessment includes every task, every site operation/process, every physical location and all identified internal and external stakeholders, including at least direct and indirect workers, young workers, migrant workers , worker representatives, staff functions, on-site service providers, suppliers, customers, stakeholders immediately neighboring the auditee, pregnant workers and nursing morthers (after pregnancy is reported and after the mother returns to work), chemical, biological, or physical agents (based on associated industrial hygiene sampling and testing and includes exposure to multiple chemicals) and machine safeguarding needs (pre-purchase/pre-installation hazard review of all machinery) **Data Point:** Record Review: 4 out of 4 risk assessments for the period November 2024 to October 2025 demonstrate Each identified risk include and assess legal and customer requirements and has an action to minimize such risk through the Hierarchy of Controls for the most significant risks; risk assessments are updated when there is a Significant Change **Data Point:** Record Review: Exerting Influence on Relevant Parties Control Procedure, Record reference: 810-4049, Version Number: 3, Issue date: May 05, 2023, Expiry date: Nil., States: an adequate and effective internal and external stakeholder identification process for occupational health & safety **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations
B.M.2) CONTROL PROCESSES	
Question #	VAP-B.M.2.1
Question Text	Occupational health and safety responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Rating	Conformance
Conclusion	Health & Safety Responsibilities and authorities are adequately and effectively defined and assigned for all employees/workers (senior managers to workers) for implementation of management systems, and for compliance with laws, regulations and codes
Data points	**Data Point:** Site Observation: All conformance elements present; ERT personnel are easily identifiable.; First responders are easily identifiable **Data Point:** Record Review: RBA Assignment letter, Record reference: 800-0007, Version Number: 5.2, Issue date: September 23, 2025, Expiry date: Nil., States: All conformance elements present; A record assigns a senior representative the responsibility to ensure compliance with laws and regulations, compliance with the requirements of the RBA and is authorized to make decisions on programs, process actions and corrective actions; Responsibilities and authorities of each organizational level are documented in regular and emergency situations; An emergency response team (ERT) is formed and assigned, available during all shifts and has the authority to direct the response to emergencies to ensure the protection of worker health & safety, the environment and property **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B.M.2.2
Question Text	Adequate and effective occupational health and safety policies and control processes are established.
Rating	Conformance
Conclusion	Adequate and effective occupational health and safety policies and control processes are established

Important Notice
RBA CONFIDENTIAL - Internal use ONLY

Validated Audit Report

	Data Point: Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B.M.2.3
Question Text	An adequate and effective occupational health and safety training process is established for all managers/workers on all policy/process/job-related aspects and performance targets.
Rating	Conformance
Conclusion	An adequate and effective Health & Safety training process is established for all managers/workers on all policy/process/job related aspects and performance targets
Data points	**Data Point:** Record Review: Education and Training Management Specification, Record reference: 820-9030, Version Number: 5, Issue date: August 19, 2025, Expiry date: Nil., States: adequate and effective training process for workers, managers, ERT members, first aiders or responders, medical professionals and new employee orientation plan. Training is provided to all workers prior to the beginning of work **Data Point:** Record Review: Training needs analysis, Record reference: Nil., Version Number: Nil., Issue date: December 31, 2024, Expiry date: Nil., States: Training needs analysis covers minimum training topics and specific training for ERT, first responders, medical professionals, workers responsible for storage, clean up or disposal of chemical releases, training will be dependent on responsibilities during an emergency **Data Point:** Record Review: Training plan, Record reference: Nil., Version Number: Nil., Issue date: December 31, 2024, Expiry date: Nil., States: Adequate training plan covers all topics identified in the training needs analysis with an adequate training frequency. Training frequency for ERT, first aiders is at least annually, training is provided to all workers prior to the beginning of work and occupational health professionals and first responders are trained by external agencies or by internal qualified occupational health professionals **Data Point:** Record Review: 6 out of 6 Training materials for the period November 2024 to October 2025 demonstrate Each training on the training plan have adequate training materials **Data Point:** Record Review: 6 out of 6 Training records for the period November 2024 to October 2025 demonstrate Each training on the training plan have adequate training records for all attendees **Data Point:** Record Review: 6 out of 6 Training efficiency verifications for the period November 2024 to October 2025 demonstrate each training on the training plan have adequate training verification records for all attendees **Data Point:** No learner personnel files for the period November 2024 to October 2025 **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
B.M.3) COMMUNICATIONS	
Question #	VAP-B.M.3.1
Question Text	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational occupational health and safety practices and conditions and to foster continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational occupational health and safety practices and conditions and to foster continuous improvement

Validated Audit Report

Data points	**Data Point:** Site Observation: feedback channels are clearly communicated and visible; health & Safety communication clearly posted in the facility in a location identifiable and accessible by workers; appropriate signs, placards and labels identifying hazards; potential workplace hazards that workers are exposed to are clearly posted in the facility in a location identifiable and accessible by workers; PPE requirements are communicated to employees via posted signs; maps are posted throughout the facility which clearly identify exit routes and muster points in the correct orientation; adequate and effective signage is observed with emergency number(s), emergency team, emergency evacuation and response plan. **Data Point:** Record Review: Consultation and Communication Management Procedure, Record reference: 810-4070, Version Number: 2.1, Issue date: May 10, 2023, Expiry date: Nil., States: Adequate and effective communication and reporting process to suppliers, customers, workers and managers including seeking input and feedback from workers. General Health & Safety emergency process, general awareness, rules and Internal and external muster points are communicated to visitors **Data Point:** Record Review: 5 out of 5 Correspondence to Supplier management for the period November 2024 to October 2025 demonstrate Requirements of code implementation **Data Point:** Record Review: 5 out of 5 contracts with suppliers demontrate: contract terms and conditions requiring Suppliers to conform to the RBA code **Data Point:** Record Review: 5 out of 5 Correspondence to customers management for the period November 2024 to October 2025 demonstrate accident, incidents and near-misses statistics **Data Point:** Record Review: 5 out of 5 Correspondence to workers and managers for the period November 2024 to October 2025 demonstrate all minimum communication topics are covered and written information to workers on how to provide input and feedback for improvement; all hazards present at the site and action promoting of a safe workplace are communicated **Data Point:** Record Review: 5 out of 5 Communications effectiveness records for the period November 2024 to October 2025 demonstrate effectiveness verification is done regularly **Data Point:** Record Review: 5 out of 5 Input and feedback records for the period November 2024 to October 2025 demonstrate input and feedback from workers is adequately received **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B.M.3.2
Question Text	An adequate and effective process is established to anonymously report occupational health and safety grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance
Conclusion	An adequate and effective process is established to anonymously report occupational health and safety grievances confidentially without fear of reprisal or intimidation.
Data points	**Data Point:** Site Observation: grievance channels are clearly communicated; internal communication of the grievance mechanism must be in workers' native language(s) and visible **Data Point:** Record Review: Internal and external complaint and report handling procedures, Record reference: 820-5016, Version Number: 3, Issue date: October 12, 2025, Expiry date: Nil., States: adequate and effective grievance process for internal and external stakeholders to anonymously report grievances without fear of reprisal through clear grievance channels so reporting is encouraged and comfortable and workers scan raise safety concerns including early reporting of discomfort. **Data Point:** Record Review: 10 out of 10 Grievance records for the period November 2024 to October 2025 demonstrate grievances from stakeholders are adequately received **Data Point:** Record Review: 12 out of 12 safety concern logs for the period November 2024 to October 2025 demonstrate safety concerns and early discomfort reporting from stakeholders is adequately received **Data Point:** Record Review: 2 out of 2 Investigation records for the period November 2024 to October 2025 demonstrate the validity of any grievance is promptly investigated and each valid grievance has an action plan **Data Point:** Record Review: 5 out of 5 Correspondence to workers and managers and external stakeholders for the period November 2024 to October 2025 demonstrate written information on how to report a grievance **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

B.M.4) PERFORMANCE REVIEW AND CONTINUOUS IMPROVEMENT	
Question #	VAP-B.M.4.1
Question Text	An adequate and effective occupational health and safety management performance review and continuous improvement process is established.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety management performance review and continuous improvement process is established
Data points	**Data Point:** Record Review: Objectives, Targets and Management Programs Control Procedure, Record reference: 810-4044, Version Number: 3, Issue date: January 25, 2022, Expiry date: Nil., States: adquate and effective performance management process to annually review the performance and management system and take additional action plans if indicators, objectives or targets are off track **Data Point:** Record Review: Target and objective communication to workers, Record reference: Nil., Version Number: Nil., Issue date: January 01, 2025, Expiry date: Nil., States: formal indicator, target and objective communication to workers with clearly defined forward looking numeric and greater than 0 goal within the time period for each indicator, target and objective **Data Point:** Record Review: 12 out of 12 Action plans for the period November 2024 to October 2025 demonstrate All indicators, objectives or targets are on-track or an action plan is in place for those off-track **Data Point:** Record Review: 12 out of 12 Progress reports for the period November 2024 to October 2025 demonstrate each indicator, objective and target has progress reported regularly **Data Point:** Record Review: 12 out of 12 Health & Safety system evaluations reports for the period November 2024 to October 2025 demonstrate Regular evaluations are done for the effectiveness of every program, training, communication, grievances, OHS practices and safety concerns **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-B.M.4.2
Question Text	An adequate and effective occupational health and safety self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety self-audit process is established to assess conformance with the RBA Code and customer requirements periodically
Data points	**Data Point:** Record Review: Internal audit procedure , Record reference: 810-1002, Version Number: 7, Issue date: May 20, 2025, Expiry date: Nil., States: adequate and effective self audit process to periodically assess conformance with applicable regulatory, RBA, customer and other requirements the facility subscribes to. The audit findings are reviewed by senior management. **Data Point:** Record Review: 2 out of 2 Health & Safety self audits for the period November 2024 to October 2025 demonstrate Self audits are performed regularly and audit findings are reviewed by senior management. **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations
Question #	VAP-B.M.4.3
Question Text	An adequate and effective occupational health and safety corrective action process is established to rectify and close non-conformances.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety corrective action process is established to rectify and close non-conformances

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	**Data Point:** Record Review: Corrective and Pentive Action Control procedure, Record reference: 810-4007, Version Number: 5.3, Issue date: June 24, 2025, Expiry date: Nil., States: adequate and effective corrective action process to ensure recorded corrective action plans for any nonconformance are tracked, additional actions are taken when a corrective action is off-track, all actions are verifiably closed and closure is confirmed by a management representative. and there is a demonstrated link between the CAP and the performance management objectives and targets.; adequate and effective preventative action process to ensure preventative action is taken as a result of medical surveillance or injury, workers are removed from the current job immediately and offered another position in the facility, labor contract termination is prohibited due to the medical surveillance results, medical treatment, re-examination, and rehabilitation to the worker is provided and paid by employer **Data Point:** Record Review: 2 out of 2 Health & Safety self audits for the period November 2024 to October 2025 demonstrate all audited aspects are in conformance **Data Point:** Record Review: 2 out of 2 government inspections for the period November 2022 to October 2025 demonstrate have not identified any non-conformances **Data Point:** Record Review: 12 out of 12 corrective action plans for the period November 2024 to October 2025 demonstrate management system review findings, self audit findings, government inspection findings and off-track indicators, objectives and targets have a corrective action plan **Data Point:** Record Review: 12 out of 12 corrective action plan closure reports for the period November 2024 to October 2025 demonstrate closure verification reports with mgmt. confirmation exist for each corrective action plan item **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations

C) ENVIRONMENT	
C1) ENVIRONMENTAL PERMITS AND REPORTING	
Question #	VAP-C1.1
Question Text	All required permits, licenses and test reports for environment are in place and communicated timely to the government (if required).
Rating	Conformance
Conclusion	All required permits, licenses and test reports for environment are in place. Reporting to government is not legally required.
Data points	**Data Point:** Site Observation: Permits related to special equipment are posted when required; Licenses related to special equipment are posted when required; Test results related to special equipment are posted when required; Required postings are current and located in public view. **Data Point:** Record Review: Permits: Permit 1: Yes; Title: Pollutant Discharge Registration Permit; Record Reference: 91320594673917083700 1Y; Version no.: Nil.; *Issue date: September 27, 2023; *Expiry Date: September 26, 2028 Permit 2: Yes; Title: Permit for Discharging Urban Sewage into the Drainage Network; Record Reference: SuYuanZiDiP10807Hao; Version no.: Nil.; *Issue date: October 19, 2022; *Expiry Date: October 18, 2027 **Data Point:** Record Review: Licenses: License 1: Yes; Title: 3 out of 3 Hazardous substances vendor licenses; Record Reference: Nil.; Version no.: Nil.; *Issue date: Nil.; *Expiry Date: Nil. License 2: NA License 3: NA License 4: NA License 5: NA **Data Point:** Record Review: Test reports: Test Report 1: Yes; Title: Wastewater Testing Report; Record Reference: KDHJ251514; Version no.: Nil.; *Issue date: February 12, 2025; *Expiry Date: Nil. Test Report 2: Yes; Title: Production Exhaust Gas Testing Report; Record Reference: KDHJ251513; Version no.: Nil.; *Issue date: February 12, 2025; *Expiry Date: Nil. Test Report 3: Yes; Title: Boundary Noise Testing Report; Record Reference: KDHJ2512016; Version no.: Nil.; *Issue date: October 09, 2025; *Expiry Date: Nil. Test Report 4: Yes; Title: Oil Fume Testing Report; Record Reference: KDHJ251511; Version no.: Nil.; *Issue date: February 13, 2025; *Expiry Date: Nil. Test Report 5: Yes; Title: Boiler Exhaust Gas Testing Report; Record Reference: KDHJ252173; Version no.: Nil.; *Issue date: March 07, 2025; *Expiry Date: Nil. **Data Point:** Record Review: Certificates: Certificate 1: Yes; Title: 5 out of 5 Environmental Protective Completion Acceptance Approvals; Record Reference: Nil.; Version no.: Nil.; *Issue date: Nil.; *Expiry Date: Nil. Certificate 2: Yes; Title: 5 out of 5 Environmental Impact Assessment Approvals; Record Reference: Nil.; Version no.: Nil.; *Issue date: Nil.; *Expiry Date: Nil. Certificate 3: NA Certificate 4: NA Certificate 5: NA **Data Point:** Record Review: Government Reports: Government Report 1: NA Government Report 2: NA Government Report 3: NA Government Report 4: NA Government Report 5: NA **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

Validated Audit Report

C2) HAZARDOUS SUBSTANCES	
Question #	VAP-C2.1
Question Text	Hazardous waste is responsibly disposed of using government-approved and/or licensed vendors
Rating	Conformance
Conclusion	Hazardous waste is responsibly disposed of using government-approved and/or licensed vendors
Data points	**Data Point:** Record Review: 2 out of 2 non-government transport and disposal vendors assessments for the period November 2024 to October 2025 demonstrate Assessments reports for each non-government transport and disposal vendor with possible areas for improvement are established **Data Point:** Record Review: 6 out of 6 Hazardous waste inventory records for the period November 2024 to October 2025 demonstrate are accurate and maintained **Data Point:** Record Review: 6 out of 6 Inspection records of hazardous waste for the period November 2024 to October 2025 demonstrate are accurate and maintained for each hazardous waste and each point of storage of hazardous waste **Data Point:** Record Review: 6 out of 6 Copies of hazardous waste shipping papers for the period November 2024 to October 2025 demonstrate are Accurate and maintained **Data Point:** Record Review: 2 out of 2 non-government transport and disposal vendors certificates or licensed for the period November 2024 to October 2025 demonstrate are Current and maintained for all non-government transport and disposal vendors and approved by the local regulatory authorities **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct. All findings are confirmed

C3) SOLID WASTE	
Question #	VAP-C3.1
Question Text	Solid waste is managed and disposed of responsibly.
Rating	Conformance
Conclusion	Solid waste is managed and responsibly disposed of
Data points	**Data Point:** Site Observation: Engineering controls are adequate and effective; Waste is adequately and effectively categorized; Waste is adequately and effectively handled; Waste is adequately and effectively stored; Waste is adequately and effectively moved within a single facility and between multiple facilities; Waste access is controlled; Waste is adequately and effectively segregated; Waste is adequately and effectively ventilated; Waste has adequate and effective fire protection; Potential employee exposure methods are adequate and effective **Data Point:** Record Review: 12 out of 12 waste inventory records for the period November 2024 to October 2025 demonstrate are accurate and maintained **Data Point:** Record Review: 12 out of 12 Waste inspection records for the period November 2024 to October 2025 demonstrate are accurate and maintained for each waste and points of storage of waste with effective process and administrative controls **Data Point:** Record Review: 12 out of 12 Copies of waste shipping papers for the period November 2024 to October 2025 demonstrate are accurate and maintained **Data Point:** Record Review: 2 out of 2 non-government transport and disposal vendors certificates or licensed for the period November 2024 to October 2025 demonstrate are Current and maintained for all non-government transport and disposal vendors and approved by the local regulatory authorities **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

C4) AIR EMISSIONS	
Question #	VAP-C4.1
Question Text	Air emissions and the performance of air emission control systems are routinely monitored.
Rating	Conformance
Conclusion	Air emissions are routinely monitored, and air emission control systems are routinely monitored for performance

The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Validated Audit Report

Data points	**Data Point:** Site Observation: Engineering controls are adequate and effective; Air emission treatment equipment is identified, appropriate and well maintained; Air emission are treated prior to discharge in accordance with permit requirement; Ozone depleting substances are clearly labeled **Data Point:** Record Review: 12 out of 12 maintenance records for the period November 2024 to October 2025 demonstrate Accurate, maintained and air emission treatment equipment is good working order **Data Point:** Record Review: 12 out of 12 air treatment equipment evaluation records for the period November 2024 to October 2025 demonstrate Accurate, maintained and emission treatment equipment efficiency and integrity is as required and process and administrative controls are effective **Data Point:** Record Review: 12 out of 12 air treatment equipment inspection records for the period November 2024 to October 2025 demonstrate Accurate, maintained and emission treatment equipment efficiency and integrity is as required and process and administrative controls are effective **Data Point:** Record Review: List of air emissions and ODS, Record reference: Nil., Version Number: Nil., Issue date: November 01, 2025, Expiry date: Nil., States: Accurate, up to date list of air emissions and Ozone Depleting Substances is maintained **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-C4.2
Question Text	Environmental noise levels are within regulatory limits.
Rating	Conformance
Conclusion	Environmental noise levels are within regulatory limits
Data points	**Data Point:** Site Observation: Engineering controls are adequate and effective; No excessive boundary noise; Boundary noise control devices are well maintained, appropriate and identified **Data Point:** Record Review: 12 out of 12 maintenance records for the period November 2024 to October 2025 demonstrate accurate, maintained and boundary noise control devices are in good working order **Data Point:** Record Review: 12 out of 12 boundary noise control devices evaluation records for the period November 2024 to October 2025 demonstrate accurate, maintained and boundary noise control device efficiency and integrity is as required and process and administrative controls are effective **Data Point:** Record Review: 12 out of 12 boundary noise control device inspection records for the period November 2024 to October 2025 demonstrate Accurate, maintained and boundary noise control device efficiency and integrity is as required and process and administrative controls are effective **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
C5) WATER MANAGEMENT	
Question #	VAP-C5.1
Question Text	Adequate and effective process are in place to record, characterize, and monitor water sources, water discharge and control channels of contamination.
Rating	Conformance
Conclusion	Adequate and effective process are in place to record, characterize, and monitor water sources, water discharge and control channels of contamination

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	**Data Point:** Site Observation: Engineering controls are adequate and effective; Water channels are protected from contamination; Water channels appear free of contamination; The source of water is clear; Water withdrawal don't appear to heavily impact local waterbodies; Water discharge points don't appear to heavily impact local waterbodies; Equipment are compatible with the waste materials being stored; Equipment such as tanks, piping, and storage vessels are compatible with the waste materials being transported.; sanitary wastewater is treated in accordance with permit requirements.; Appropriate emergency response equipment and materials are in place to respond to a possible water channel contamination **Data Point:** Not Applicable, The facility does not generate industrial wastewater **Data Point:** No Waste water inspection records for the period November 2024 to October 2025 **Data Point:** No Copies of wastewater shipping papers for the period November 2024 to October 2025 **Data Point:** No non-government transport and disposal vendors certificates or licensed for the period November 2024 to October 2025 **Data Point:** Record Review: 12 out of 12 water contamination log for the period November 2024 to October 2025 demonstrate Accurate and maintained, potential contamination sources to water channels are identified, identified water channel contamination sources and description of spills/water channel contamination **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
C6) ENERGY CONSUMPTION AND GREENHOUSE GAS EMISSIONS	
Question #	VAP-C6.1
Question Text	Energy consumption and all scopes 1, 2, and significant categories of Scope 3 Greenhouse gas (GHG) emissions are tracked, documented, and publicly reported against an absolute corporate-wide GHG reduction goal.
Rating	Conformance
Conclusion	Energy consumption and all scopes 1, 2, and significant categories of Scope 3 Greenhouse gas (GHG) emissions are tracked, documented, and publicly reported against an absolute corporate-wide GHG reduction goal
Data points	**Data Point:** Site Observation: Engineering controls are adequate and effective; There is no significant energy consumption or GHG emissions at the facility that are not tracked and recorded **Data Point:** Record Review: 12 out of 12 energy use inventory records for the period November 2024 to October 2025 demonstrate The sources of electricity are maintained, documented, consumption recorded and accurate by source at the facility level, including the following factors on-site combustion, purchased electricity and renewable energy use **Data Point:** Record Review: 12 out of 12 energy use inventory records for the period November 2024 to October 2025 demonstrate The sources of energy other than electricity are maintained, documented, consumption recorded and accurate by source at the facility level, including the following factors oil, coal, diesel, natural gas, propane, garbage, steam, heating, and cooling and renewable energy use **Data Point:** Record Review: 2 out of 2 scope 1 GHG calculation records for each source for the period November 2024 to October 2025 demonstrate scope 1 GHG calculation records for each source are accurate **Data Point:** Record Review: 2 out of 2 information records for the period November 2024 to October 2025 demonstrate Significant categories of scope 3 GHG are determined through a materiality or similar process, documented and up to date at corporate level/facility level **Data Point:** Record Review: 2 out of 2 information records for the period November 2024 to October 2025 demonstrate Scope 3 GHG emissions are calculated, tracked and up-to-date at corporate level/facility level **Data Point:** Record Review: Annual public report, Record reference: Nil., Version Number: Nil., Issue date: May 01, 2025, Expiry date: Nil., States: annual public report stating the absolute corporate-wide reduction target and performance **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations
C.M.1) RISK ASSESSMENT	
Question #	VAP-C.M.1.1
Question Text	An adequate and effective environment compliance process is established to monitor, identify, understand and ensure compliance with applicable laws and regulations and customer requirements.
Rating	Conformance

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Conclusion	An adequate and effective environment compliance process to monitor, identify, understand and ensure compliance with applicable laws and regulations and customer requirements is established
Data points	**Data Point:** Record Review: Compliance Evaluation Management Procedures, Record reference: 810-4046, Version Number: 3.1, Issue date: May 13, 2024, Expiry date: Nil., States: Adequate and effective quarterly compliance review procedure including applicable legal requirements and applicable customer requirements; To identify, assess, integrate, implement and record; And to ensure timely renewal for the expiration of permits, licenses and testing reports **Data Point:** Record Review: Compliance calendar , Record reference: Nil., Version Number: Nil., Issue date: Nov 17, 2025 , Expiry date: Nil., States: Accurate, up to date compliance calendar including applicable legal requirements and applicable customer requirements; A reminder system **Data Point:** Record Review: Compliance register , Record reference: Nil., Version Number: Nil. , Issue date: November 17, 2025, Expiry date: Nil. , States: Accurate, up to date compliance register with summaries of applicable laws, regulations and key RBA code related customer requirements that impact the operations **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations
Question #	VAP-C.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential environmental risks where the facility caused or contributed to adverse environmental impacts for internal and external stakeholders (including applicable requirements).
Rating	Conformance
Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential environmental risks where the facility caused or contributed to adverse environmental impacts for internal and external stakeholders including applicable requirements.
Data points	**Data Point:** Record Review: Environmental Factors and Hazards Identification and Control Procedure , Record reference: 810-4043 , Version Number: 5, Issue date: May 10, 2022, Expiry date: Nil. , States: adequate and effective risk assessment process is in place to identify the most actual and potential environmental risks where the facility caused or contributed to adverse environmental impacts for internal and external stakeholders including applicable requirements covering at least every environmental medium, Greenhouse Gas impact and Ozone depleting substances impact ; The risk assessment is updated when there is a Significant Change; The scope of the risk assessment includes every environmental medium, every site operation/ process, every physical location, every Chemical or material used and all identified internal and external stakeholders, including at least direct and indirect workers, young workers, migrant workers,worker representatives, staff functions, on-site service providers, suppliers, customers and stakeholders immediately neighboring the site. **Data Point:** Record Review: 4 out of 4 risk assessments for the period November 2024 to October 2025 demonstrate Each identified risk include and assess legal and customer requirements and has an action to minimize such risk through the Hierarchy of Controls for the most significant risks; risk assessments are updated when there is a Significant Change **Data Point:** Record Review: Exerting Influence on Relevant Parties Control Procedure , Record reference: 810-4049, Version Number: 3, Issue date: May 05, 2023, Expiry date: Nil., States: an adequate and effective internal and external stakeholder identification process for environment **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations
C.M.2) CONTROL PROCESSES	
Question #	VAP-C.M.2.1
Question Text	Environment responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Rating	Conformance
Conclusion	Environment responsibilities and authorities are adequately and effectively defined and assigned for all employees/workers (senior managers to workers) for implementation of management systems, and for compliance with laws, regulations and codes
Data points	**Data Point:** Record Review: RBA Assignment letter, Record reference: RBA Assignment letter, Version Number: 5.2, Issue date: 23-Sep-25 , Expiry date: Nil. , States: A record assigns a senior representative the responsibility to ensure compliance with laws and regulations, compliance with the requirements of the RBA and is authorized to make decisions on programs, process actions and corrective actions; Responsibilities and authorities of each organizational level are documented in regular and emergency situations; A specific individual or individuals responsible for all aspects of hazardous waste, waste, air emission treatment, environmental noise, wastewater, energy and GHG and the elimination of ozone depleting substances **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

Validated Audit Report

Question #	VAP-C.M.2.2
Question Text	Adequate and effective environment policies and control processes are established.
Rating	Conformance
Conclusion	Adequate and effective environment policies and control processes are established
Data points	**Data Point:** Record Review: Environmental Operation Control Procedure, Record reference: 810-4045, Version Number: 3, Issue date: June 13, 2022, Expiry date: Nil. , States: adequate and effective environmental impact reduction policy and procedure to ensure the elimination of ozone depleting substance (ODS) reduction of energy and GHG, use of natural resources, raw materials and resulting waste **Data Point:** Record Review: Waste Management Procedure, Record reference: 810-4032, Version Number: 3, Issue date: March 09, 2023, Expiry date: Nil. , States: adequate and effective waste management reduction policy and procedure to manage the reception, storage, dispensing, disposal of each hazardous waste within the facility **Data Point:** Record Review: Green substance management and evaluation specification, Record reference: 820-4215, Version Number: 7.5, Issue date: 1/20/2025 , Expiry date: Nil. , States: adequate and effective ozone depleting substances management reduction policy and procedure to identify, label, eliminate and safe disposal of each ozone depleting substances **Data Point:** Record Review: Environmental Factors and Hazards Identification and Control Procedure, Record reference: 810-4043, Version Number: 5, Issue date: May 10, 2022, Expiry date: Nil. , States: adequate and effective control and reduction process for each envirnmental impact demonstrating the Hierarchy of Controls in a documented gated process that each hierarchy level has been fully evaluated, reasons why it could not address the risk fully before proceeding to the next hierarchy level **Data Point:** Record Review: Equipment Safety Management Procedure, Record reference: 810-9009, Version Number: 1.1, Issue date: April 24, 2025, Expiry date: Nil. , States: adequate and effective preventive maintenance process for all treatment equipment for each environmental medium. **Data Point:** Record Review: Emergency response policy , Record reference: 820-9026, Version Number: 2, Issue date: Mar 20, 2019 , Expiry date: Nil. , States: adequate and effective emergency response process with clearly defined steps and roles/ responsibilities **Data Point:** Record Review: Investigation process, Record reference: 810-4073, Version Number: 2, Issue date: March 15, 2022, Expiry date: Nil. , States: adequate and effective investigation process of each environmental incident resulting in a preventive and corrective action plan. **Data Point:** Record Review: 12 out of 12 environmental records for the period November 2024 to October 2025 demonstrate appropriate retention on-site and off-site with appropriate levels of access to ensure privacy and conforming to legal and customer requirements **Data Point:** Record Review: 12 out of 12 controls effectiveness evaluation for the period November 2024 to October 2025 demonstrate controls effectiveness evaluation is done on a regular basis **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

Question #	VAP-C.M.2.3
Question Text	An adequate and effective environment training process is established for all managers/workers on all policy/process/job related aspects and performance targets.
Rating	Conformance
Conclusion	An adequate and effective environment training process is established for all managers/workers on all policy/process/job related aspects and performance targets

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	**Data Point:** Record Review: Education and Training Management Specification, Record reference: 820-9030 , Version Number: 5, Issue date: Aug 19, 2025 , Expiry date: Nil., States: adequate and effective training process for workers, managers and new employee orientation plan. Training is provided to all workers prior to the beginning of work and workers responsible for storage, clean up or disposal of hazardous waste and waste receive specialized training **Data Point:** Record Review: Training needs analysis, Record reference: Nil. , Version Number: Nil. , Issue date: December 31, 2024, Expiry date: Nil. , States: Training Needs Analysis covers minimum training topics and workers responsible for storage, clean up or disposal of hazardous waste and waste receive specialized training. **Data Point:** Record Review: Training plan, Record reference: Nil. , Version Number: Nil. , Issue date: December 31, 2024, Expiry date: Nil. , States: adequate training plan covers all topics identified in the training needs analysis with an adequate training frequency. Training is provided to all workers prior to the beginning of work **Data Point:** Record Review: 4 out of 4 environmental training materials for the period November 2024 to October 2025 demonstrate each training on the training plan have adequate training materials **Data Point:** Record Review: 4 out of 4 environmental training records for the period November 2024 to October 2025 demonstrate Each training on the training plan have adequate training records for all attendees **Data Point:** Record Review: 6 out of 6 environmental training efficiency verifications for the period November 2024 to October 2025 demonstrate Each training on the training plan have adequate training verification records for all attendees **Data Point:** No learner personnel files for the period November 2024 to October 2025 **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
C.M.3) COMMUNICATIONS	
Question #	VAP-C.M.3.1
Question Text	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational environmental practices and conditions and to foster continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational environmental practices and conditions and to foster continuous improvement

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	**Data Point:** Site Observation: feedback channels are clearly communicated and visible.; environmental communication clearly posted in the facility in a location identifiable and accessible by workers.; clear Hazard signage.; clear hazard information is available at the point of use. **Data Point:** Record Review: Consultation and Communication Management Procedure, Record reference: 810-4070, Version Number: 2.1, Issue date: May 10, 2023, Expiry date: Nil., States: adequate and effective communication and reporting process to suppliers, customers, workers and managers including seeking input and feedback from workers and public reporting on GHG footprint **Data Point:** Record Review: 5 out of 5 Communication and reporting process demonstrate requirements of code implementation **Data Point:** Record Review: 5 out of 5 contracts with suppliers demonstrate contract terms and conditions requiring Suppliers to conform to the RBA code **Data Point:** Record Review: 5 out of 5 Correspondence to customers management for the period November 2024 to October 2025 demonstrate Environment practices and performance **Data Point:** Record Review: 5 out of 5 Correspondence to workers and managers for the period November 2024 to October 2025 demonstrate all minimum communication topics are covered and written information to workers on how to provide input and feedback for improvement; all hazards present at the site and action promoting of a safe workplace are communicated **Data Point:** Record Review: Annual public report, Record reference: Nil., Version Number: Nil., Issue date: May 01, 2025, Expiry date: Nil., States: annual public report with absolute corporate-wide reduction target and performance on scope 1,2 and 3 GHG **Data Point:** Record Review: 5 out of 5 Communications effectiveness records for the period November 2024 to October 2025 demonstrate Effectiveness verification is done regularly **Data Point:** Record Review: 5 out of 5 Input and feedback records for the period November 2024 to October 2025 demonstrate input and feedback from workers is adequately received **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
Question #	VAP-C.M.3.2
Question Text	An adequate and effective process is established to anonymously report environmental grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance
Conclusion	An adequate and effective process is established to anonymously report environmental grievances confidentially without fear of reprisal or intimidation
Data points	**Data Point:** Site Observation: grievance channels are clearly communicated; internal communication of the grievance mechanism must be in workers' native language(s) and visible **Data Point:** Record Review: Internal and external complaint and report handling procedures, Record reference: 820-5016, Version Number: 3, Issue date: October 12, 2025, Expiry date: Nil., States: adequate and effective grievance process for internal and external stakeholders to anonymously report grievances without fear of reprisal through clear grievance channels so reporting is encouraged and comfortable and workers scan raise environmental concerns **Data Point:** Record Review: 10 out of 10 Grievance records for the period November 2024 to October 2025 demonstrate grievances from stakeholders are adequately received **Data Point:** Record Review: 12 out of 12 environmental concern logs for the period November 2024 to October 2025 demonstrate environmental concerns from stakeholders is adequately received **Data Point:** Record Review: 12 out of 12 Investigation records for the period November 2024 to October 2025 demonstrate the validity of any grievance is promptly investigated and each valid grievance has an action plan **Data Point:** Record Review: 12 out of 12 Correspondence to workers and managers and external stakeholders for the period November 2024 to October 2025 demonstrate written information on how to report a grievance **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.

E) SUPPLY CHAIN MANAGEMENT	
E1) COMPANY COMMITMENT	
Question #	VAP-E1.1
Question Text	An adequate and effective Code of Conduct is established and endorsed by executive management covering all elements of the RBA code.
Rating	Conformance
Conclusion	An adequate and effective Code of Conduct is established and endorsed by executive management covering all elements of the RBA code
Data points	**Data Point:** Site Observation: A Code of Conduct in a language understood by each worker is accessible to all workers **Data Point:** Record Review: Facility CSR Code of Conduct, Record reference: 810-9005-02, Version Number: V4, Issue date: May 05, 2025, Expiry date: NA, States: A code of Conduct covering all elements of the RBA code endorsed by the highest-level manager at the facility; A code of Conduct covering all elements of the RBA code endorsed by the highest-level manager at the corporate level; The code has a commitment to due diligence; The code has a commitment to access to remedy for internal and external stakeholders where the participant caused or contributed to adverse human rights or environmental impacts; The code has a commitment to continuous improvement; The code is appropriate for the nature and scope of the facility's operations.; The code of Conduct is made public; The code of Conduct is communicated to workers via accessible channels in a language the workers understand **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations **Data Point:** Worker Interview 54 out of 54 workers interview reveal audit observations are correct.
E2) MATERIALS RESTRICTIONS	
Question #	VAP-E2.1
Question Text	An adequate and effective program is in place for Materials Restrictions as a formal part of the procurement and manufacturing processes.

Validated Audit Report

Rating	Conformance
Conclusion	Adequate and effective program is in place for Materials Restrictions as a formal part of the procurement and manufacturing processes
Data points	**Data Point:** Record Review: Product Procurement Requirement Policy, Record reference: 810-3001, Version Number: V13, Issue date: June 11, 2025, Expiry date: NA, States: An adequate and effective program to ensure chemical composition of materials, of packaging, of components and of products are conform with customer requirements and are conform with legal requirements **Data Point:** Record Review: Supplier Management Procedure, Record reference: 810-9005, Version Number: V4, Issue date: October 19, 2025, Expiry date: NA, States: Corporate Materials Restrictions procedure that is adequate and effective to ensure chemical composition of materials, of packaging, of components and of products are conform with customer requirements and are conform with legal requirements comparing customer requirements to own specifications **Data Point:** Record Review: Conflict minerals assignment letter, Record reference: 810-9005, Version Number: V1.3, Issue date: August 26, 2025, Expiry date: NA, States: Corporate Restricted Materials current and documented assignment letter assigning responsibility to a corporate staff member **Data Point:** Record Review: Restricted materials control & management procedure, Record reference: 820-4215, Version Number: V7.5, Issue date: January 22, 2025, Expiry date: NA, States: Corporate implementation proof of assessment of the process to verify conformance, analytical data from material/parts Suppliers, statements and/or certificates of conformance and chemical composition of product **Data Point:** Record Review: Restricted materials control & management procedure, Record reference: 820-4215, Version Number: V7.5, Issue date: January 22, 2025, Expiry date: NA, States: Facility Materials Restrictions procedure that is adequate and effective to ensure chemical composition of materials, of packaging, of components and of products are conform with customer requirements and are conform with legal requirements comparing customer requirements to own specifications; Requirements for conformance with the Material Restrictions required to its material or parts Suppliers are documented; Regular assessments of the process to verify conformance are performed; Corrective actions are tracked for non-compliant materials or components and are implemented, additional actions are taken to ensure completion at due date if corrective actions are not on track.; Analytical data from materials or parts is requested from suppliers; Accurate specifications from suppliers are available; Chemical composition of products is available and accurate; Accurate certificates of conformance are provided to customers upon request **Data Point:** Record Review: Restricted materials control list, Record reference: 820-6253, Version Number: V5, Issue date: May 22, 2025, Expiry date: NA, States: An adequate restricted materials requirements list to ensure chemical composition of materials, of packaging, of components and of products are conform with customer requirements and are conform with legal requirements comparing customer requirements to own specifications **Data Point:** Record Review: 3 out of 3 Action plans for the period November 2023 to October 2025 demonstrate Restricted material restrictions met and an action plan for each element which is off-track is in place and implemented **Data Point:** Record Review: 3 out of 3 Analytical data from suppliers for the period November 2023 to October 2025 demonstrate is available, adequate, current and conform with material restriction requirements **Data Point:** Record Review: 3 out of 3 Product Chemical compositions for the period November 2023 to October 2025 demonstrate is available, adequate, current and conform with material restriction requirements **Data Point:** Record Review: 5 out of 5 Certificates of conformance provided to customers for the period November 2023 to October 2025 demonstrate is available, adequate, current and conform with material restriction requirements **Data Point:** Record Review: 5 out of 5 Specifications from Suppliers for the period November 2023 to October 2025 demonstrate is available, adequate, current and conform with material restriction requirements **Data Point:** Record Review: 5 out of 5 Monitoring & reporting records for the period November 2023 to October 2025 demonstrate is available, adequate, current and conform with material restriction requirements **Data Point:** Management Interview Not disclosed; Title: EHS Manager confirms audit observations

E3) RESPONSIBLE SOURCING OF MINERALS	
Question #	VAP-E3.1
Question Text	An adequate and effective Conflict Minerals Supply Chain Policy and Management System is designed and implemented to reasonably assure that the tantalum, tin, tungsten, gold, and Cobalt (3TG+C) in the products they manufacture are sourced in a way consistent with the OECD Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD Due Diligence Guidance) or an equivalent and recognized due diligence framework.
Rating	Conformance
