Validated Audit Report

Data points	* Site observation: a) Workers can demonstrate where personal records are kept securely. b) Workers maintain possession or control over their identification record. * Record review: 20 out of 20 personnel files demonstrate: a) No originals of workers' personal documentation are kept. b) No foreign migrant workers and no internal migrant workers. * Record review: 20 out of 20 personal documents show: a) Original documents are not to be tampered with or damaged in any way. * Record review: No foreign migrant workers and no internal migrant workers in the facility. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers (no foreign migrant workers and no internal migrant workers) confirm the audit observations. * Supporting evidence reference(s): N/A
A2) YOUNG WORKERS	
Question #	VAP-A2.1
Question Text	Workers are not below the minimum age
Rating	Conformance
Conclusion	Workers are not below the minimum age. The youngest worker is 23 years old.
Data points	* Site observation: No identification of workers on-site under minimum age. * Record review: 20 out of 20 personnel files reveal: a) All workers are above the minimum age and above the company policy minimum age. The youngest worker is 23 years old. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A2.2
Question Text	Workers under the age of 18 are not allowed to perform work that is likely to jeopardize the health or safety of these young workers, including night work or overtime.
Rating	Not Applicable
Conclusion	
Data points	
Question #	VAP-A2.3
Question Text	Apprentice/Intern/Student Worker employment conforms with learning objectives.
Rating	Not Applicable
Conclusion	
Data points	
A3) WORKING HOURS	
Question #	VAP-A3.1
Question Text	Hours worked in a workweek does not exceed 60 hours.
Rating	Conformance
Conclusion	Hours worked in a workweek over the last 12 months does not exceed 60 hours and monthly overtime hours do not exceed local law of 46 hours/month. The months of November 2023 (random month, no peak or low month in the facility), March 2024 (random month) and May 2024 (random month) are reviewed. The highest weekly working hours are 50 h/workweek. All workers meet local law regarding maximum 46 hours monthly overtime. a) The same working hour trend is found by production area, by nationality and job function. b) No young workers in the facility.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY

Validated Audit Report

Data points	* Record review: 20 out of 20 working hour records covering each month of the period of November 2023 (random month, no peak or low month in the facility), March 2024 (random month) and May 2024 (random month) demonstrate hours worked in a workweek over the last 12 months do not exceed 60 hours and monthly overtime hours do not exceed local law of 46 hours/ month. The highest weekly working hours 50 h/workweek. a) The same working hour trend is found by production area, by nationality and job function. b) No young workers in the facility. * Record review: 12 out of 12 production records covering the period November 2023 (random month, no peak or low month in the facility), March 2024 (random month) and May 2024 (random month) confirm time recording device works accurately and are preventatively maintained. * Record review: No working hour waiver is available. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): Working Hours Collection Sheet
Question #	VAP-A3.2
Question Text	Workers receive at least one (1) day off every seven (7) days
Rating	Conformance
Conclusion	Workers receive at least one day off every seven days. The months of November 2023 (random month, no peak or low month in the facility), March 2024 (random month) and May 2024 (random month) are reviewed. The longest consecutive working days are 5 days worked. The same consecutive days worked trend is found by production area, by nationality and job function. No young workers in the facility.
Data points	* Record review: 20 out of 20 working hour records covering each month of the period of November 2023 (random month), March 2024 (random month) and May 2024 (random month) demonstrate Workers receive at least one day off every seven days. The longest consecutive working days are 5 days worked. The same consecutive days worked trend is found by production area, by nationality and job function. No young workers in the facility. * Record review: 12 out of 12 production records covering the period of November 2023 (random month, no peak or low month in the facility), March 2024 (random month) and May 2024 (random month) confirm time recording device work accurately and are preventatively maintained. * Record review: 10 out of 10 leave records covering the period November 2023 (random month, no peak or low month in the facility), March 2024 (random month) and May 2024 (random month) confirm data found in A3.1 and A3.2. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): Working Hours Collection Sheet
Question #	VAP-A3.3
Question Text	Workers are allowed mandated breaks, holidays and vacation days, including time off when ill or for maternity leave
Rating	Conformance
Conclusion	Workers are allowed mandated breaks, holidays and vacation days, including time off when ill or for paternity/maternity leave.
Data points	* Site observation: Workers take mandatory breaks, which include at least one meal break per shift. * Record review: 10 out of 10 leave records covering the period October 2023 to September 2024 demonstrate: a) Actual leaves and holidays are recorded, securely kept and are accurate. b) Leave records are consistent with the medical certificates. * Record review: 10 out of 10 medical certificates covering the period October 2023 to September 2024 demonstrate consistency with the leave records for this period. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
A4) WAGES AND BENEFITS	
Question #	VAP-A4.1
Question Text	Wages for regular and overtime hours are meeting "equal pay for equal work and qualification", correctly calculated, and paid timely to all workers.
Rating	Conformance
Conclusion	Wages for regular and overtime hours are meeting “equal pay for equal work and qualification”, correctly calculated, and paid timely to all workers.

Validated Audit Report

Data points	* Record review: 20 out of 20 payroll records covering each month of the period October 2023 to September 2024 demonstrate: a) “equal pay for equal work and qualification” applies. b) “Pay equals time worked” applies; this means any company-required activity. c) All workers have paid no less than the agreed* wage for all regular hours. d) Overtime and other compensation and benefits are paid and are on top of the agreed wage for regular hours. e) Payment made to leavers (resigned workers) is in compliance and not later than one month after the final day on the job Is acceptable as per local law. f) Wages, benefits, and overtime are correctly calculated and accurate pay records are maintained. g) Wages are paid directly to workers with no unauthorized deductions (including for disciplinary measures) in a timely manner. h) Recurring pay (including overtime and other) is not delayed more than two days after the agreed timing for payment. i) maternity or sick leave absences do not incur a financial penalty. j) Wage records are accurate. k) No deductions or payment for PPE. l) No learners are present. * Record review: 20 out of 20 personnel records demonstrate wages and compensation reflect “equal pay for equal work and qualification”. * Record review: 20 out of 20 working hour records covering each month of the period October 2023 to September 2024 demonstrate wages, benefits, and overtime are correctly calculated. * Record review: 10 out of 10 leave records covering the period October 2023 to September 2024 confirm payments are correctly calculated. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 confirm payments are correctly calculated. * Record review: 20 out of 20 payroll slips covering each month of the period October 2023 to September 2024 demonstrate: Payroll Evidence confirms all worker payments are correctly calculated. * Record review: 12 out of 12 payroll payment records covering the period October 2023 to September 2024 confirm a) all worker payments are correctly calculated. b) All workers are paid directly without any intermediary (except a bank). c) All resigned workers are paid timely. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A4.2
Question Text	For each pay period, workers are provided with understandable wage statements that include sufficient information to verify accurately work performed.
Rating	Conformance
Conclusion	For each pay period, workers are provided with understandable wage statements that include sufficient information to verify accurately work performed.
Data points	* Record review: 20 out of 20 payroll slips covering each month of the period October 2023 to September 2024 demonstrate: a) Workers are provided with payroll slips that clearly indicate compensation (before payment), including: a.a) Regular hours. a.b) Overtime hours. a.c) Overtime compensation levels. a.d) No disciplinary deductions. a.e) Details of the deductions. a.e.a) Insurance contributions. a.e.b) Employer. a.e.c) Worker contributions. b) Pay slip records are accurate. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A4.3
Question Text	Deductions or withholdings are calculated correctly and submitted to the appropriate government agency within the local law time frame.
Rating	Conformance
Conclusion	Deductions or withholdings are calculated correctly and submitted to the appropriate government agency within the local law time frame.
Data points	* Record review: 20 out of 20 payroll records covering each month of the period October 2023 to September 2024 demonstrate: a) Calculations: employer contributions to worker insurance schemes (retirement/pension, health/medical) are available on a monthly basis that: b) Allows for analysis by individual worker. c) Total per contribution type. * Record review: 12 out of 12 contribution payment records covering the period October 2023 to September 2024 demonstrate payment records for these contributions are available and payments are made timely. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
A5) NON-DISCRIMINATION / NON-HARASSMENT / HUMANE TREATMENT	
Question #	VAP-A5.1
Question Text	No evidence of discrimination, harassment, inhumane treatment, or threat of these exists.
Rating	Conformance

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Validated Audit Report

Conclusion	No evidence of discrimination, harassment, inhumane treatment, or threat of these exists.
Data points	* Site observation: No identification of possible instances of discrimination, harassment/inhumane treatment, or threat of. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate no identification of possible instances of inhumane measures. * Record review: 20 out of 20 payroll records covering each month of the period October 2023 to September 2024 confirm a) No evidence of discrimination, harassment/inhumane treatment in: a.a) Compensation. a.b) Benefits. b) No evidence of discrimination for worker representation. * Record review: 20 out of 20 training records covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment in accessing training. c) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 disciplinary records covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 application records covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 testing records covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 promotion records covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 job postings covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 job descriptions covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. b) No evidence of discrimination, harassment/inhumane treatment for worker representation. * Record review: 5 out of 5 medical records covering the period October 2023 to September 2024 confirm: a) No evidence of discrimination, harassment/inhumane treatment. a.a) Workers or potential workers are not subjected to medical tests that could be used in a discriminatory way. a.b) Health tests, pregnancy or virginity testing, or contraception are not used as a condition of employment. a.c) All conditions regarding virginity, pregnancy and post-natal employment protections, benefits, and pay are met. * Record review: 20 out of 20 personnel records confirm accommodations provided to workers is solely based on non-discriminatory criteria. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A5.2
Question Text	Disciplinary actions are recorded and reviewed by management.
Rating	Conformance
Conclusion	Disciplinary actions are recorded and reviewed by management.
Data points	* Record review: 5 out of 5 disciplinary records covering the period October 2023 to September 2024 demonstrate: a) Records of all cases of disciplinary action are available b) All records of disciplinary action against workers are reviewed by management and verifiably communicated to them c) Disciplinary records show disciplinary actions with signature of worker. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A5.3
Question Text	Reasonable accommodation for religious practices is provided.
Rating	Conformance
Conclusion	Reasonable accommodation for religious practices is provided.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Data points	* Site observation: Adequate religious areas are provided. * Record review: 4 out of 4 religious accommodation requests covering the period October 2023 to September 2024 demonstrate: a) Requests are kept. b) Requests are reviewed. c) Request decisions are available. c.a) Reason for the decision of accommodation is provided. * Record review: 4 out of 4 religious accommodation decision communications covering the period October 2023 to September 2024 demonstrate communication on requests reason for the decision of accommodation is provided to the requestor in a timely manner. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A5.4
Question Text	Reasonable accommodation for disability is provided.
Rating	Conformance
Conclusion	Reasonable accommodation for disability is provided.
Data points	* Site observation: Adequate accommodation for disability are provided. * Record review: 2 out of 2 accommodations for disability requests covering the period October 2023 to September 2024 demonstrate: a) Requests are kept. b) Requests are reviewed. c) Request decisions are available. c.a) Reason for the decision of accommodation is provided. * Record review: 2 out of 2 accommodations for disability decision communications covering the period October 2023 to September 2024 demonstrate communication on requests reason for the decision of accommodation is provided to the requestor in a timely manner. * Record review: 2 out of 2 disability accommodation records for all identified disabilities covering the period October 2023 to September 2024: a) Are kept. b) Are up-to-date. c) Are accurate. * Record review: 2 out of 2 disability assessment reports for all identified disabilities covering the period October 2023 to September 2024: a) Are kept. b) Are up-to-date. c) Are accurate. * Record review: 2 out of 2 disability effectiveness evaluations for all identified disabilities covering the period October 2023 to September 2024: a) Are kept. b) Are up-to-date. c) Are accurate. * Record review: 2 out of 2 corrective action plans for all identified disabilities for any disability accommodation deemed ineffective for all identified disabilities covering the period October 2023 to September 2024: a) Are kept. b) Are up-to-date. c) Are accurate. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
A6) FREEDOM OF ASSOCIATION AND COLLECTIVE BARGAINING	
Question #	VAP-A6.1
Question Text	Workers can form or enroll in a trade union of their own free will.
Rating	Conformance
Conclusion	Workers can form or enroll in a trade union of their own free will.
Data points	* Site observation: a) No evident presence of violence and explicit threats of any kind. b) No evident presence of management's control of worker representation exists. c) No evident presence of a prohibition of association with a worker representation. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate: a) There are no recorded episodes of violence, explicit threats of any kind or any other violations of the right to freedom of association. b) Grievance records on Freedom of Association are acted upon if the grievance is valid. * Record review: No external media records are available because there are no episodes of violence, explicit threats of any kind or any other violations of the right to freedom of association at the auditee. * Record review: 4 out of 4 worker representative body meeting minutes covering the period October 2023 to September 2024 demonstrate: a) the source of funding and materials. a.a) Management contributions are limited to providing meeting space and meeting materials. * Record review: 20 out of 20 payroll records covering each month of the period October 2023 to September 2024 confirm no difference in payment for worker representatives with other workers in similar job functions. * Record review: 20 out of 20 communication records covering the period October 2023 to September 2024 do not show Freedom of association restrictions and Freedom of Association communications are not prohibited. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers (including 1 worker representative) confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A6.2

Validated Audit Report

Question Text	The legal rights of all workers to bargain collectively, or refrain from doing so, are respected.
Rating	Conformance
Conclusion	Legal rights of all workers to bargain collectively, or refrain from doing so, are respected.
Data points	* Site observation: No evidence of refusal by management to enter negotiations upon request by the worker representatives. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate: a) No evidence of refusal by management to enter negotiations upon request by the worker representatives. b) Site participates in good faith in the collective bargaining process with the official worker representatives. * Record review: 4 out of 4 worker representative body meeting minutes covering the period October 2023 to September 2024 demonstrate: a) No evidence of refusal by management to enter negotiations upon request by the worker representatives. b) There is no Collective Bargaining Process in this facility. c) No Collective Bargaining Agreement. d) Dialogue with worker representatives is held if there is a difference between any accommodation granted. * Record review: No CBA is available. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers (including 1 worker representative) confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A6.3
Question Text	Participants respect the legal right of all workers to peacefully assemble.
Rating	Conformance
Conclusion	Participants respect the legal right of all workers to peacefully assemble.
Data points	* Site observation: No signs of explicit prohibition of the right of peaceful assembly. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate a) Respect for the right of workers to individually or collectively; to express, promote, pursue, and defend their concerns or ideas. b) Does not interfere with, restrain, or coerce workers in the exercise of their right to individually or collectively; to express, promote, pursue, and defend their concerns or ideas. * Record review: 4 out of 4 worker representative body meeting minutes covering the period October 2023 to September 2024 demonstrate: a) Respect for the right of workers to individually or collectively; to express, promote, pursue, and defend their concerns or ideas. b) Does not interfere with, restrain, or coerce workers in the exercise of their right to individually or collectively; to express, promote, pursue, and defend their concerns or ideas. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers (including 1 worker representative) confirm the audit observations. * Supporting evidence reference(s): N/A
A.M.1) RISK ASSESSMENT	
Question #	VAP-A.M.1.1
Question Text	An adequate and effective labor compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Rating	Conformance
Conclusion	An adequate and effective labor compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Data points	* Record review: Laws and Regulation Requirement Management Procedure (Document No.: B0000-3401, Rev. C, Issued date: 10 September 2018) states: a) compliance procedure. a.a) Adequate. a.b) Effective. a.c) Quarterly review. a.d) Including applicable legal requirements. a.e) Including applicable customer requirements to a.f.a) Identify. a.f.b) Assess. a.f.c) Integrate. a.f.d) Implement. a.f.e) Records. b) To ensure timely renewal for the expiration of: b.a) Permits. b.b) Licenses. b.c) Testing reports. * Record review: Labor compliance calendar (Doc. No: NA, Rev. NA, Issue date: 30 August 2024) confirms the compliance calendar: a) Is accurate. b) Is up to date. c) Includes applicable legal requirements. d) Includes applicable customer requirements. e) Has a reminder system. * Record review: Labor compliance register (Doc. No: NA, Rev. NA, Issue date: 23 February 2024) confirms the compliance register: a) Is accurate. b) Is up to date. c) Has summaries of applicable laws and regulations. d) Contains reviews of the key customer requirements that impact the operations as these related to the RBA code. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential labor risks where the facility caused or contributed to adverse labor impacts (including applicable requirements).

Validated Audit Report

Rating	Conformance
Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential labor risks where the facility caused or contributed to adverse labor impacts (including applicable requirements).
Data points	* Record review: Stakeholder identification procedure (Document No: Nil, Rev. Nil, Issue date: 4 January 2024) states the process which is a) Adequate. b) Effective for c) internal stakeholders. d) external stakeholders for labor. * Record review: Internal and external stakeholder list for labor (Doc. No: NA, Rev. NA, Issue date: 4 January 2024) which includes all identified internal and external stakeholders including at a minimum: a) Direct and indirect workers. b) No young workers in the facility. c) No foreign migrant workers. No internal migrant workers. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. * Record review: Labor and Ethics Risk Assessment Procedure (Document No.: B9930-1306, Rev. A, issued date: 09 September 2020) states: a) risk assessment procedure that a.a) Uses the hierarchy of controls or equivalent. a.b) identifies the most significant actual and potential labor risks where the facility caused or contributed to adverse labor impacts. a.b.a) including applicable legal requirements. a.b.b) including applicable customer requirements. a.c) Is updated when there is a Significant Change. a.d) Has a scope that includes: a.d.a) Every site operation/process. a.d.b) All physical locations. a.d.c) All identified internal and external stakeholders. a.d.c a) Direct and indirect workers. a.d.c b) No young workers in the facility. a.d.c c) No foreign migrant workers. No internal migrant worker. a.d.c d) Worker representatives. a.d.c e) Staff functions. a.d.c f) On-site service providers. a.d.c g) Suppliers. a.d.c h) Customers. a.d.c i) Stakeholders immediately neighboring the auditee. * Record review: 2 out of 2 labor risk assessments covering each month of the period October 2023 to September 2024 a) include legal and customer requirements. b) assess legal and customer requirements. c) identify how legal and customer requirements are integrated in the current management system. d) document how legal and customer requirements are implemented. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
A.M.2) CONTROL PROCESSES	
Question #	VAP-A.M.2.1
Question Text	Labor responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Rating	Conformance
Conclusion	Labor responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, Issued date: 28 June 2024) confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) To ensure compliance with the requirements of the RBA. c) Is authorized to implement: c.a) Programs. c.b) Process actions. c.c) Corrective actions as needed. * Record review: Organizational chart and description (Doc. No: NA, Rev. NA, Issue date: 28 June 2024) confirms: a) Responsibilities of each organizational level are recorded. b) Authorities of each organizational level are recorded. c) For regular and emergency situations. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A.M.2.2
Question Text	Adequate and effective labor policies and control processes are established.
Rating	Conformance
Conclusion	Adequate and effective labor policies and control processes are established.

Validated Audit Report

Data points	* Site observation: a) Control measures are in place for identified risks. b) Records are securely stored with authorized access only. c) Time Recording Devices are present, and all are in working order. * Record review: Appointment Procedure (Document No.: B9920-1306, Rev. N, Issued date: 4 July 2023) a) Is adequate. b) Is effective. c) States no form, including but not limited to bonded (including debt bondage) or indentured labor, involuntary or exploitative prison labor, slavery, or trafficking of persons is permitted. d) States workers are required to pay the pre-employment medical examination fee as part of the employment. e) States no government-issued identification or originals of personal records are held or stored. e.a) Defines the process for safe keeping of only those personal records required by law. f) Confirms freedom of movement. * Record review: Leave Procedure (Document No.: B9920-1309, Rev. G, issued date: 4 July 2023) a) Is adequate. b) Is effective. c) Confirms child labor prohibition. d) States not to refuse the worker's job application after the “child” worker's age meets legal requirements. e) Confirms if child labor is identified, assistance/remediation is provided. * Record review: Employee Appointment Policy (Doc. No.: Nil, Rev. Nil, issued date: 2 January 2023) a) Is adequate. b) Is effective. c) Includes young workers. d) Includes pregnant workers. e) Includes nursing mothers. f) Includes health checks for vulnerable workers. g) Defines identification of young workers. h) Mandates assignment of young workers to non-hazardous positions. i) Restricts time of day worked by young workers. * Record review: Learner policy is not needed as there are no learners in the facility. * Record review: Shift Rotation Employees Leave Regulation (Document No.: J-5, Rev. L, issued date: 18 May 2018) a) Is adequate. b) Defines hours worked with a maximum equal to law or code. c) Defines days off with a maximum equal to law or code. d) Defines sick leave. e) Defines holidays. f) Defines vacation. g) Defines paternity/maternity leave. h) Defines mandated meal breaks. i) Defines rest breaks. j) Defines other leave periods. * Record review: Wage Operation Procedure (Document No.: B9920-1322, Rev. E, issued date: 18 July 2018) a) Is adequate. b) Is effective. c) Mandates “Equal pay for equal work and qualification”. d) Mandates “Pay equals time worked”. d.a) for any company-required activity. e) States all workers are paid no less than the agreed wage for all regular hours. f) States overtime is paid and is on top of wages for rgular hours. g) Defines other compensation that is paid and is on top of wages for regular hours. h) Defines benefits are paid and are on top of wages for regular hours. i) Details payment to leavers. * Record review: Reward and Punishment Procedure (Document No.: B9920-1302, Rev. D, issued date: 14 July 2015) a) Is adequate. b) Is effective. c) Prohibits disciplinary wage deductions. d) includes “Pay equals time worked”. * Record review: Internal Appealing Procedure (Document No.: 9920-1611, Rev. G, issued date: 26 October 2018) a) Is adequate. b) Is effective. c) Mandates decisions are based solely on the candidate's ability to perform the job's requirements. c.a) in hiring. c.b) compensation. c.c) promotion. c.d) access to training. c.e) other. c.f) terminating. * Record review: Office Change (Relocation) Application Procedure (Document No.: B9920-3408, Rev. D, issued date: 16 February 2024) a) Is adequate. b) Is effective. c) States reasonably accommodate religious practices to allow a worker to comply with their religious beliefs. d) Enables adjustments to the work environment to allow a worker to comply with their religious beliefs. e) while at work or job application. * Record review: Reasonable accommodation for disability policy in RBA Code of Conduct Management Procedure (Doc. No: NA, Rev. NA, Issue date: 28 June 2024) a) Is adequate. b) Is effective. c) States reasonably accommodate for disability practices to allow a disabled worker to meet their needs. d) Enables adjustments to the work environment to allow a disabled worker to meet their needs. e) while at work or job application. f) comply with local disability laws. * Record review: Labor Rights Notice (Doc. No: Nil, Rev. Nil, Issue date: 12 August 2024) a) Is adequate. b) Is effective. c) Mandates respect for the right of workers to form or enroll in a worker representation group or to refrain from doing so. d) Will not interfere with and will not finance worker representation. * Record review: Collective bargaining policy in RBA Code of Conduct Management Procedure (Doc. No: NA, Rev. NA, Issue date: 28 June 2024) a) Is adequate. b) Is effective. c) Mandates the recognition of the right of workers to bargain collectively or refrain from doing so. * Record review: Working Rule (Document No.: B9910-1301, Rev. F, issued date: 18 March 2021) a) Is adequate. b) Is effective. c) Mandates the recognition of the right of workers; individually or collectively; to express, promote, pursue, and defend their concerns or ideas; or to refrain from doing so. * Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, Issued date: 28 June 2024) confirms each of the policy requirements has an effective implementation (control/implementation) process. a) Freely chosen employment: a.a) Determine the specific amount of any fees and expenses paid by each individual foreign migrant, internal migrant and local worker prior to commencement of work. b) Child labor: b.a) verify the reliability of age records and must include visual verification of a government-recognized photographic identification record. b.b) reliable ID verification system to control the workers' access to the facility. b.c) Child labor assistance/remediation process that is designed to provide for the welfare of the child. c) Young workers: c.a) Health checks. c.b) Restriction on hours worked and time of day worked. c.c) Identification and assignment of young workers to non-hazardous positions. c.d) Young workers are not allowed night work or overtime. d) Hours worked / days off: d.a) Accurately determined. d.b) Record. d.c) Manage. d.d) Control working hours including overtime and days off. e) Risk assessment: e.a) Any identified risk has an action plan to minimize such risk. e.b) Procedural controls are recorded. e.c) Where controls are not yet in place an implementation plan (with owners and due date) is in place and on track. * Record review: 3 out of 3 Service providers contracts covering each month of the period October 2023 to September 2024 a) executed contracts for each Service provider contract are in place. b) include agreement requirements to ensure conformance with the policies and process. * Record review: 20 out of 20 labor records covering each month of the period October 2023 to September 2024 confirm: a) Appropriate retention on-site. b) Appropriate retention off-site. c) Appropriate levels of access to ensure privacy. d) Conforming to legal requirements. e) Conforming to customer requirements. * Record review: 20 out of 20 labor control effectiveness evaluations covering each month of the period October 2023 to September 2024 confirm all labor control elements are evaluated on a regular basis. * Record review: 10 out of 10 labor mitigation plans covering the period October 2023 to September 2024 reveal: a) All

	significant. b) Actual labor risks identified. c) Potential labor risks identified. d) through the Hierarchy of controls and improvement objectives. d.a) in a documented gated process. e) demonstrating that each hierarchy level has been fully evaluated. e.a) reasons why it could not address the risk fully before proceeding to the next hierarchal level. f) indicating the status of implementation. g) resulting impact reduction. h) including feedback of h.a) affected internal. h.b) external stakeholders. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A.M.2.3
Question Text	An adequate and effective labor training process is established for all managers/workers on all policy/process/job-related aspects and performance targets.
Rating	Conformance
Conclusion	An adequate and effective labor training process is established for all managers/workers on all policy/process/job-related aspects and performance targets.
Data points	* Record review: Education Training Management Procedure (Document No.: B0000-1800, Rev. R, issued date: 27 June 2024) a) Is adequate. b) Is effective. * Record review: Labor training needs analysis (Doc. No: Nil, Rev. Nil, Issue date: 29 December 2023) confirms all minimum training topics are covered. * Record review: New employee orientation plan (Doc. No: Nil, Rev. Nil, Issue date: 7 March 2024) confirms topics identified in the training needs analysis are included. * Record review: Labor training plan (Doc. No: Nil, Rev. Nil, Issue date: 7 March 2024) confirms a) Topics identified in the training needs analysis are included. b) Training frequency is adequate. * Record review: 4 out of 4 labor training materials covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training materials. * Record review: 4 out of 4 labor training records covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training records for all attendees. * Record review: 4 out of 4 labor training effectiveness evaluations covering the period October 2023 to September 2024 confirm each training on the training plan have adequate training verification records for all attendees. * Record review: No learner labor training records are applicable as no learner in the facility. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers (no learner in the facility) confirm the audit observations. * Supporting evidence reference(s): N/A
A.M.3) COMMUNICATIONS	
Question #	VAP-A.M.3.1
Question Text	An adequate and effective ongoing two-way communication process with workers, and internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational labor practices and conditions and to foster continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective ongoing two-way communication process with workers, and internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational labor practices and conditions and to foster continuous improvement.
Data points	* Site observation: Feedback channels are clearly communicated and visible. * Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Is effective ongoing d) Is two-way communication with e) Minimum internal and external stakeholders e.a) Direct and indirect workers. e.b) No young workers. e.c) No foreign migrant workers. No internal migrant workers. e.d) Worker representatives e.e) Staff functions e.f) On-site service providers e.g) Suppliers e.h) Customers. e.i) Stakeholders immediately neighboring the auditee. f) Includes input and feedback from workers. * Record review: 10 out of 10 communications to internal and external stakeholders covering the period October 2023 to September 2024 confirm requirements of code implementation have been communicated to at least the following internal and external stakeholders: a) Direct and indirect workers. b) No young workers. c) No foreign migrant workers. No internal migrant worker in the facility. d) Worker representatives e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. * Record review: 10 out of 10 communication effectiveness evaluations covering the period October 2023 to September 2024 demonstrate effectiveness verification is done regularly. * Record review: 10 out of 10 input and feedback records covering the period October 2023 to September 2024 demonstrate input and feedback from workers is adequately received. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

Validated Audit Report

Question #	VAP-A.M.3.2
Question Text	An adequate and effective process is established to anonymously report labor grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance
Conclusion	An adequate and effective process is established to anonymously report labor grievances confidentially without fear of reprisal or intimidation.
Data points	* Site observation: a) Grievance channels are clearly communicated. b) Internal communication of the grievance mechanism is visible and in a language the workers can understand. * Record review: Internal Appealing Procedure (Document No.: 9920-1611, Rev. G, issued date: 26 October 2018) a) Is adequate. b) Is effective. c) Ensures grievances can be reported anonymously without fear of reprisal. d) Available for internal stakeholders. e) Available for external stakeholders. f) Clear grievance channels so reporting is encouraged and comfortable. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate grievances from stakeholders are adequately received. * Record review: 10 out of 10 grievance investigation records covering the period October 2023 to September 2024 demonstrate: a) the validity of any grievance is promptly investigated. b) Each valid grievance has an action plan. * Record review: 10 out of 10 communications to managers and workers covering the period October 2023 to September 2024 confirm written information on how to report a grievance is clearly communicated. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

A.M.4) PERFORMANCE REVIEW AND CONTINUOUS IMPROVEMENT	
Question #	VAP-A.M.4.1
Question Text	An adequate and effective labor management performance review and continuous improvement process is established.
Rating	Conformance
Conclusion	An adequate and effective labor management performance review and continuous improvement process is established.
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Defines the annual review process: c.a) By senior management. c.b) Of the management system. c.c) Of the performance. d) Mandates additional action plans if indicator, objective or target is off track. * Record review: Working Rule (Document No.: B9910-1301, Rev. F, issued date: 18 March 2021) a) Is adequate. b) Is effective. c) Defines the annual review process: c.a) By senior management: c.b) Of the management system. c.c) Of the performance. d) Mandates additional action plans if indicator, objective or target is off track. * Record review: 4 out of 4 labor performance action plans covering the period October 2023 to September 2024 exist for each indicator, objective or target that is off-track. * Record review: Labor performance target tracking form (Doc. No: Nil, Rev. Nil, Issue date: 3 January 2024) demonstrates a) each indicator, objective and target has progress reported regularly b) each goal shall include: b.a) Time Period is forward-looking b.b) Base date: 3 January 2024. b.c) Target date: 31 December 2024. b.d) Baseline: Labor training target achievement rate: 75%. b.e) Targeted improvement value: 100%. * Record review: 4 out of 4 labor system evaluation reports covering the period October 2023 to September 2024 confirm regular evaluation is done for: a) Control effectiveness verification for: a.a) Training. a.b) Communications. a.c) Grievances. a.d) HR practices. * Record review: 4 out of 4 System review meeting minutes covering the period October 2023 to September 2024 confirm a) Management reviews the system regularly and include. b) Meeting presentation materials/analysis/data. c) Formal target, indicator, and objective tracking. d) Regular progress reporting. e) Evaluation reports for. e.a) Control effectiveness. e.b) Training. e.c) Communication. e.d) Grievances. e.e) HR practices for at least. e.e.a) Hiring, e.e.b) Compensation, e.e.c) Nondiscrimination and harassment, e.e.d) Humane treatment. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

Question #	VAP-A.M.4.2
Question Text	An adequate and effective labor self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Rating	Conformance
Conclusion	An adequate and effective labor self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.

Validated Audit Report

Data points	* Record review: Internal Control and Audit Standard (Document No.: B9920-0101, Rev. H, issued date: 01 August 2017) a) Is adequate. b) Is effective. c) Mandates periodically assess conformance with: c.a) Applicable regulatory requirements. c.b) RBA Code requirements. c.c) Own policies, standards and management system. c.d) Other requirements to which the facility subscribes. d) States audit findings are reviewed by senior management. * Record review: 2 out of 2 labor self-audits reports covering the period October 2023 to September 2024 demonstrate: a) Self-audits are performed regularly. b) Audit findings are reviewed by senior management. c) Self-audit identified the non-conformances of this audit. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-A.M.4.3
Question Text	An adequate and effective labor corrective action process is established to rectify and close non-conformances.
Rating	Conformance
Conclusion	An adequate and effective labor corrective action process is established to rectify and close non-conformances.
Data points	* Record review: Internal Control and Audit Standard (Document No.: B9920-0101, Rev. H, issued date: 01 August 2017) a) Is adequate. b) Is effective. c) Defines the corrective action plans and tracking tables. d) Mandates additional actions are taken when a corrective action is off-track. e) Requires a demonstrated link between the CAP and the performance management objectives and targets. f) States all actions must be verifiably closed. g) Requires closure of action items is confirmed by a management representative after verification by the appropriate person. h) Mandates if any non-conformance is confirmed, a recorded corrective action is implemented. * Record review: 2 out of 2 labor self-audits reports covering the period October 2023 to September 2024 demonstrates the non-conformance findings are recorded. * Record review: No government inspection reports as there are no government inspections. * Record review: 2 out of 2 labor corrective action plans covering the period October 2023 to September 2024 demonstrate a) self-audit findings have a corrective action plan for each finding. b) No government inspection. c) Off-track indicators, objectives and targets have a corrective action plan. d) management system review findings have a correction action plan. e) All indicators, objectives or targets are on track. f) Closure verification with mgmt. confirmation exist for each corrective action plan item. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
B) HEALTH AND SAFETY	
B1) OCCUPATIONAL HEALTH AND SAFETY	
Question #	VAP-B1.1
Question Text	All required permits, licenses, and test reports for Occupational Health and Safety are in place and communicated timely to the government (if required).
Rating	Conformance
Conclusion	All required permits, licenses, test reports and certificates for Occupational Health and Safety are in place and communicated timely to the government.

Advancing Sustainability Globally

Validated Audit Report

Data points	* Site observation: a) Engineering controls are used where appropriate. b) Buildings are structurally sound. c) Confined spaces are identified. d) Stairways and elevated work areas are provided with appropriate guardrails and handrails and elevated work platforms are rated for load capacity. e) Aisles, stairways, and work areas are free of tripping hazards (stored materials, electrical cords) f) Workers are provided with appropriate fall protection for work in elevated work areas. g) Buildings are facilitated with tie-off points to provide workers with safe anchor points if they need to attach a harness. h) Precautions and controls of electrical hazards are in place, locked cabinets, closed panels, unobstructed access. i) Energized parts are protected from accidental contact by enclosures and barriers and all protective methods are in place and not deficient. j) In areas where powered industrial vehicles are used, pedestrian walkways are clearly delineated and physically separated, where possible, from vehicle operation areas Effective pest control. k) Anyone who works or resides in an area for a period longer than exposure limit value that require PPE do so appropriate for the given hazard. l) PPE (including ERT PPE) is available. m) PPE (including ERT PPE) is adequate in good and working condition. n) PPE is appropriately stored and accessible. o) ERT PPE storage is clearly marked, visible and easily accessible. * Record review: 2 out of 2 risk mitigation evaluation reports covering the period October 2023 to September 2024 confirm a) Each hierarchy level has been fully evaluated. b) Reasons why the risk could not be addressed fully before proceeding to the next hierarchal level. * Record review: 10 out of 10 OHS inspection reports covering the period October 2023 to September 2024 confirm a) Process and administrative controls are in place and effective. b) A safety inspection is performed daily. c) A safety inspection is performed prior to each use for all industrial-powered vehicles. * Record review: 2 out of 2 confined space entry evaluation reports covering the period October 2023 to September 2024 confirm evaluation is done before workers can enter. * Record review: 4 out of 4 hot work permits covering the period October 2023 to September 2024 confirm a) Evaluation is done before workers weld, braze and cut. b) Space is safe for welding. * Record review: 10 out of 10 electrical installations and wiring inspection reports covering the period October 2023 to September 2024 confirm a) Electrical installations and wiring inspections are performed regularly. b) Electrical installations and wiring are maintained to prevent electrical shock hazards. * Record review: 10 out of 10 Lockout/tag out reports covering the period October 2023 to September 2024 confirm a) Lockout/tag out program is in place for work on equipment with stored energy. b) Lockout/tag out program is in place for inadvertent start-ups which could injure workers. c) Work on equipment with stored energy or equipment with inadvertent start-ups is safe. * Record review: 10 out of 10 pest control logs covering the period October 2023 to September 2024 confirm pest control program: a) Is adequate. b) Is effective. * Record review: 10 out of 10 PPE selection and adequacy evaluation records covering the period October 2023 to September 2024 confirm PPE used is adequate. * Record review: 10 out of 10 PPE inventory and replacement records covering the period October 2023 to September 2024 confirm a) PPE can be replaced when needed. b) PPE is in stock. * Record review: 10 out of 10 PPE inspection records covering the period October 2023 to September 2024 confirm a) PPE is in good condition. b) PPE is used correctly. * Record review: 2 out of 2 Respiratory protection equipment fit test records covering the period October 2023 to September 2024 confirm: a) PPE is in good condition. b) PPE is used correctly. * Record review: Job specific PPE matrix (Doc. No: Nil, Rev. Nil, Issue date: 07 August 2024) is a) Available and b) Consistent with the c) Job hazard and d) PPE evaluation results. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B1.3
Question Text	Gender-responsive measures are taken to ensure pregnant women and nursing mothers are not in working conditions, which could be hazardous to them or their child, and provide reasonable accommodations for nursing mothers.
Rating	Conformance
Conclusion	Gender-responsive measures are taken to ensure pregnant women and nursing mothers are not in working conditions, which could be hazardous to them or their child, and provide reasonable accommodations for nursing mothers.

Important Notice

The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Validated Audit Report

Data points	* Site observation: a) Pregnant workers are not working in a job that is hazardous to the pregnant worker and her child. b) Nursing mothers are not working in a job that is hazardous to the worker and her child. c) Reasonable accommodations for nursing mothers are in place. c.a) A place, other than a bathroom, which may be used to express breast milk. c.b) Shielded from view. c.c) Free from intrusion from co-workers and the public. * Record review: 3 out of 3 personnel files of pregnant workers and nursing mothers covering the period October 2023 to September 2024 confirm pregnant workers and nursing mothers are only assigned to jobs safe for them. * Record review: 3 out of 3 working hour records of nursing mothers covering each month of the period of November 2023 (random month), March 2024 (random month) and May 2024 (random month) confirm nursing mothers can have reasonable time to express milk. * Record review: Instructions on maternity protection management (Doc. No.: B3600-0063, Rev. M, issued date: 11 June 2024) demonstrate a) The controls to minimize the risks identified in pre-, during, and post-natal risk assessments are a.a) Adequate a.b) Effective. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 1 pregnant worker and 1 nursing mother) confirm the audit observations. * Supporting evidence reference(s): N/A
B2) EMERGENCY PREPAREDNESS	
Question #	VAP-B2.1
Question Text	Adequate and effective fire detection, alarm and suppression systems are in place
Rating	Conformance
Conclusion	Adequate and effective fire detection, alarm and suppression systems are in place.
Data points	* Site observation: a) Automatic heat detection as required by local law. b) Smoke detection as required by local law. c) Detector devices and systems are functioning and well maintained. d) All buildings have an automatic fire alarm system. e) All buildings have an automatic notification system. f) Fire alarm control system is free of trouble and supervisory signals. g) Fire alarm manual call-points is provided along egress routes to exits. h) Portable fire extinguishers are installed, with unimpeded access and inspection tags. i) automatic fire sprinklers as required by local law. j) Fire hoses with unimpeded access and inspection tags. k) Fire water tank and water pressure are normal. l) Asbestos-containing fire-suppression materials are not present. * Record review: 12 out of 12 fire safety equipment inspection reports covering the period October 2023 to September 2024 confirm a) inspection frequency for portable fire extinguishers is monthly. b) inspection frequency for single-unit fire detectors is every 6 months. c) inspection frequency for all other fire safety equipment is not less than yearly. d) all fire safety equipment is in good working condition. * Record review: 12 out of 12 fire safety equipment test records covering the period October 2023 to September 2024 confirm a) test frequency is not less than yearly. b) all fire safety equipment is in good working condition. * Record review: 12 out of 12 maintenance records covering the period October 2023 to September 2024 confirm a) test frequency is not less than yearly. b) all fire safety equipment is in good working condition. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B2.2
Question Text	Effective emergency preparedness and response programs (plans/process) are established
Rating	Conformance
Conclusion	Effective emergency preparedness and response programs (including plans and process) are established.
Data points	* Site observation: a) Combustible storage is minimized and limited to areas with adequate fire detection and protection. b) Flammable and combustible materials are properly stored. b.a) to prevent the accumulation of vapors. b.b) Ignition hazards are eliminated in areas where combustible and flammable materials. b.b.a) Are stored. b.b.b) Are used. b.b.c) If there is a flammable atmosphere. * Record review: Operational disruption risk assessment procedure (Doc. No: B0000-2516, Rev. B, Issue date: 26 April 2023) a) Is adequate. b) Is current. c) Is available. * Record review: Business Resumption Plan (Doc. No: Nil, Rev. Nil, Issue date: 26 April 2023) a) Is adequate. b) Is current. c) Is available. * Record review: Emergency response procedure (Doc. No.: B0000-2507, Rev. X, issued date: 11 June 2024) a) Is adequate. b) Is current. c) Is available. d) Contains contact information for emergency responders. e) Reflects the risk assessment. * Record review: Post-emergency plan (Doc. No: Nil, Rev. Nil, Issue date: 12 March 2024) a) Is adequate. b) Is current. c) Is available. * Record review: 2 out of 2 incident reports covering the period October 2023 to September 2024 demonstrate a) An incident report is available for each incident. b) It includes root cause investigation. c) It includes corrective actions. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

Validated Audit Report

Question #	VAP-B2.3
Question Text	Effective emergency exit access, exits, and exit discharge are adequate in number and location, readily accessible, and properly maintained
Rating	Conformance
Conclusion	Effective emergency exit access, exits, and exit discharge are adequate in number and location, readily accessible, and properly maintained.
Data points	* Site observation: a) Clear and unobstructed egress. a.a) An adequate number of effective exit routes from every area a.b) Exit routes are separated by an appropriate distance and do not share a common exit. a.c) Exit routes are clear of obstructions. a.d) Exit discharges discharge to open space, and do not discharge to an enclosed area. a.e) Exits are free of material storage, and enclosures are not used for any other purpose except for egress. a.f) All exit route doors which serve high occupancy (=>50) or hazardous areas, open in the direction of egress. a.g) All Exit Route doors open without using a key, badge, code, special knowledge, or effort. a.h) All Exit Discharge doors are a single-motion exit. a.i) All Exit Discharge doors have listed panic hardware installed which is pushed open in a single motion. b) Exit signs are provided to mark exits on every floor. c) Exit signs are illuminated and lighted in the event of a power failure. d) Additional exit and directional signs are provided at main passageways and aisles, long corridors and other locations where the way to the nearest exit is unclear. e) Emergency lighting provided and installed to illuminate means of egress in the event of a power failure. f) Lighting provided adequate, functional emergency lighting in stairs, aisles, corridors, ramps, and passageways leading to exits, and in other areas as required by applicable laws. g) Battery power emergency lighting. h) Penetrations are limited to sprinkler pipes, standpipes, and electrical services, pipe and duct installation serving the enclosures. i) Openings into the enclosures are protected by fire-rated doors. j) Fire doors are in good condition, self-closing (upon fire alarm or detection of smoke). k) Integrity of exit enclosures is maintained. l) Muster points have been established in safe locations to enable employee accountability during an emergency. m) Muster points are both inside (tornado/extreme weather shelter-in-place) and outside (fire, chemical release). n) Emergency response kits are easily located and accessible near muster points. * Record review: 10 out of 10 emergency support equipment inspection records covering the period October 2023 to September 2024 demonstrate emergency support facilities: a) are available for emergency lighting. b) are available for emergency exit signs. c) are available for evacuation paths. d) are available for exit enclosures. e) are inspected as per local practice. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

Question #	VAP-B2.4
Question Text	Adequate and effective fire and other identified emergency evacuation drills are conducted with all workers and people on site
Rating	Conformance
Conclusion	Adequate and effective fire and other identified emergency evacuation drills are conducted with all workers and people on site.
Data points	* Record review: Emergency response procedure (Doc. No.: B0000-2507, Rev. X, issued date: 11 June 2024) a) Is adequate. b) Is effective. c) Includes all workers. d) Includes every area (dormitory, cafeteria, warehouse, office areas, production floors, research and development laboratories, shipping/receiving). e) Requires drills are executed at least annually. f) Includes all work shifts. g) Includes one drill that is conducted while it is dark outside. h) Other identified emergency drill frequency meets the risk assessment requirements. * Record review: 2 out of 2 emergency evacuation drill reports covering the period October 2023 to September 2024 demonstrate the evacuation drill: a) Includes all workers. b) Includes every area. c) Requires drills are executed at least annually. d) Includes all work shifts. e) Includes one drill that is conducted while it is dark outside. f) Other identified emergency drill frequency meets the risk assessment requirements. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

B3) OCCUPATIONAL INJURY AND ILLNESS	
Question #	VAP-B3.1
Question Text	Work-related accidents, near-misses, and illnesses are reported, tracked, accurate, investigated, and analyzed, and workers are not in situations that can cause them imminent harm.
Rating	Conformance
Conclusion	Work-related accidents, near-misses, and illnesses are reported, tracked, accurate, investigated, and analyzed, and workers are not in situations that can cause them imminent harm.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Validated Audit Report

Data points	* Site observation: a) Workers are not in situations that can cause imminent harm. b) Areas that can cause imminent harm to workers are free of workers. b.a) Are signed. b.b) Access is restricted. * Record review: 4 out of 4 OHS incident reports covering the period October 2023 to September 2024 include a) All reportable accidents. b) All non-reportable accidents. c) All incidents. d) All near misses. e) Recordings are accurate. f) Occupational illness data. g) Surveillance data. h) Recordings are current. * Record review: 4 out of 4 OHS incident investigation reports covering the period October 2023 to September 2024 demonstrate a) All accidents are investigated. b) All incidents are investigated. c) All accidents are analyzed to minimize the potential for future occurrence. d) All incidents are analyzed to minimize the potential for future occurrence. * Record review: 4 out of 4 OHS trend analysis reports covering the period October 2023 to September 2024 demonstrate a) Trend analysis of the occupational injuries is performed at least annually. b) Trend analysis of the occupational illnesses data is performed at least annually. * Record review: No imminent harm report is available as no imminent harm instance happens. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B3.2
Question Text	Adequate first response equipment and first aid kits to provide medical treatment for injured or ill workers are available
Rating	Conformance
Conclusion	Adequate first response equipment and first aid kits to provide medical treatment for injured or ill workers are available.
Data points	* Site observation: a) Assigned first aid kits are available in designated locations. b) Assigned first aid kits are appropriate. c) Assigned first aid kits are completely stocked. d) First aid kits are unlocked. e) First response equipment is available in designated locations. f) First response equipment is appropriate. g) First response equipment is well maintained. h) Occupational medical clinic (infirmary) is adequately staffed. i) Occupational medical clinic (infirmary) is supplied to respond to injuries. j) Alternative resources outside medical services are communicated to workers. k) No asbestos blankets are used. * Record review: 5 out of 5 First Aid, First Response kits and First Response equipment inventory lists covering the period October 2023 to September 2024 demonstrate a) First Aid, First Response kits and First Response equipment have an inventory list. b) First Aid, First Response kits and First Response equipment inventory inspection frequency is at least monthly. c) First Aid, First Response kits and First Response equipment have adequate supplies. * Record review: 5 out of 5 First Aid, First Response kits and First Response equipment inspection records covering the period October 2023 to September 2024 demonstrate a) Inspection tracking records are available. b) Inspection tracking records are up to date. c) Frequency is at least monthly for all inspections. * Record review: In-house infirmary operations log (Doc. No: Nil, Rev. Nil, Issue date: 18 September 2024) a) Is available. b) Is up to date. c) States supplies are available. d) States supplies are adequate. e) Confirms supplies are inspected. * Record review: Medical clinic operations log (Doc. No: Nil, Rev. Nil, Issue date: 24 September 2024) reveals the onsite emergency occupational medical clinic log is available and up to date. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 2 nurses, no doctor in the facility) confirm the audit observations. * Supporting evidence reference(s): N/A
B4) INDUSTRIAL HYGIENE	
Question #	VAP-B4.1
Question Text	Workers' exposures to chemical, biological, and physical hazards are identified, evaluated, and adequately controlled in accordance with the hierarchy of controls, which is maintained through ongoing, systematic monitoring of worker's health.
Rating	Conformance
Conclusion	Workers’ exposures to chemical, biological, and physical hazards are identified, evaluated, and adequately controlled in accordance with the hierarchy of controls, which is maintained through ongoing, systematic monitoring of worker’s health.

Data points	* Site observation: a) Chemicals are adequately and effectively categorized. b) Chemicals are adequately and effectively handled. c) Chemicals are adequately and effectively stored. d) Chemicals are adequately and effectively moved within a single facility. e) Chemicals are adequately and effectively access controlled. f) Chemicals are adequately and effectively segregated. g) Chemicals have adequate and effective secondary containment. h) Chemicals have adequate and effective ventilation. i) Chemicals have adequate and effective fire protection. j) Chemicals have adequate and effective storage cabinets. k) Adequate and effective engineering controls to reduce or eliminate worker exposure to chemical agents are in place. l) Adequate and effective engineering controls to reduce or eliminate worker exposure to biological agents are in place. m) Adequate and effective engineering controls to reduce or eliminate worker exposure to physical agents are in place. n) Workplace is free from obvious odor. o) Workplace is free from visible fumes. p) Workplace is free from dust. q) Workplace is free from other conditions leading to potential unhealthy feelings. r) Monitoring equipment is: r.a) Available. r.b) Well-maintained. r.c) Calibrated. r.d) Operational. * Record review: 10 out of 10 chemical inventory records covering the period October 2023 to September 2024 a) Are accurate. b) Are maintained. c) Are up to date. * Record review: ESH risk assessment procedure (Doc. No.: B0000-2501, Rev. O, issued date: 16 October 2023) a) Details how to control the identified potential hazards to chemical agents. b) Details how to control the identified potential hazards to biological agents. c) Details how to control the identified potential hazards to physical agents. d) is adequate. e) is effective. f) demonstrates process and administrative controls are in place. * Record review: Instructions on ESH management for gases and chemicals (Doc. No.: B3600-0037, Rev. P, issued date: 24 August 2023) a) Is adequate. b) Is effective. c) Details how to track the use of all hazardous chemicals. d) Details how to review the use of all hazardous chemicals. e) Details how to approve the use of all hazardous chemicals. f) Details how to approve the purchase of hazardous chemicals. g) Details how to approve all new purchases of hazardous chemicals prior to use. h) Details how to evaluate chemicals for less hazardous or non-hazardous alternatives, including Greenhouse Gas and Ozone Depletion impact. h.a) includes Greenhouse Gas impact. h.b) includes Ozone Depletion impact. * Record review: 10 out of 10 hazardous chemical inspection records covering the period October 2023 to September 2024 demonstrate records a) Are maintained for all hazardous substances. b) Are maintained for all hazardous substances' points of use. c) Are maintained for all hazardous substances' points of storage. d) Are accurate. e) Show Process and administrative controls are effective. f) Define the process to track the use of all hazardous chemicals is adequate and effective. * Record review: 10 out of 10 hazardous substances manifests and shipping papers covering the period October 2023 to September 2024 demonstrate a) chemical inventory records are accurate. b) Inspection records of hazardous substances and their points of storage and use are accurate. c) process to track and approve the use of all hazardous chemicals is adequate and effective. * Record review: 10 out of 10 approvals for the purchase of hazardous chemicals covering the period October 2023 to September 2024 demonstrate a) Approvals for the purchase of hazardous chemicals and for all new purchases of hazardous chemicals prior to use. b) Evaluations of chemicals of less hazardous or non-hazardous alternatives, including Greenhouse Gas and ozone depletion impact, are implemented. c) The process to track, review, and approve the use of all hazardous chemicals is adequate and effective. d) The process and administrative controls are effective. e) The process to track and approve the use of all hazardous chemicals is adequate and effective. * Record review: 10 out of 10 hazardous chemicals evaluations covering the period October 2023 to September 2024 demonstrate a) Evaluations of chemicals of less hazardous or non-hazardous alternatives, including Greenhouse Gas and ozone depletion impact, are implemented. b) The process to track, review, and approve the use of all hazardous chemicals is adequate and effective. c) The process and administrative controls are effective. d) The process to track and approve the use of all hazardous chemicals is adequate and effective. * Record review: 10 out of 10 maintenance logs for monitoring equipment covering the period October 2023 to September 2024 are: a) Available. b) Complete. c) Accurate. d) Up-to-date. * Record review: 2 out of 2 calibration logs for monitoring equipment covering the period October 2023 to September 2024 are: a) Available. b) Complete. c) Accurate. d) Up-to-date. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
B5) PHYSICALLY DEMANDING WORK	
Question #	VAP-B5.1
Question Text	Worker exposure to the hazards of physically demanding work is controlled effectively
Rating	Conformance
Conclusion	Worker exposure to the hazards of physically demanding work is controlled effectively.
Data points	* Site observation: a) Adequate engineering controls to reduce physically demanding work are in place. b) Adequate engineering controls to reduce physically demanding work are effective. * Record review: Instructions on ergonomic hazards prevention management (Doc. No.: B3600-0061, Rev. G, issued date: 05 July 2024) states the details of the program: a) To control the identified potential hazards to physically demanding work. b) Follows the hierarchy of controls. c) The requirement to regularly verify the effectiveness of implemented controls. d) It encourages and responds to early reporting of discomfort. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

Validated Audit Report

B6) MACHINE SAFEGUARDING	
Question #	VAP-B6.1
Question Text	An adequate and effective machine-safeguarding program is implemented, and workers operate machinery safely.
Rating	Conformance
Conclusion	An adequate and effective machine-safeguarding program is implemented, and workers operate machinery safely.
Data points	* Site observation: a) All machines have adequate emergency stops. b) All machines have adequate safeguards. c) All workers operate machines safely. * Record review: 5 out of 5 work instructions covering the period October 2023 to September 2024 demonstrate a) They are available at the machine. b) The process and administrative controls are in place and effective. c) They are in a language understood by the worker. * Record review: 5 out of 5 safe machine operation records covering the period October 2023 to September 2024 demonstrate records a) Are available at the machine. b) detail the process and administrative controls are in place and effective. c) Are in a language understood by the worker. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
B7) FOOD, SANITATION AND HOUSING	
Question #	VAP-B7.1
Question Text	Worker housing is clean, safe and well-maintained and meet international housing standards
Rating	Not Applicable
Conclusion	
Data points	
Question #	VAP-B7.2
Question Text	Bathrooms, employee spaces, cafeterias, food areas are safe, clean, well maintained, and well managed
Rating	Conformance
Conclusion	Bathrooms, employee spaces, cafeterias, food areas are safe, clean, well maintained, and well managed.
Data points	* Site observation: a) Bathrooms are clean. b) Bathrooms are well maintained. c) Employee spaces are clean. d) Employee spaces are well maintained. e) Prayer or religious areas are clean. f) Prayer or religious areas are well maintained. g) Cafeterias and food areas are clean. h) Cafeterias and food areas are well maintained. i) Bathrooms are provided with adequate hand washing facilities. j) Cafeterias and food areas are provided with adequate hand washing facilities. k) Food service workers wear masks, hairnets and gloves to prevent food contamination. l) Food storage and preparation areas are clean. m) Food is stored properly. n) Raw and cooked food stored separately. o) Food is kept covered. p) Food is used or disposed of before the marked expiration date. * Record review: Factory kitchen operation management specifications (Doc. No.: 9920-3413, Rev. D, issued date: 01 October 2022) states the detail of the cleaning and sanitation program a) Is adequate. b) Is effective. c) The process and administrative controls are in place. d) The process and administrative controls are effective. * Record review: 10 out of 10 Food handling and hygiene inspection reports covering the period October 2023 to September 2024 demonstrate: a) Inspections are regular. b) Food handling is safe. c) Food preparation is safe. d) Hygiene meets requirements. e) They are available. f) They are up to date. g) The process and administrative controls are in place. h) The process and administrative controls are effective. * Record review: 10 out of 10 sanitation records covering the period October 2023 to September 2024 demonstrate records a) Are available. b) Are up to date. c) Detail the process and administrative controls are in place. d) Detail the process and administrative controls are effective. * Record review: 10 out of 10 maintenance records covering the period October 2023 to September 2024 demonstrate a) They are available. b) They are up to date. c) The process and administrative controls are in place. d) The process and administrative controls are effective. * Record review: Procedure of rented apartment is not needed as rented apartment is not available. * Record review: Rented apartment risk assessment is not needed as rented apartment is not available. * Record review: 2 out of 2 pest control logs covering the period October 2023 to September 2024 confirm pest control program: a) Is adequate. b) Is effective. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
B.M.1) RISK ASSESSMENT	

Validated Audit Report

Question #	VAP-B.M.1.1
Question Text	An adequate and effective Occupational Health and Safety compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Rating	Conformance
Conclusion	An adequate and effective Occupational Health and Safety compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Data points	* Record review: ESH regulations identification and inspection management procedure (Doc. No.: B0000-2501, Rev. O, issued date: 16 October 2023) states a) Compliance procedure: a.a) Is adequate. a.b) Is effective. a.c) Quarterly review: a.d) Including applicable legal requirements. a.e) Including applicable customer requirements. to a.f.a) Identify. a.f.b) Track. a.f.c) Assess. a.f.d) Integrate. a.f.e) Implement. a.f.f) Record. b) To ensure timely renewal before the expiration of: b.a) Permits. b.b) Licenses. b.c) Testing reports. * Record review: Health & safety compliance calendar (Doc. No: Nil, Rev. Nil, Issue date: 04 September 2024) confirms the compliance calendar: a) Is accurate. b) Is up to date. c) Includes applicable legal requirements. d) Includes applicable customer requirements. e) Has a reminder system. * Record review: Health & safety compliance register (Doc. No: Nil, Rev. Nil, Issue date: 26 August 2024) confirms the compliance register: a) Is accurate. b) Is up to date. c) Has summaries of applicable laws and regulations. d) Contains reviews of the key customer requirements that impact the operations as these related to the RBA code. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A

Question #	VAP-B.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential occupational health and safety risks where the facility caused or contributed to adverse occupational health and safety impacts (including applicable requirements).
Rating	Conformance
Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential occupational health and safety risks where the facility caused or contributed to adverse occupational health and safety impacts (including applicable requirements).
Data points	* Record review: Stakeholder identification procedure (Doc. No.: Nil, Rev. Nil, issued date: 17 April 2024) states the process which is a) Adequate. b) Effective for c) Internal stakeholders. d) External stakeholders for occupational health and safety. * Record review: Internal and external stakeholder list for occupational health and safety (Doc. No: Nil, Rev. Nil, Issue date: 17 April 2024) which includes all identified internal and external stakeholders including at a minimum: a) Direct and indirect workers. b) No young workers. c) No foreign migrant workers. No internal migrant workers. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. j) Women workers after pregnancy is reported. k) Women workers returning to work after giving. * Record review: ESH risk assessment procedure (Doc. No.: B0000-2501, Rev. O, issued date: 16 October 2023) states a) risk assessment procedure that: a.a) Is adequate. a.b) Is effective. a.c) Each identified risk has an action to minimize such risk through the Hierarchy of Controls. a.d) identify the most significant risks. a.d.a) including applicable legal requirements. a.d.b) including applicable customer requirements. a.e) The risk assessment is updated when there is a Significant Change. b) Scope of the risk assessment: b.a) Every task. b.b) Every site operation/process. b.c) Every Physical location. c) Specific requirement elements: c.a) Harm to life. c.b) Property. c.c) Fire. c.d) Chemical spill. c.e) Earthquake. c.f) Severe weather. c.g) Workplace violence. c.h) Strike. c.i) Asbestos / lead. c.k) Chemical, biological, or physical agents: c.k.a) Based on associated industrial hygiene sampling and testing. c.k.b) Risk assessment must include exposure to multiple chemicals. c.l) Pregnant workers and nursing mothers: c.l.a) Before a pregnancy is reported: general risk assessment (potential hazards to expecting mothers). c.l.b) After pregnancy is reported: a worker-specific risk assessment of the worker's job to assess risk to mother and fetes. c.l.c) After mother returns to work: a worker-specific post-natal risk assessment of the worker's job to assess risk to mother and possible impacts on the baby through breastfeeding. d) All identified internal and external stakeholders d.a) Direct and indirect workers. d.b) No young workers. d.c) No foreign migrant workers. No internal migrant workers. d.d) Worker representatives. d.e) Staff functions. d.f) On-site service providers. d.g) Suppliers. d.h) Customers. d.i) Stakeholders immediately neighboring the auditee. * Record review: 5 out of 5 health & safety risk assessments covering each month of the period October 2023 to September 2024 a Are accurate. b) Are complete. c) Are up-to-date. d) Each identified risk has an action to minimize such risk through the Hierarchy of Controls e) Identify the most significant risks. e.a) Including applicable legal requirements. e.b) Including applicable customer requirements. f) The risk assessment is updated when there is a Significant Change. g) Scope of the risk assessment: g.a) Every task. g.b) Every site operation/process. g.c) Every Physical location. h) Specific requirement elements: h.a) Harm to life. h.b) Property. h.c) Fire. h.d) Chemical spill. h.e) Earthquake. h.f) Severe weather. h.g) Workplace violence. h.h) Strike. h.i) Asbestos / lead. h.k) Chemical, biological, or physical agents. i) All identified internal and external stakeholders: i.a) Direct and indirect workers. i.b) No young workers. i.c) No foreign migrant workers. No internal migrant workers. i.d) Worker representatives. i.e) Staff functions. i.f) On-site service providers. i.g) Suppliers. i.h) Customers. i.i) Stakeholders immediately neighboring the auditee. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A

Validated Audit Report

B.M.2) CONTROL PROCESSES	
Question #	VAP-B.M.2.1
Question Text	Occupational health and safety responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Rating	Conformance
Conclusion	Occupational health and safety responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Data points	* Site observation: Personnel is easily identifiable. a) ERT. b) First responders. * Record review: ESH management system manual (Doc. No.: B0000-0040, Rev. T, issued date: 06 September 2024) confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) To ensure compliance with the requirements of the RBA. c) Is authorized to implement: c.a) Programs. c.b) Process actions. c.c) Corrective actions as needed for regulatory compliance and RBA conformance. It confirms: a.a) Responsibilities of each organizational level are recorded. a.b) Authorities of each organizational level are recorded. a.c) For normal and emergency situations. b) ERT assignment: b.a) An emergency response team (ERT) is available during all working shifts. b.b) An emergency response team (ERT) is formed at each facility. b.c) The ERT shall have the authority to direct the response to emergencies to ensure the protection of: b.c.a) Worker health & safety. b.c.b) The environment. b.c.c) Property. c) First responder's assignment: c.a) First responders are trained and available during all working shifts. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B.M.2.2
Question Text	Adequate and effective occupational health and safety policies and control processes are established.
Rating	Conformance
Conclusion	Adequate and effective occupational health and safety policies and control processes are established.

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	* Record review: Labor Rights Notice (Doc. No: Nil, Rev. Nil, Issue date: 12 August 2024) states clearly: a) Workers can remove themselves from imminent harm and return once the situation is mitigated without fear of retaliation. * Record review: Instructions on maternity protection management (Doc. No.: B3600-0063, Rev. M, issued date: 11 June 2024) a) Is adequate. b) Is effective. c) States the occupational health and safety impact on pregnant women and nursing mothers will be minimized. * Record review: Instructions on infirmary management (Doc. No.: B3600-0018, Rev. AC, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Indicates severity of medical emergency and response. c.a) First aid. c.b) Local external hospital. d) Ensures adequate first response equipment and first aid kits. d.a) Inspection. d.b) Maintenance. d.c) Upkeep. d.d) Stocking. * Record review: Instructions on ESH management for gases and chemicals (Doc. No.: B3600-0037, Rev. P, issued date: 24 August 2023) a) Is adequate. b) Is effective. c) Ensures all new chemicals include a thorough evaluation of less hazardous or non-hazardous alternatives. c.a) Includes Greenhouse Gas impact. c.b) Includes ozone depletion impact. d) Ensures all use of hazardous chemicals are: d.a) Tracked. d.b) Reviewed. d.c) Approved. e) Ensures all new purchases of hazardous chemicals are approved prior to use. f) Mandates control of identified potential hazards of chemical, biological, or physical agents follow the hierarchy of controls. f.a) in a documented gated process. f.b) demonstrating that each hierarchy level has been fully evaluated. f.c) stating reasons why it could not address the risk fully before proceeding to the next hierarchal level. * Record review: Instructions on management of PPE and rescue equipment (Doc. No.: B3600-0043, Rev. F, issued date: 25 September 2018) a) Is adequate. b) Is effective. c) Requires to assess worker safety hazards and determine appropriate and adequate PPE for c.a) Specific job tasks. c.b) Specific areas of the facility. d) Defines PPE notification. e) Defines PPE enforcement. f) Ensures timely PPE requisition. g) Ensures timely PPE renewal. * Record review: Taichung Factory Fire Protection System Automatic Checklist Standard Operating Specifications (Doc. No.: E3480-0018, Rev. T, issued date: 13 July 2023) a) Is adequate. b) Is effective. c) Ensures adequate fire detection. d) Ensures adequate fire alarm. e) Ensures adequate suppression. f) Ensures effective emergency exit access. g) Ensures effective emergency exits. h) Ensures effective emergency exit discharge with unobstructed egress. i) Ensures automatic fire sprinklers. j) Ensures portable fire extinguishers. k) Ensures heat detection. l) Ensures smoke detection. m) Ensures alarm and notification system. n) Ensures regular inspection as required by the common practice for a good state of operation. o) Ensures regular testing as required by the common practice for a good state of operation. p) Ensures regular maintenance as required by the common practice for a good state of operation. It states Employee spaces policy a) Is adequate. b) Is effective. c) Includes all bathrooms. d) Includes all employee spaces. e) Includes all cafeterias and food areas. f) Ensures regular preventive maintenance. g) Meets safe food handling meeting hygiene standards. g.a) In refrigeration. g.b) In storage. g.c) In preparation areas. g.d) In food serving and consumption areas. h) Ensures cleaning and sanitation. * Record review: Instructions on reporting, investigating, and handling ESH incidents (Doc. No.: B3600-0040, Rev. Q, issued date: 08 April 2024) a) Is adequate. b) Is effective. c) All reportable accidents are tracked. d) Ensures all non-reportable accidents are tracked. e) Ensures all incidents are tracked. f) Ensures all near misses are tracked. g) Ensures all accidents are investigated. h) Ensures all accidents are analyzed for corrective and preventive actions. i) Ensures occupational injury data is available for review including medical surveillance data. j) Ensures occupational illness data is available for review including medical surveillance data. k) Ensures occupational injury and illness data are available for review including medical surveillance data. l) Ensures trend analysis of the occupational Injury data is performed at least annually and corrective actions are identified and implemented. m) Ensures occupational Injury trends analysis results are implemented through corrective actions. n) Ensures trend analysis of the occupational illness data is performed at least annually and corrective actions are identified and implemented. o) Ensures occupational illness trends analysis results are implemented through corrective actions. p) Ensures appropriate preventive action as a result of medical surveillance or injury: p.a) Worker shall be removed from the current job immediately and offered another position in the facility. p.b) Labor contract termination is prohibited due to the medical surveillance results. p.c) medical treatment for the worker is provided. p.d) Re-examination of the worker is required. p.e) All medical treatment, re-examination, and rehabilitation costs for the worker are paid by the employer. * Record review: Instructions on ergonomic hazards prevention management (Doc. No.: B3600-0061, Rev. G, issued date: 05 July 2024) a) Is adequate. b) Is effective. c) Ensures the identified potential hazards of physically demanding work are controlled. c.a) In a documented gated process. c.b) Demonstrating that each hierarchy level has been fully evaluated. c.c) Stating reasons why it could not address the risk fully before proceeding to the next hierarchal level. d) Encourages workers to early report discomfort. * Record review: Instructions on ESH management of equipment and materials procurement (Doc. No.: B3600-0053, Rev. K, issued date: 08 November 2023) a) Is adequate. b) Is effective. c) Ensures safeguards are installed as needed to control the identified hazards. c.a) In a documented gated process. c.b) Demonstrating that each hierarchy level has been fully evaluated. c.c) Stating reasons why it could not address the risk fully before proceeding to the next hierarchal level. d) Ensures regular inspection of machines, safeguards, and emergency stops. e) Ensures regular preventive maintenance of machines, safeguards, and emergency stops. * Record review: Worker housing policy is not needed as dormitory is not available. * Record review: Factory kitchen operation management specifications (Doc. No.: 9920-3413, Rev. D, issued date: 01 October 2022) a) Is adequate. b) Is effective. c) Includes all bathrooms. d) Includes all employee spaces. e) Ensures cleaning and sanitation. * Record review: ESH management system manual (Doc. No.: B0000-0040, Rev. T, issued date: 06 September 2024) a) Is adequate. b) Is effective. c) Each of the policy requirements has an effective implementation and control process. d) To minimize the Health & Safety impact on nursing mothers. e) To minimize the Health & Safety impact on pregnant workers. f) Provide reasonable break time for a worker to express breast milk for her nursing child up to one year after the child's birth each time the worker has a need to express the milk. g) Provide a place that is shielded from view to express breast milk. h) Provide a place that is free from intrusion from co-workers and the public to express breast milk. i) Adequate and effective process is implemented to assess worker safety hazards and determine appropriate PPE for specific job tasks and areas of the facility. j) PPE requisition and renewal process k) Adequate and effective notification and enforcement process for PPE use is in place. l) Automatic fire sprinklers, portable fire extinguishers, heat and smoke detection, and an alarm and notification system are inspected, tested and

	maintained for a good state of operation on a regular basis, as required by the insurance company or common practice. m) Emergency exit access, exits, and exit discharge. n) Adequate and effective process to ensure effective emergency exit access, exits and exit discharge with unobstructed egress in place. o) A system for workers to report health & safety incidents and near misses, as well as a system to investigate, track, and manage such reports. p) All reportable and non-reportable accidents are tracked; recorded and investigated to minimize the potential for future occurrence. q) Occupational injury and illness data are available for review including medical surveillance data. r) All accidents are investigated and analyzed for corrective and preventive actions. s) Trend analysis of the occupational injury and illness data is performed on a regular basis, at least annually and corrective actions are identified and implemented. t) Adequate and effective first response process indicating the severity of medical emergency and response (first aid, local external hospital). u) Maintenance process: Adequate and effective maintenance process is in place for inspection, maintenance, upkeep and stocking of all first response equipment and first aid kits. v) Adequate and effective process to track, review, and approve the use of all hazardous chemicals, including approvals for all new purchases of hazardous chemicals prior to use. w) Adequate and effective recorded program to control the identified potential hazards to chemical, biological, or physical agents is in place and follows the hierarchy of controls in a documented gated process, demonstrating that each hierarchy level has been fully evaluated and reasons why it could not address the risk fully before proceeding to the next hierarchal level. x) Selection processes for all new chemicals include a thorough evaluation of less hazardous or non-hazardous alternatives including Greenhouse Gas and Ozone Depletion impact. y) Adequate and effective recorded program to control the identified potential hazards of physically demanding work is in place and follows the hierarchy of controls in a documented gated process, demonstrating that each hierarchy level has been fully evaluated and reasons why it could not address the risk fully before proceeding to the next hierarchal level. z) Program encourages early reporting of discomfort. aa) Appropriate method is used to ensure that safeguards are installed as needed to control the identified hazards and follows the hierarchy of controls in a documented gated process, demonstrating that each hierarchy level has been fully evaluated and reasons why it could not address the risk fully before proceeding to the next hierarchal level. ab) Regular inspection and preventive maintenance of a machine, its safeguards and emergency stops. ac) Adequate and effective cleaning and sanitation program is in place. ad) Adequate and effective preventive maintenance program (including emergency response supporting facilities) is in place. ae) On-site inspections of the emergency process by authorized personnel. af) Safe food handling process and hygiene standards (in refrigeration, storage, and preparation areas) are in place and followed in cafeterias. ag) Adequate and effective cleaning and sanitation program is in place. ah) Adequate and effective preventive maintenance program (including emergency response supporting facilities) is in place. ai) Adequate and effective preventive maintenance program (including emergency response supporting facilities) is in place. * Record review: 5 out of 5 occupational health & safety records covering the period October 2023 to September 2024 demonstrate a) Appropriate retention on-site. b) Appropriate retention off-site. c) Appropriate levels of access to ensure privacy. d) Conformance with legal requirements. e) Conformance with customer requirements. * Record review: 5 out of 5 risk control reports covering the period October 2023 to September 2024 a) are accurate b) are complete c) are update to date d) Demonstrate the effectiveness controls are evaluated on a regular basis e) Show procedural controls are recorded. f) Where controls are not yet in place, an implementation plan (with owners and due date) is in place and on track. * Record review: 5 out of 5 occupational health & safety controls effectiveness evaluations covering the period October 2023 to September 2024 demonstrate controls are evaluated on a regular basis. * Record review: 3 out of 3 health & safety mitigation plan covering the period October 2023 to September 2024 a) Are adequate. b) Are complete. c) Are update to date. d) Identify all significant actual and potential risks. d.a) Through the Hierarchy of controls. d.b) Improvement objectives in a documented gated process. d.c) Each hierarchy level has been fully evaluated and reasons why it could not address the risk fully before proceeding to the next hierarchal level. d.d) The status of implementation and resulting impact reduction including feedback of the affected internal and external stakeholders. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B.M.2.3
Question Text	An adequate and effective occupational health and safety training process is established for all managers/workers on all policy/ process/job-related aspects and performance targets.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety training process is established for all managers/workers on all policy/ process/job-related aspects and performance targets.

Validated Audit Report

Data points	* Record review: Instruction on ESH training (Doc. No.: B3600-0012, Rev. U, issued date: 14 June 2024) a) Is adequate. b) Is effective. c) For workers. d) For managers. e) For medical professionals. f) For ERT members. g) For first aiders or responders. h) Includes a new employee orientation plan. i) each demographic group in the facility. * Record review: Occupational Health & safety training needs analysis (Doc. No: Nil, Rev. Nil, Issue date: 31 August 2024) confirms a) Minimum training topics are covered. a.a) Mechanical, electrical, chemical, fire, and physical hazards. a.b) The correct use of appropriate PPE. a.c) Types of potential emergencies that may occur at their work location and what to do during an emergency, including Internal and external muster points. a.d) Machine safety and the use of safeguards and emergency stops. a.e) Reporting injuries and illnesses vi) Hazardous atmospheres and confined space work process prior to entry of confined spaces. a.f) Lock out-tag out process. b) Specific training for ERT. c) Specific training for first responders. d) Specific training for medical professionals. e) Training will be dependent on responsibilities during an emergency. f) Specialized training for workers responsible for storage, clean up or disposal of chemical releases. * Record review: New employee orientation plan (Doc. No: Nil, Rev. Nil, Issue date: 12 August 2024) confirms topics identified in the training needs analysis are included. * Record review: Occupational Health & safety training plan (Doc. No: Nil, Rev. Nil, Issue date: 30 May 2024) confirms a) Topics identified in the training needs analysis are included. b) Training frequency is adequate. c) ERT are trained at least annually. d) First aiders and responders are trained at least annually. e) Training is provided to all workers prior to the beginning of work. f) Occupational health professionals are trained by external agencies. g) first responders are trained by external agencies. h) Includes content on specific risks to relevant demographics. * Record review: 10 out of 10 Occupational health & safety training materials covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training materials. * Record review: 10 out of 10 Occupational health & safety training records covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training records for all attendees. * Record review: 10 out of 10 Occupational health & safety training effectiveness evaluations covering the period October 2023 to September 2024 confirm each training on the training plan have adequate training verification records for all attendees. * Record review: No learner occupational health & safety training records are applicable as no learner in the facility. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (no learners in the facility) confirm the audit observations. * Supporting evidence reference(s): N/A
B.M.3) COMMUNICATIONS	
Question #	VAP-B.M.3.1
Question Text	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational occupational health and safety practices and conditions and to foster continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective ongoing two-way communication process with workers, and internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational occupational health and safety practices and conditions and to foster continuous improvement.

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	* Site observation: a) Feedback channels are clearly communicated and visible. b) Health & Safety communication clearly posted in the facility in a location identifiable and accessible by workers. c) Appropriate signs, placards and labels identifying hazards. d) Potential workplace hazards that workers are exposed to are clearly posted in the facility in a location identifiable and accessible by workers. e) PPE requirements are communicated to workers via posted signs. f) PPE is worn by all affected people performing those tasks or in the areas requiring PPE. g) Maps are posted throughout the facility which clearly identify exit routes and muster points in the correct orientation. h) Adequate and effective signage is observed with: h.a) Emergency number(s). h.b) Emergency team. h.c) Emergency evacuation and response plan. * Record review: ESH management system consulting and communicating procedure (Doc. No.: B0000-2504, Rev. M, issued date: 23 October 2023) a) Is adequate. b) Is effective. c) Is effective ongoing. d) Is two-way communication with. e) Minimum internal and external stakeholders: e.a) Direct and indirect workers. e.a.a) to obtain worker input and feedback. e.a.b) Each policy, process, and mgmt. systems element, responsibilities, risk, and grievances) are covered. e.a.c) All hazards at the site and action promoting a safe workplace. e.a.d) Internal and external muster points. e.b) No young workers. e.c) No foreign migrant workers. No internal migrant workers. e.d) Worker representatives. e.e) Staff functions. e.f) On-site service providers. e.g) Suppliers. e.g.a) Correspondence to supplier management. e.h) Customers. e.h.a) Occupational health and safety practices and performance. e.h.b) Accident, incidents, and near-miss statistics. e.i) Stakeholders immediately neighboring the auditee. e.j) Visitors. e.j.a) General health and safety emergency process, general awareness, and rules. e.j.b) Internal and external muster points. e.k) Stakeholders immediately neighboring the auditee. * Record review: 10 out of 10 Communications to internal and external stakeholders covering the period October 2023 to September 2024 confirm requirements of code implementation have been communicated to at least the following internal and external stakeholders: a) Direct and indirect workers. b) No young worker in the facility. c) Foreign migrant workers. No internal migrant worker in the facility. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. j) Visitors. k) Stakeholders immediately neighboring the auditee. * Record review: 10 out of 10 Communication effectiveness evaluations covering the period October 2023 to September 2024 demonstrate effectiveness verification is done regularly. * Record review: 10 out of 10 Input and feedback records covering the period October 2023 to September 2024 demonstrate input and feedback from workers is adequately received. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B.M.3.2
Question Text	An adequate and effective process is established to anonymously report occupational health and safety grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance
Conclusion	An adequate and effective process is established to anonymously report occupational health and safety grievances confidentially without fear of reprisal or intimidation.
Data points	* Site observation: a) Grievance channels are clearly communicated. b) Internal communication of the grievance mechanism is visible and in a language the workers can understand. c) A mechanism to raise safety concerns is clearly visible. * Record review: Company Internal Grievance Procedure (Doc. No.: B9920-1611, Rev. G, issued date: 26 October 2018) a) Is adequate. b) Is effective. c) Ensures grievances can be reported anonymously without fear of reprisal. d) Available for internal stakeholders. e) Available for external stakeholders. f) Clear grievance channels so reporting is encouraged and comfortable. g) Workers are encouraged to raise safety concerns including early reporting of discomfort. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate grievances from stakeholders are adequately received. * Record review: 10 out of 10 grievance investigation records covering the period October 2023 to September 2024 demonstrate a) the validity of any grievance is promptly investigated. b) Each valid grievance has an action plan. * Record review: 10 out of 10 communications to managers and workers covering the period October 2023 to September 2024 confirm written information on how to report a grievance is clearly communicated. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
B.M.4) PERFORMANCE REVIEW AND CONTINUOUS IMPROVEMENT	
Question #	VAP-B.M.4.1
Question Text	An adequate and effective occupational health and safety management performance review and continuous improvement process is established.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety management performance review and continuous improvement process is established.

Important Notice

Validated Audit Report

Data points	* Record review: Organizational management procedure for ESH and risk management committee (Doc. No.: B0000-2512, Rev. G, issued date: 02 September 2024) a) Is adequate. b) Is effective. c) Defines the annual review process: c.a) By senior management. c.b) Of the management system. c.c) Of the performance. d) Mandates additional action plans if indicator, objective or target is off track. * Record review: ESH program goals and objectives management procedure (Doc. No.: B0000-2502, Rev. R, issued date: 23 October 2023) a) Is adequate. b) Is effective. c) indicators. d) objectives. e) targets. f) Timeline: Goals must clearly define the period considered: f.a) Time Period is forward looking. f.b) Base date: 1 January 2024. f.c) Target date: 31 December 2024. f.d) Baseline: Disabling Injury Severity Rate: 18 . f.e) Targeted improvement value: 8. * Record review: 5 out of 5 occupational health & safety performance action plans covering the period October 2023 to September 2024 exist for each indicator, objective or target that is off-track. * Record review: Occupational Health & safety performance target tracking form (Doc. No: Nil, Rev. Nil, Issue date: 01 October 2024) demonstrates each indicator, objective or target has progress reported regularly. * Record review: 5 out of 5 Occupational health & safety system evaluation reports covering the period October 2023 to September 2024 confirm regular Control effectiveness verification for a) Control effectiveness. b) Training. c) Every program. d) Communication. e) Grievances. f) Safety concerns. * Record review: 2 out of 2 System review meeting minutes covering the period October 2023 to September 2024 confirm a) Management reviews the system regularly and include b) Meeting presentation materials/analysis/data. c) Formal target, indicator, and objective tracking. d) Regular progress reporting. e) Evaluation reports for (at least). e.a) Control effectiveness. e.b) Training. e.c) Communication. e.d) Grievances. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B.M.4.2
Question Text	An adequate and effective occupational health and safety self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Data points	* Record review: ESH management system internal audit procedure (Doc. No.: B0000-2511, Rev. N, issued date: 07 August 2024) a) Is adequate. b) Is effective. c) Mandates periodically assess conformance with: c.a) Applicable regulatory requirements. c.b) RBA Code requirements. c.c) Own policies, standards and management system. c.d) Other requirements to which the facility subscribes. d) States audit findings are reviewed by senior management. * Record review: 2 out of 2 occupational health & safety self-audits reports covering the period October 2023 to September 2024 demonstrate a) Self-audits are performed regularly. b) Audit findings are reviewed by senior management. c) self-audit identified the non-conformance of this audit. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-B.M.4.3
Question Text	An adequate and effective occupational health and safety corrective action process is established to rectify and close non-conformances.
Rating	Conformance
Conclusion	An adequate and effective occupational health and safety corrective action process is established to rectify and close non-conformances.

Responsible Business Alliance
Advancing Sustainability Globally

Data points	* Record review: CAPA for incidents, false alarms and non-conformity operation procedure (Doc. No.: B0000-2509, Rev. L, issued date: 30 September 2024) a) Is adequate. b) Is effective. c) Corrective action plans and tracking tables. d) Additional actions are taken when a corrective action is off-track. e) A demonstrated link between the CAP and the performance management objectives and targets. f) All actions must be verifiably closed. g) Closure of action items is confirmed by a management representative after verification by the appropriate person. h) If any non-conformance is confirmed a recorded corrective action is implemented. i) Appropriate preventive actions as a result of medical surveillance or injury: i.a) Workers are removed from the current job immediately and offered another position in the facility. i.b) labor contract termination is prohibited due to the medical surveillance results. i.c) medical treatment to the worker is provided. i.d) re-examination of the worker is required. i.e) all medical treatment, re-examination, and rehabilitation cost for the worker are paid by employer. * Record review: 2 out of 2 health & safety self-audits reports covering the period October 2023 to September 2024 demonstrate the non-conformance findings are recorded. * Record review: 2 out of 2 health & safety government inspection reports covering the period October 2021 to September 2024 demonstrate have not identified any non-conformances. * Record review: 4 out of 4 health & safety corrective action plans covering the period October 2023 to September 2024 demonstrate a) self-audit findings have a corrective action plan for each finding. b) government inspection records have not identified any non-conformances findings. c) the communication with the agencies are available for review. d) Off-track indicators, objectives and targets have a corrective action plan. e) management system review findings have a correction action plan. f) Closure verification with mgmt. confirmation exist for each corrective action plan item. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
C) ENVIRONMENT	
C1) ENVIRONMENTAL PERMITS AND REPORTING	
Question #	VAP-C1.1
Question Text	All required permits, licenses and test reports for environment are in place and communicated timely to the government (if required).
Rating	Conformance
Conclusion	All required permits, licenses and test reports for environment are in place and communicated timely to government.
Data points	* Site observation: a) Permits related to special equipment are posted when required. b) Licenses related to special equipment are posted when required. c) Test results related to special equipment are posted when required. d) Required postings are current and located in public view. * Record review: Waste Disposal Plan Permit (Doc. No.: L9506056, Rev. Nil, issued date: 19 April 2024) indicates the facility applies related plan and approved by local authority. * Record review: 2 out of 2 Air Emission Permits covering the period October 2023 to September 2024 indicates the facility applies air emission permits and approved by local authority. * Record review: Water Pollution Prevention Permit (Doc. No.: LD003-17, Rev. Nil, issued date: 10 October 2023) indicates the facility applies water pollution prevention permit and approved by local authority. * Record review: Factory registration license (Doc. No.: 93-A00026, Rev. Nil, issued date: 25 November 2019) indicates that the facility has obtained legal required license to extend the work process, capacity, and the environmental final acceptance reports for the extension shall be finished before being put into production. * Record review: 3 out of 3 Boundary noise test reports covering the period October 2023 to September 2024 are in place, up-to-date and accurate. * Record review: Class A Waste Disposal Technician Certificate (Doc. No.: (111)HA150529, Rev. Nil, issued date: 24 May 2022) is in place, up-to-date and accurate. * Record review: 3 out of 3 Class A Dedicated Wastewater And Sewage Treatment Specialists certificates covering the period October 2023 to September 2024 are in place, up-to-date and accurate. * Record review: 2 out of 2 Class A Dedicated Air Pollution Control Specialist certificates covering the period October 2023 to September 2024 are in place, up-to-date and accurate. * Record review: 10 out of 10 Waste and Emission Discharge Declaration Reports to the government covering the period October 2023 to September 2024 are in place, up-to-date and accurate. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations regarding required postings. * Supporting evidence reference(s): N/A
C2) HAZARDOUS SUBSTANCES	
Question #	VAP-C2.1
Question Text	Hazardous waste is responsibly disposed of using government-approved and/or licensed vendors
Rating	Conformance
Conclusion	Hazardous waste is responsibly disposed of using government-approved and licensed vendors.

Validated Audit Report

Data points	* Record review: 10 out of 10 non-government transport and disposal vendors assessments covering the period October 2023 to September 2024 demonstrate: a) Assessment reports for each non-government transport and disposal vendor. b) For each assessment of a non-government transport and disposal vendor possible areas for improvement are established. * Record review: 10 out of 10 hazardous waste inventory records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. * Record review: 10 out of 10 hazardous waste inspection records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) In place for each hazardous waste. d) In place for each point of storage of hazardous waste. * Record review: 10 out of 10 copies of hazardous waste shipping papers covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. * Record review: 10 out of 10 non-government transport and disposal vendors licenses covering the period October 2023 to September 2024 are a) Current. b) Approved by the local regulatory authorities. c) Certificates by the local regulatory authorities. d) Maintained for all non-government transport and disposal vendors. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 2 workers who handle hazardous waste) confirm the audit observations. * Supporting evidence reference(s): N/A
C3) SOLID WASTE	
Question #	VAP-C3.1
Question Text	Solid waste is managed and disposed of responsibly.
Rating	Conformance
Conclusion	Solid waste is managed and responsibly disposed of.
Data points	* Site observation: a) Engineering controls are adequate and effective. b) Waste is adequately and effectively categorized. c) Waste is adequately and effectively handled. d) Waste is adequately and effectively stored. e) Waste is adequately and effectively moved within a single facility. f) Waste access is controlled. g) Waste is adequately and effectively segregated. h) Waste has adequately and effectively secondary containment. i) Waste is adequately and effectively ventilated. j) Waste has adequate and effective fire protection. k) Potential employee exposure methods are adequate and effective. * Record review: 10 out of 10 waste inventory records covering the period October 2023 to September 2024 are a) Accurate b) Maintained. * Record review: 10 out of 10 waste inspection records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) In place for each waste. d) In place for each point of storage of waste. e) Demonstrating process and administrative controls are effective. * Record review: 10 out of 10 copies of waste shipping papers covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. * Record review: 10 out of 10 non-government transport and disposal vendors licenses covering the period October 2023 to September 2024 are a) Current. b) Approved by the local regulatory authorities. c) Certificates by the local regulatory authorities. d) Maintained for all non-government transport and disposal vendors. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 2 workers who handle waste) confirm the audit observations. * Supporting evidence reference(s): N/A
C4) AIR EMISSIONS	
Question #	VAP-C4.1
Question Text	Air emissions and the performance of air emission control systems are routinely monitored.
Rating	Conformance
Conclusion	Air emissions and the performance of air emission control systems are routinely monitored.

Responsible Business Alliance
Advancing Sustainability Globally

Validated Audit Report

Data points	* Site observation: a) Engineering controls are adequate and effective. b) Air emission treatment equipment is well maintained. c) Air emission treatment equipment is appropriate. d) Air emission treatment equipment is identified. e) Air emissions are treated prior to discharge in accordance with permit requirements. f) Ozone-depleting substances are clearly labeled. * Record review: 10 out of 10 maintenance records covering the period October 2023 to September 20243 are a) Accurate. b) Maintained. c) Showing that air emission treatment equipment is in good working order. * Record review: 10 out of 10 air treatment equipment evaluation records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Showing emission treatment equipment efficiency is as required. d) Showing emission treatment equipment integrity is as required. e) Showing process and administrative controls are effective. * Record review: 10 out of 10 air treatment equipment inspection records covering the period of October 2023 to September 2024 are a) Accurate. b) Maintained. c) Showing emission treatment equipment efficiency is as required. d) Showing emission treatment equipment integrity is as required. e) Showing process and administrative controls are effective. * Record review: Emissions List (Doc. No: Nil, Rev. Nil, Issue date: 15 October 2023) is a) accurate. b) maintained. c) up to date. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 2 workers who handle air emissions) confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C4.2
Question Text	Environmental noise levels are within regulatory limits.
Rating	Conformance
Conclusion	Environmental noise levels are within regulatory limits.
Data points	* Site observation: a) Engineering controls are adequate and effective. b) No excessive boundary noise. c) Boundary noise control devices are well maintained. d) Boundary noise control devices are appropriate. e) Boundary noise control devices are identified. * Record review: 3 out of 3 maintenance records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Demonstrate routine preventive maintenance. d) Boundary noise control devices are in good working order. * Record review: 3 out of 3 Environmental noise monitoring records covering the period of October 2023 to September 2024 are a) Accurate. b) Maintained. c) Showing boundary noise control is maintained and accurate. d) Showing process and administrative controls are effective. * Record review: 3 out of 3 boundary noise control device inspection records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Showing boundary noise control device efficiency is maintained and accurate. d) Showing process and administrative controls are effective. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 2 workers who handle noise emissions) confirm the audit observations. * Supporting evidence reference(s): N/A
C5) WATER MANAGEMENT	
Question #	VAP-C5.1
Question Text	Adequate and effective process are in place to record, characterize, and monitor water sources, water discharge and control channels of contamination.
Rating	Conformance
Conclusion	Adequate and effective process are in place to record, characterize, and monitor water sources, water discharge and control channels of contamination.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Data points	* Site observation: a) Engineering controls are adequate and effective. b) Water channels are protected from contamination. c) Water channels appear free of contamination. d) The source of water is clear. e) Water withdrawal doesn't appear to heavily impact local waterbodies. f) Water discharge points don't appear to heavily impact local waterbodies. g) Equipment is compatible with the waste materials being stored. h) Equipment is compatible with the waste materials being transported. i) Industrial wastewater is treated in accordance with permit requirements. j) sanitary wastewater is treated in accordance with permit requirements. k) Wastewater treatment system is in operation. l) Wastewater treatment system is well maintained. m) Wastewater treatment system appears to be operating effectively based on visual inspection. n) Appropriate emergency response equipment and materials are in place to respond to a possible water channel contamination. * Record review: 10 out of 10 water and wastewater inventory records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. * Record review: 10 out of 10 wastewater inspection records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Available for each wastewater. d) Available for each point of storage and discharge of wastewater. e) Showing the process and administrative controls are effective. f) Showing wastewater treatment system efficiency is as required. g) Showing wastewater treatment system integrity is as required. * Record review: Wastewater manifests and shipping papers are not applicable as no wastewater is collected and charged by wastewater vendor. * Record review: Non-government transport and disposal vendors licenses are not applicable as no wastewater is collected and discharged by wastewater vendor. * Record review: 10 out of 10 water channel contamination logs covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Listing all potential contamination sources to water channels. d) Listing all water channel contamination sources. e) Describing spills and water channel contamination. * Record review: Spill and water channel contamination log (Doc. No: Nil, Rev. Nil, Issue date: 01 January 2024) states clearly a) the source of water and b) water channel contamination sources. * Record review: 10 out of 10 maintenance records covering the period October 2023 to September 2024 are: a) Accurate. b) Maintained. c) Demonstrate routine preventive maintenance d) Waste water treatment is in good working order. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (including 2 workers who handle wastewater) confirm the audit observations. * Supporting evidence reference(s): N/A
C6) ENERGY CONSUMPTION AND GREENHOUSE GAS EMISSIONS	
Question #	VAP-C6.1
Question Text	Energy consumption and all scopes 1, 2, and significant categories of Scope 3 Greenhouse gas (GHG) emissions are tracked, documented, and publicly reported against an absolute corporate-wide GHG reduction goal.
Rating	Conformance
Conclusion	Energy consumption and all scopes 1, 2, and significant categories of Scope 3 Greenhouse gas (GHG) emissions are tracked, documented, and publicly reported against an absolute corporate-wide GHG reduction goal.
Data points	* Site observation: a) Engineering controls are adequate and effective. b) There is no significant energy consumption or GHG emissions at the facility that are not tracked and recorded. * Record review: 5 out of 5 energy use inventory records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Showing all sources of electricity are documented. d) Showing all sources of other energy are documented. e) Showing all sources of electricity consumption are recorded and accurate by source. e.a) inducing purchased electricity. f) Showing all sources of other energy consumption is recorded and accurate by source. f.a) including renewable energy use. f.b) including fuel combusted on-site. * Record review: 5 out of 5 Scope 1, 2 and 3 GHG emission records covering the period October 2023 to September 2024 are a) Accurate. b) Maintained. c) Showing all sources of GHG emissions. d) Showing all types of GHG. e) Showing the amount of emission by relevant period by GHG type. f) with a description of its boundary. * Record review: 5 out of 5 copies of energy purchase records covering the period October 2023 to September 2024 are a) Complete. b) Maintained. c) Including all sources of energy used. d) Showing the amount of energy used by energy type. e) Demonstrating the sources of electricity consumption are recorded and accurate by source. * Record review: Significant scope 3 GHG category assessment (Doc. No: Nil, Rev. Nil, Issue date: 04 March 2024) states: a) Significant scope 3 GHG categories. b) Determined through a materiality / similar process. c) Documented. d) Tracked. e) Up-to-date. f) Includes category 1 (purchased goods and services). * Record review: Corporate publication (Doc. No: Nil, Rev. Nil, Issue date: 17 April 2024): a) Includes absolute corporate-wide reduction target b) Includes absolute corporate-wide performance c) is publicly reported d) at least annually. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
C.M.1) RISK ASSESSMENT	
Question #	VAP-C.M.1.1
Question Text	An adequate and effective environment compliance process is established to monitor, identify, understand and ensure compliance with applicable laws and regulations and customer requirements.

Validated Audit Report

Rating	Conformance
Conclusion	An adequate and effective environment compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Data points	* Record review: ESH regulations identification and inspection management procedure (Doc. No.: B0000-2501, Rev. O, issued date: 16 October 2023) states a) Compliance procedure: a.a) Is adequate. a.b) Is effective. a.c) Quarterly review: a.d) Including applicable legal requirements. a.e) Including applicable customer requirements. to a.f.a) Identify. a.f.b) Track. a.f.c) Assess. a.f.d) Integrate. a.f.e) Implement. a.f.f) Record. b) To ensure timely renewal before the expiration of: b.a) Permits. b.b) Licenses. b.c) Testing reports. * Record review: Environmental compliance calendar (Doc. No: Nil, Rev. Nil, Issue date: 19 September 2024) confirms the compliance calendar: a) Is accurate. b) Is up to date. c) Includes applicable legal requirements. d) Includes applicable customer requirements. e) Has a reminder system. * Record review: Environmental compliance register (Doc. No: Nil, Rev. Nil, Issue date: 02 October 2024) confirms the compliance register: a) Is accurate. b) Is up to date. c) Has summaries of applicable laws and regulations. d) Contains reviews of the key customer requirements that impact the operations as these related to the RBA code. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential environmental risks where the facility caused or contributed to adverse environmental impacts for internal and external stakeholders (including applicable requirements).
Rating	Conformance
Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential environmental risks where the facility caused or contributed to adverse environmental impacts for internal and external stakeholders (including applicable requirements).
Data points	* Record review: stakeholder identification procedure (Doc. No.: Nil, Rev. Nil, issued date: 17 April 2024) states the process which is a) Adequate. b) effective. for c) internal stakeholders. d) external stakeholders. for environment. * Record review: Internal and external stakeholder list for environment (Doc. No: Nil, Rev. Nil, Issue date: 17 April 2024) which includes all identified internal and external stakeholders including at a minimum: a) Direct and indirect workers. b) No young workers. c) No foreign migrant workers. No internal migrant workers. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. * Record review: ESH risk assessment procedure (Doc. No.: B0000-2501, Rev. O, issued date: 16 October 2023) states: a) risk assessment procedure: a.a) Adequate. a.b) Effective. a.c) Each identified risk has an action to minimize such risk through the Hierarchy of Controls. a.d) identify the most significant risks. a.e) a documented gated process, demonstrating that each hierarchy level has been fully evaluated and reasons why it could not address the risk fully before proceeding to the next hierarchal level. a.e.a) including applicable legal requirements. a.e.b) including applicable customer requirements. a.f) The risk assessment is updated when there is a Significant Change. b) Scope of the risk assessment includes: b.a) Every task. b.b) Every site operation/process. b.c) Every Physical location. b.d) Every environmental medium. b.e) Greenhouse Gas impact. b.f) Ozone-depleting substances (ODS) impact. b.g) Every chemical or material used and exposure to multiple chemicals. b.h.c) All identified internal and external stakeholders b.h.c.a) Direct and indirect workers. b.h.c.b) No young workers. b.h.c.c) No foreign migrant workers. No internal migrant workers. b.h.c.d) Worker representatives b.h.c.e) Staff functions b.h.c.f) On-site service providers b.h.c.g) Suppliers b.h.c.h) Customers b.h.c.i) Stakeholders immediately neighboring the auditee. * Record review: 5 out of 5 environmental risk assessments covering each month of the period October 2023 to September 2024 demonstrate a) Are accurate. b) Are complete. c) Are up-to-date. d) Each identified risk has an action to minimize such risk through the Hierarchy of Controls. e) The environmental risk assessments identify the most significant risks: e.a) including applicable legal requirements. e.b) including applicable customer requirements. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
C.M.2) CONTROL PROCESSES	
Question #	VAP-C.M.2.1
Question Text	Environment responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Rating	Conformance
Conclusion	Environment responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Validated Audit Report

Data points	* Record review: ESH management system manual (Doc. No.: B0000-0040, Rev. T, issued date: 06 September 2024) confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) To ensure compliance with the requirements of the RBA. c) Is authorized to implement: c.a) programs. c.b) process actions. c.c) corrective actions as needed for regulatory compliance and RBA conformance. It confirms a) Responsibilities of each organizational level are recorded. b) Authorities of each organizational level are recorded. c) For normal situations. d) For emergency situations. e) A specific individual or individuals responsible for all aspects of: e.a) Hazardous materials. e.b) Waste. e.c) Air emission treatment is not required. e.d) Environmental noise. e.e) Wastewater. e.f) Energy and GHG. e.g) Ozone-depleting substances. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C.M.2.2
Question Text	Adequate and effective environment policies and control processes are established.
Rating	Conformance
Conclusion	Adequate and effective environmental policies and control processes are established.
Data points	* Record review: ESH program goals and objectives management procedure (Doc. No.: B0000-2502, Rev. R, issued date: 23 October 2023) a) Is adequate. b) Is effective. c) Requires the reduction and elimination of ozone-depleting substance (ODS). d) Requires the reduction and elimination of energy and GHG. e) Requires the reduction and elimination of the use of natural resources. f) Requires the reduction and elimination of raw materials and resulting waste. * Record review: Environmental Responsibility Policy (Doc. No: Nil, Rev. Nil, Issue date: August 2024) states the details of the programs to conserve the use of natural resources. * Record review: Waste disposal management procedure (Doc. No: B0000-2506, Rev. R, Issue date: 27 May 2024) a) Is adequate. b) Is effective. c) Defines the reception of waste within the facility. d) Defines the storage of waste within the facility. e) Defines the dispensing of waste within the facility. f) Defines the use of waste within the facility. g) Defines the disposal of waste. h) Is specific for each hazardous waste. * Record review: Greenhouse gas inventory management procedure (Doc. No: B0000-2514, Rev. C, Issue date: 22 February 2024) a) Is adequate. b) Is effective. c) for each ozone-depleting substance. d) includes identification. e) includes labeling. f) includes safe disposal. g) Ozone depleting substances record keeping has: g.a) Appropriate retention (on and off site). g.b) Appropriate levels of access to ensure privacy. g.c) Conforming to legal and customer requirements. * Record review: ESH management system manual (Doc. No.: B0000-0040, Rev. T, issued date: 06 September 2024) a) Is adequate. b) Is effective. c) Each of the policy requirements has an effective implementation and control process. c.a) Demonstrates that each hierarchy level has been fully evaluated. c.b) States the reasons why it could not address the risk fully before proceeding to the next hierarchy level. d) Requires a preventive maintenance process for all treatment equipment for each environmental medium. e) Requires an investigation of each environmental incident resulting in a preventive and corrective action plan. f) Defines the adequate and effective emergency response process with clearly defined steps and roles and responsibilities. * Record review: 10 out of 10 environmental records covering the period October 2023 to September 2024 demonstrate a) Appropriate retention on-site. b) Appropriate retention off-site. c) Appropriate levels of access to ensure privacy. d) Conforming to legal requirements. e) Conforming to customer requirements. * Record review: 5 out of 5 Risk control reports covering the period October 2023 to September 2024 a) Are accurate. b) Are complete. c) Are update to date. d) Demonstrate the effectiveness controls are evaluated on a regular basis. e) Show procedural controls are recorded. f) Where controls are not yet in place, an implementation plan (with owners and due date) is in place and on track. * Record review: 5 out of 5 environment controls effectiveness evaluations covering the period October 2023 to September 2024 demonstrate controls are evaluated on a regular basis. * Record review: 3 out of 3 Environmental mitigation plan covering the period October 2023 to September 2024 a) Are adequate. b) Are complete. c) Are update to date. d) Identify all significant actual and potential risks. d.a) Through the Hierarchy of controls. d.b) Improvement objectives in a documented gated process. d.c) Each hierarchy level has been fully evaluated and reasons why it could not address the risk fully before proceeding to the next hierarchal level. d.d) The status of implementation and resulting impact reduction including feedback of the affected internal and external stakeholders. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C.M.2.3
Question Text	An adequate and effective environment training process is established for all managers/workers on all policy/process/job related aspects and performance targets.
Rating	Conformance
Conclusion	An adequate and effective environment training process is established for all managers/workers on all policy/process/job-related aspects and performance targets.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Data points	* Record review: Instruction on ESH training (Doc. No.: B3600-0012, Rev. U, issued date: 14 June 2024) a) Is adequate. b) Is effective. c) For workers. d) For managers. e) Includes a new employee orientation plan. f) Ensures training is provided to all workers prior to the beginning of work. g) Workers responsible for storage, clean up or disposal of hazardous waste and waste receive specialized training. * Record review: Environmental training needs analysis (Doc. No: Nil, Rev. Nil, Issue date: 31 August 2024) confirms a) Minimum training topics include: a.a) Reduction programs. a.b) Hazardous waste handling, storage, and disposal. a.c) Solid waste handling, storage and disposal. a.d) Air emissions and air emission control systems. a.e) Water use, discharge, and internal water channel contamination protection. a.f) Storage and disposal. a.g) GHG/ Energy use, reduction, and maintaining energy and fuel-consuming operations. * Record review: New employee orientation plan (Doc. No: Nil, Rev. Nil, Issue date: 12 August 2024) confirms topics identified in the training needs analysis are included. * Record review: Environmental training plan (Doc. No: Nil, Rev. Nil, Issue date: 30 May 2024) confirms a) Topics identified in the training needs-analysis are included. b) Training frequency is adequate. c) Training is provided to all workers prior to the beginning of work. * Record review: 10 out of 10 environmental training materials covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training materials. * Record review: 10 out of 10 environmental training records covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training records for all attendees. * Record review: 10 out of 10 environmental training effectiveness evaluations covering the period October 2023 to September 2024 confirm each training on the training plan have adequate training verification records for all attendees. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers (no learners in the facility) confirm the audit observations. * Supporting evidence reference(s): N/A
C.M.3) COMMUNICATIONS	
Question #	VAP-C.M.3.1
Question Text	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational environmental practices and conditions and to foster continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational environmental practices and conditions and to foster continuous improvement.
Data points	* Site observation: a) Feedback channels are clearly communicated and visible. b) Environmental communication clearly posted in the facility in a location identifiable and accessible by workers. c) Clear Hazard signage. d) Clear hazard information is available at the point of use. * Record review: ESH management system consulting and communicating procedure (Doc. No.: B0000-2504, Rev. M, issued date: 23 October 2023) a) Is adequate. b) Is effective. c) Is effective ongoing d) Is two-way communication with e) Minimum internal and external stakeholders. e.a) Direct and indirect workers. e.b) No young workers. e.c) No foreign migrant workers. No internal migrant workers. e.d) Worker representatives. e.e) Staff functions. e.f) On-site service providers. e.g) Suppliers. e.g.a) Correspondence to supplier management. e.h) Customers. e.i) Stakeholders immediately neighboring the auditee. e.j) Public. e.j.a) Publicly report a corporate-wide GHG footprint. e.j.b) The value represents annual emissions. * Record review: 10 out of 10 communications to internal and external stakeholders covering the period October 2023 to September 2024 confirm requirements of code implementation have been communicated to at least the following internal and external stakeholders: a) Direct and indirect workers. b) No young workers. c) No foreign migrant workers. No internal migrant workers. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. j) The public. * Record review: 10 out of 10 communication effectiveness evaluations covering the period October 2023 to September 2024 demonstrate effectiveness verification is done regularly. * Record review: 10 out of 10 input and feedback records covering the period October 2023 to September 2024 demonstrate input and feedback from workers is adequately received. * Record review: GHG Report (Doc. No: Nil, Rev. Nil, Issue date: 17 April 2024) a) Represents annual emissions. b) Contains corporate-wide GHG footprint. c) Includes total scopes 1 GHG footprint. d) Includes total scopes 2 GHG footprint. e) Includes scope 3 GHG footprint for the identified significant scope 3 categories. f) The value shall represent annual emissions. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C.M.3.2
Question Text	An adequate and effective process is established to anonymously report environmental grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance

Conclusion	An adequate and effective process is established to anonymously report environmental grievances confidentially without fear of reprisal or intimidation.
Data points	* Site observation: a) Grievance channels are clearly communicated. b) Internal communication of the grievance mechanism is visible and in a language the workers can understand. * Record review: Company Internal Grievance Procedure (Doc. No.: B9920-1611, Rev. G, issued date: 26 October 2018) a) Is adequate. b) Is effective. c) Ensures grievances can be reported anonymously without fear of reprisal. d) Available for internal stakeholders. e) Available for external stakeholders. f) Clear grievance channels so reporting is encouraged and comfortable. g) Workers shall be encouraged to raise environmental concerns. * Record review: 10 out of 10 environmental concern logs covering the period October 2023 to September 2024 demonstrate grievances from stakeholders are adequately received. * Record review: 10 out of 10 environmental concern investigation records covering the period October 2023 to September 2024 demonstrate a) The validity of any grievance is promptly investigated. b) Each valid grievance has an action plan. * Record review: 10 out of 10 communications to managers and workers covering the period October 2023 to September 2024 confirm written information on how to report a grievance is clearly communicated. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
C.M.4) PERFORMANCE REVIEW AND CONTINUOUS IMPROVEMENT	
Question #	VAP-C.M.4.1
Question Text	An adequate and effective environment management performance review and continuous improvement process is established.
Rating	Conformance
Conclusion	An adequate and effective environmental management performance review and continuous improvement process is established.
Data points	* Record review: Organizational management procedure for ESH and risk management committee (Doc. No.: B0000-2512, Rev. G, issued date: 02 September 2024) a) Is adequate. b) Is effective. c) Defines the annual review process: c.a) By senior management. c.b) Of the management system. c.c) Of the performance. d) Reduction programs are structured with roles and responsibilities. e) Reduction programs do not harm workers or entail excessive cost. f) Includes a materiality assessment and updated when changes in machinery, process or materials used or facility occur. g) Mandates additional action plans if indicator, objective or target is off track. * Record review: ESH program goals and objectives management procedure (Doc. No.: B0000-2502, Rev. R, issued date: 23 October 2023) a) Is adequate. b) Is effective. c) indicators. d) objectives. e) targets. f) Scope 1 and Scope 2 GHG corporate-wide reduction target. g) For each material emission and discharge of pollutants, waste and natural resources: g.a) Timeline is clearly defined. g.a.a) Target span is a minimum of 2 years. g.a.b) Annual targets are incremental to a long-term goal. g.b) Time Period is forward looking. g.c) Base date: 1 January 2024. g.d) Target date: 31 December 2024. g.e) Baseline: Unit electricity consumption less than 24.61 MKWH/layer. g.f) Targeted improvement value: 24.61 MKWH/layer. h) Ozone depleting substances (ODS) impact. * Record review: 5 out of 5 environmental performance action plans covering the period October 2023 to September 2024 exist for each indicator, objective or target that is off-track. * Record review: Environmental Performance target tracking form (Doc. No: Nil, Rev. Nil, Issue date: 01 October 2024) demonstrates each indicator, objective and target has progress reported regularly. * Record review: Environmental materiality assessment report (Doc. Nil, Rev. Nil, Issue date: 14 May 2024) a) is based on each environmental aspect of the operation. b) is current. c) is adequate. d) is updated when changes in machinery, process or materials used or facility. * Record review: 5 out of 5 environmental system evaluation reports covering the period October 2023 to September 2024 confirm regular Control effectiveness verification for a) Control effectiveness. b) Training. c) Every program. d) Communication. e) Grievances. f) Environmental concerns. * Record review: 2 out of 2 System review meeting minutes covering the period October 2023 to September 2024 confirm a) Management reviews the system regularly and include b) Meeting presentation materials/analysis/data c) Formal target, indicator, and objective tracking d) Regular progress reporting e) Evaluation reports for (at least) e.a) Control effectiveness e.b) Training e.c) Communication e.d) Grievances. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C.M.4.2
Question Text	An adequate and effective environmental self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Rating	Conformance
Conclusion	An adequate and effective environmental self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.

Validated Audit Report

Data points	* Record review: ESH management system internal audit procedure (Doc. No.: B0000-2511, Rev. N, issued date: 07 August 2024) a) Is adequate. b) Is effective. c) Mandates periodically assess conformance with: c.a) Applicable regulatory requirements. c.b) RBA Code requirements. c.c) Own policies, standards and management system. c.d) Other requirements to which the facility subscribes. d) States audit findings are reviewed by senior management. * Record review: 2 out of 2 environmental self-audits reports covering the period October 2023 to September 2024 demonstrate a) Self-audits are performed regularly. b) Audit findings are reviewed by senior management. c) no non-conformance on environment in this audit. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-C.M.4.3
Question Text	An adequate and effective environmental corrective action process is established to rectify and close non-conformances.
Rating	Conformance
Conclusion	An adequate and effective environmental corrective action process is established to rectify and close non-conformances.
Data points	* Record review: CAPA for incidents, false alarms and non-conformity operation procedure (Doc. No.: B0000-2509, Rev. L, issued date: 30 September 2024) a) Is adequate. b) Is effective. It contains: c) Corrective action plans and tracking tables. d) Additional actions are taken when corrective action is off-track. e) A demonstrated link between the CAP and the performance management objectives and targets. f) All actions must be verifiably closed. g) Closure of action items is confirmed by a management representative after verification by the appropriate person. h) Preventive/corrective actions plan for past spills, contamination, and environmental incidents. i) If any non-conformance is confirmed a recorded corrective action is implemented. * Record review: 2 out of 2 environmental self-audits reports covering the period October 2023 to September 2024 demonstrate the non-conformance findings are recorded. * Record review: 2 out of 2 environmental government inspection reports covering the period October 2021 to September 2024 demonstrate the copies of any regulatory citations/violation notices received are available for review. * Record review: 3 out of 3 environmental corrective action plans covering the period October 2023 to September 2024 demonstrate a) Self-audit findings have a corrective action plan for each finding. b) government inspection records have not identified any non-conformances findings. c) the communication with the agencies are available for review. d) Off-track indicators, objectives and targets have a corrective action plan. e) Management system review findings have a correction action plan. f) Closure verification with mgmt. confirmation exist for each corrective action plan item. * Management interview: Ms. Pei-Hui LIN / Deputy Manager and Ms. Tzu-Yi CHEN / Principal Engineer confirm the audit observations. * Supporting evidence reference(s): N/A
D) ETHICS	
D1) BUSINESS INTEGRITY AND NO IMPROPER ADVANTAGE	
Question #	VAP-D1.1
Question Text	No identified risk or evidence of bribes or obtaining undue or improper advantage being promised, offered, authorized, given or accepted.
Rating	Conformance
Conclusion	No identified risk or evidence of bribes or obtaining undue or improper advantage being promised, offered, authorized, given or accepted.
Data points	* Record review: 10 out of 10 pieces of public information covering the period of October 2023 to September 2024 does not reveal any current cases or allegations of a) Bribery. b) Improper advantage. c) Corruption. d) Extortion. * Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 does not reveal any current cases or allegations of a) Bribery. b) Improper advantage. c) Corruption. d) Extortion. e) Embezzlement. * Record review: 20 out of 20 declarations of conflict of interest covering the period of October 2023 to September 2024 a) Are recorded. b) Are adequate. c) For Direct workers. d) For indirect workers. * Record review: 20 out of 20 personnel files confirm no negative consequence for any worker or employee refusing to do anything in Non-conformance with the “highest standard of integrity” policy. * Record review: 10 out of 10 leave records covering the period October 2023 to September 2024 confirm no negative consequence for any worker or employee refusing to do anything in Non-conformance with the “highest standard of integrity” policy. * Record review: 5 out of 5 disciplinary records covering the period October 2023 to September 2024 confirm no negative consequence for any worker or employee refusing to do anything in Non-conformance with the “highest standard of integrity” policy. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
D2) DISCLOSURE OF INFORMATION	

Validated Audit Report

Question #	VAP-D2.1
Question Text	No evidence of misreporting, record falsification, misrepresentation or evidence of communicating inaccurate information to the public
Rating	Conformance
Conclusion	No evidence of misreporting, record falsification, misrepresentation, or evidence of communicating inaccurate information to the public.
Data points	* Site observation: Company information posted is accurate. * Record review: 10 out of 10 pieces of public information covering the period of October 2023 to September 2024 demonstrate: a) All company information is accurate. b) All publicly communicated company information is accurate, including a) Job posting. b) Product details. c) Company/facility promotion. d) Commercial advertising. e) Press releases. f) Website. * Record review: Annual report of financial audit (Doc. No: NA, Rev. NA, Issue date: 6 February 2024) a) About the Auditee's business operations is available. b) Does not show discrepancy with other company information. * Record review: 10 out of 10 Communications with suppliers covering the period of October 2023 to September 2024 a) Include labor practices. b) Include occupational health and safety practices. c) Include environmental practices. d) Include ethics practices. e) Include organizational structure. f) Include financial situation. g) Include performance for each code area. h) All information is accurate. * Record review: 10 out of 10 Communications with customers covering the period of October 2023 to September 2024 a) Include labor practices. b) Include occupational health and safety practices. c) Include environmental practices. d) Include ethics practices. e) Include organizational structure. f) Include financial situation. g) Include performance for each code area. h) All information is accurate. * Record review: 10 out of 10 pieces of information reviewed during the audit covering the period of October 2023 to September 2024 a) Are accurate. b) Prove no attempt of or falsification of records. c) Demonstrate no attempt of or misrepresentation of conditions or practices. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
D3) INTELLECTUAL PROPERTY	
Question #	VAP-D3.1
Question Text	No evidence of Intellectual Property or business information loss or unauthorized disclosure (the Reviewee's own and that of their customers/suppliers).
Rating	Conformance
Conclusion	No evidence of Intellectual Property or business information loss or unauthorized disclosure (the Auditee's own and that of their customers/suppliers).
Data points	* Site observation: a) IP information is visibly protected. b) business information visibly protected. * Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) states: a) Is adequate. b) Is effective. c) Includes administrative control and d) IT control. e) to access IT systems and. f) to access IP. g) of business information. * Record review: 20 out of 20 protection agreements covering the period of October 2023 to September 2024 Are in place for: a) All employees. b) All workers. c) All suppliers. d) All customers. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 2 out of 2 office workers confirm the audit observations. * Supporting evidence reference(s): N/A
D4) FAIR BUSINESS, ADVERTISING AND COMPETITION	
Question #	VAP-D4.1
Question Text	No identified risk or evidence of non-conformance with fair business, advertising and competition standards.
Rating	Conformance
Conclusion	No identified risk or evidence of non-conformance with fair business, advertising, and competition standards.
Data points	* Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate no confirmed and unactioned cases on fair business, fair advertising or fair competition. * Record review: 10 out of 10 grievance investigation records covering the period October 2023 to September 2024 demonstrate: a) Each case is investigated. b) Each investigation is documented. c) Each investigation has a conclusion matching the investigation results. d) Each investigation that confirms the allegation has a documented action plan. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 2 out of 2 office workers confirm the audit observations. * Supporting evidence reference(s): N/A

Validated Audit Report

D5) PROTECTION OF IDENTITY AND NON-RETALIATION	
Question #	VAP-D5.1
Question Text	No evidence of retaliation or reduced protection of identity.
Rating	Conformance
Conclusion	No evidence of retaliation or reduced protection of identity.
Data points	* Record review: 10 out of 10 grievance records covering the period October 2023 to September 2024 demonstrate no forms of retaliation. * Record review: 10 out of 10 grievance investigation records covering the period October 2023 to September 2024 demonstrate: a) no forms of retaliation. a) Each case is investigated. b) Each investigation is documented. c) Each investigation has a conclusion matching the investigation results. d) Each investigation that confirms the allegation has a documented action plan. * Record review: 10 out of 10 grievance communications records covering the period October 2023 to September 2024 demonstrate no breach of the protection of identity. * Record review: 20 out of 20 personnel files confirm a) no forms of retaliation. b) no redundancies as a form of retaliation. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
D6) PRIVACY	
Question #	VAP-D6.1
Question Text	No evidence of unauthorized disclosure of personal information.
Rating	Conformance
Conclusion	No evidence of unauthorized disclosure of personal information.
Data points	* Site observation: Personal information is visibly protected. * Record review: 10 out of 10 pieces of information covering the period of October 2023 to September 2024 demonstrate: a) No information is viewable to someone unauthorized. b) with the individual-specific approval information is only. b.a) collected. b.b) stored. b.c) processed. b.d) transmitted. b.e) shared. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
D.M.1) RISK ASSESSMENT	
Question #	VAP-D.M.1.1
Question Text	An adequate and effective ethics compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Rating	Conformance
Conclusion	An adequate and effective ethics compliance process is established to monitor, identify, understand, and ensure compliance with applicable laws, regulations, and customer requirements.
Data points	* Record review: Laws and Regulation Requirement Management Procedure (Document No.: B0000-3401, Rev. C, Issued date: 10 September 2018) states: a) compliance procedure: a.a) Adequate. a.b) Effective. a.c) quarterly review. a.d) including applicable legal requirements. a.e) including applicable customer requirements. to a.f.a) Identify. a.f.b) Assess. a.f.c) Integrate. a.f.d) Implement. a.f.e) Records. b) to ensure timely renewal for the expiration of: b.a) permits. b.b) licenses. b.c) testing reports. * Record review: Ethics compliance calendar (Doc. No: Nil, Rev. Nil, Issue date: 30 August 2024) confirms the compliance calendar: a) Is accurate. b) Is up to date. c) Includes applicable legal requirements. d) Includes applicable customer requirements. e) Has a reminder system. * Record review: Ethics compliance register (Doc. No: Nil, Rev. Nil, Issue date: 23 February 2024) confirms the compliance register: a) Is accurate. b) Is up to date. c) Has summaries of applicable laws and regulations. d) Contains reviews of the key customer requirements that impact the operations as these related to the RBA code. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-D.M.1.2
Question Text	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential ethics risks where the facility caused or contributed to adverse ethics impacts (including applicable requirements).
Rating	Conformance

Validated Audit Report

Conclusion	An adequate and effective due diligence process is established to identify and assess the most significant actual and potential ethics risks where the facility caused or contributed to adverse ethics impacts (including applicable requirements).
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, Issued date: 28 June 2024) states the process which is a) Adequate. b) Effective for c) internal stakeholders. d) external stakeholders for ethics. * Record review: Internal and external stakeholder list for ethics (Doc. No: NA, Rev. NA, Issue date: 4 January 2024) which includes all identified internal and external stakeholders including at a minimum: a) Direct and indirect workers. b) No young workers. c) No foreign migrant workers. No internal migrant workers. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. * Record review: Labor and Ethics Risk Assessment Procedure (Document No.: B9930-1306, Rev. A, issued date: 09 September 2020) states: a) risk assessment procedure that a.a) Uses the hierarchy of controls or equivalent. a.b) identifies the most significant actual and potential ethics risks where the facility caused or contributed to adverse labor impacts. a.b.a) including applicable legal requirements. a.b.b) including applicable customer requirements. a.c) Is updated when there is a Significant Change. a.d) Has a scope that includes: a.d.a) Every site operation/process. a.d.b) All physical locations. a.d.c) All identified internal and external stakeholders. a.d.c.a) Direct and indirect workers. a.d.c.b) No young workers. a.d.c.c) No foreign migrant workers. No internal migrant workers. a.d.c.d) Worker representatives. a.d.c.e) Staff functions. a.d.c.f) Suppliers. a.d.c.g) Customers. a.d.c.h) Stakeholders immediately neighboring the auditee. * Record review: 2 out of 2 ethics risk assessments covering each month of the period October 2023 to September 2024 a) Up-to-date. b)include legal and customer requirements. c) assess legal and customer requirements. d) identify how legal and customer requirements are integrated in the current management system. e) document how legal and customer requirements are implemented. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
D.M.2) CONTROL PROCESSES	
Question #	VAP-D.M.2.1
Question Text	Ethics responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Rating	Conformance
Conclusion	Ethics responsibilities and authorities are adequately and effectively defined and assigned for all employee levels (senior managers to workers) for the implementation of management systems, and for compliance with laws, regulations, and codes.
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) To ensure compliance with the requirements of the RBA. c) Is authorized to implement: c.a) Programs. c.b) Process actions. c.c) Corrective actions as needed. * Record review: Organizational chart and description (Doc. No: NA, Rev. NA, Issue date: 28 June 2024) confirms: a) Responsibilities of each organizational level are recorded. b) Authorities of each organizational level are recorded. c) For regular and emergency situations. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-D.M.2.2
Question Text	Adequate and effective ethics policies and control processes are established.
Rating	Conformance
Conclusion	Adequate and effective ethics policies and control processes are established.

Validated Audit Report

Data points	* Record review: Education Training Management Procedure (Document No.: B0000-1800, Rev. R, issued date: 27 June 2024) a) Is adequate. b) Is effective. c) For workers. d) For managers. e) Includes a new employee orientation plan. f) Training is provided to all workers prior to the beginning of work. * Record review: Ethics training needs analysis (Doc. No: Nil, Rev. Nil, Issue date: 29 December 2023) confirms a) Minimum training topics include: a.a) Upholding the highest standards of integrity in all business interactions. a.b) Obtaining undue or improper advantage being promised, offered, authorized, given, or accepted. a.c) Intellectual Property protection. a.d) Fair Business, Advertising and Competition. a.e) Non-retaliation or protection of identity. a.f) Unauthorized disclosure of personal information. * Record review: New employee orientation plan (Doc. No: Nil, Rev. Nil, Issue date: 7 March 2024) confirms topics identified in the training needs analysis are included. * Record review: Ethics training plan (Doc. No: Nil, Rev. Nil, Issue date: 7 March 2024) confirms a) Topics identified in the training needs analysis are included. b) Training frequency is adequate. c) Training is provided to all workers prior to the beginning of work. * Record review: 4 out of 4 ethics training materials covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training materials. * Record review: 4 out of 4 ethics training records covering each month of the period October 2023 to September 2024 confirm each training on the training plan have adequate training records for all attendees. * Record review: 4 out of 4 ethics training effectiveness evaluations covering the period October 2023 to September 2024 confirm each training on the training plan have adequate training verification records for all attendees. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers (no learners in the facility) confirm the audit observations. * Supporting evidence reference(s): N/A
D.M.3) COMMUNICATIONS	
Question #	VAP-D.M.3.1
Question Text	An adequate and effective ongoing two-way communication process with workers, internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational ethics practices and conditions and to foster continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective ongoing two-way communication process with workers, and internal and external stakeholders, where relevant or necessary, is established to obtain feedback on operational ethics practices and conditions and to foster continuous improvement.
Data points	* Site observation: Feedback channels are clearly communicated and visible. * Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Is effective ongoing d) Is two-way communication with e) Minimum internal and external stakeholders e.a) Direct and indirect workers. e.b) No young workers. e.c) No foreign migrant workers. No inernal migrant workers. e.d) Worker representatives e.e) Staff functions e.f) On-site service providers e.g) Suppliers e.h) Customers. e.i) Stakeholders immediately neighboring the auditee. f) Includes input and feedback from workers. * Record review: 10 out of 10 communications to internal and external stakeholders covering the period October 2023 to September 2024 confirm requirements of code implementation have been communicated to at least the following internal and external stakeholders: a) Direct and indirect workers. b) No young workers. c) No foreign migrant workers. No internal migrant worker in the facility. d) Worker representatives. e) Staff functions. f) On-site service providers. g) Suppliers. h) Customers. i) Stakeholders immediately neighboring the auditee. * Record review: 10 out of 10 communication effectiveness evaluations covering the period October 2023 to September 2024 demonstrate effectiveness verification is done regularly. * Record review: 10 out of 10 input and feedback records covering the period October 2023 to September 2024 demonstrate input and feedback from workers is adequately received. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-D.M.3.2
Question Text	An adequate and effective process is established to anonymously report ethics grievances confidentially without fear of reprisal or intimidation.
Rating	Conformance
Conclusion	An adequate and effective process is established to anonymously report ethics grievances confidentially without fear of reprisal or intimidation.

Important Notice
RBA CONFIDENTIAL - Internal use ONLY
The information in this report is strictly confidential and subject to the RBA Validated Audit Agreement.

Data points	* Site observation: a) Grievance channels are clearly communicated. b) Internal communication of the grievance mechanism is visible and in a language the workers can understand. * Record review: Internal Appealing Procedure (Document No.: 9920-1611, Rev. G, issued date: 26 October 2018) a) Is adequate. b) Is effective. c) Ensures grievances can be reported anonymously without fear of reprisal. d) Available for internal stakeholders. e) Available for external stakeholders. f) Clear grievance channels so reporting is encouraged and comfortable. * Record review: 10 out of 10 grievance records covering the October 2023 to September 2024 demonstrate grievances from stakeholders are adequately received. * Record review: 10 out of 10 grievance investigation records covering the period October 2023 to September 2024 demonstrate: a) the validity of any grievance is promptly investigated. b) Each valid grievance has an action plan. * Record review: 10 out of 10 communications to managers and workers covering the period October 2023 to September 2024 confirm written information on how to report a grievance is clearly communicated. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A
D.M.4) PERFORMANCE REVIEW AND CONTINUOUS IMPROVEMENT	
Question #	VAP-D.M.4.1
Question Text	An adequate and effective ethics management performance review and continuous improvement process is established.
Rating	Conformance
Conclusion	An adequate and effective ethics management performance review and continuous improvement process is established.
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Defines the annual review process: c.a) By senior management. c.b) Of the management system. c.c) Of the performance. d) Mandates additional action plans if indicator, objective or target is off track. * Record review: Working Rule (Document No.: B9910-1301, Rev. F, issued date: 18 March 2021) a) Is adequate. b) Is effective. c) Defines the annual review process: c.a) By senior management: c.b) Of the management system. c.c) Of the performance. d) Mandates additional action plans if indicator, objective or target is off track. * Record review: 4 out of 4 ethics performance action plans covering the period October 2023 to September 2024 exist for each indicator, objective or target that is off-track. * Record review: Ethics performance target tracking form (Doc. No: Nil, Rev. Nil, Issue date: 3 January 2024) demonstrates each indicator, objective and target has progress reported regularly. * Record review: 4 out of 4 ethics monitoring reports covering the period October 2023 to September 2024 demonstrate reports: a) Are current. b) Are adequate. c) Are updated on a regular basis. c.a) Include upholding the highest standards of integrity in all business interactions. c.b) Include obtaining undue or improper advantage being promised, offered, authorized, given or accepted. c.c) Include Intellectual Property protection. c.d) Include fair business, advertising and competition. c.e) Include non-retaliation or protection of identity. c.f) Include unauthorized disclosure of personal information. * Record review: 4 out of 4 ethics system evaluation reports covering the period October 2023 to September 2024 confirm regular control effectiveness evaluations are done for: a) Control effectiveness. b) Training. c) Every program. d) Communication. e) Grievances. f) Ethics concerns. * Record review: 2 out of 2 System review meeting minutes covering the period October 2023 to September 2024 confirm a) Management reviews the system regularly and include b) Meeting presentation materials/analysis/data. c) Formal target, indicator, and objective tracking. d) Regular progress reporting. e) Evaluation reports for (at least). e.a) Control effectiveness. e.b) Training. e.c) Communication. e.d) Grievances. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-D.M.4.2
Question Text	An adequate and effective ethics self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Rating	Conformance
Conclusion	An adequate and effective ethics self-audit process is established to assess conformance with the RBA Code and customer requirements periodically.
Data points	* Record review: Internal Control and Audit Standard (Document No.: B9920-0101, Rev. H, issued date: 01 August 2017) a) Is adequate. b) Is effective. c) Mandates periodically assess conformance with: c.a) Applicable regulatory requirements. c.b) RBA Code requirements. c.c) Own policies, standards and management system. c.d) Other requirements to which the facility subscribes. d) States audit findings are reviewed by senior management. * Record review: 2 out of 2 ethics self-audits reports covering the period October 2023 to September 2024 demonstrate: a) Self-audits are performed regularly. b) Audit findings are reviewed by senior management. c) Non-conformance on ethics is identified in this audit. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A

Validated Audit Report

Question #	VAP-D.M.4.3
Question Text	An adequate and effective ethics corrective action process is established to rectify and close non-conformances.
Rating	Conformance
Conclusion	An adequate and effective ethics corrective action process is established to rectify and close non-conformances.
Data points	* Record review: Internal Control and Audit Standard (Document No.: B9920-0101, Rev. H, issued date: 01 August 2017) a) Is adequate. b) Is effective. c) Defines the corrective action plans and tracking tables. d) Mandates additional actions are taken when a corrective action is off-track. e) Requires a demonstrated link between the CAP and the performance management objectives and targets. f) States all actions must be verifiably closed. g) Requires closure of action items is confirmed by a management representative after verification by the appropriate person. h) Mandates if any non-conformance is confirmed, a recorded corrective action is implemented. * Record review: 2 out of 2 ethics self-audits reports covering the period October 2023 to September 2024 demonstrate all non-conformances are identified. * Record review: No ethics government inspection report as there is no government inspection. * Record review: 2 out of 2 ethics corrective action plans covering the period October 2023 to September 2024 demonstrate: a) self-audit findings have a corrective action plan for each finding. b) no government inspection is conducted. c) no ethics government inspection reports as there is no government inspections. d) Off-track indicators, objectives and targets have a corrective action plan. e) management system review findings have a corrective action plan. f) Closure verification with mgmt. confirmation exist for each corrective action plan item. * Management interview: Ms. Ching-Wen PAN / HR Department Senior Professional Manager and Ms. Grace LO / TQC Department Senior Technology Manager confirm the audit observations. * Supporting evidence reference(s): N/A

E) SUPPLY CHAIN MANAGEMENT	
E1) COMPANY COMMITMENT	
Question #	VAP-E1.1
Question Text	An adequate and effective Code of Conduct is established and endorsed by executive management covering all elements of the RBA code.
Rating	Conformance
Conclusion	An adequate and effective Code of Conduct is established and endorsed by executive management covering all elements of the RBA code.
Data points	* Site observation: a) Code of Conduct is in a language understood by each worker. b) Code of Conduct is accessible to all workers. c) Code of Conduct is publicly available. * Record review: Responsible Business Alliance Code of Conduct Management Procedure (Doc. No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Covering all elements of the RBA code. b) Endorsed by the highest-level manager at the company. c) Includes a stated commitment to c.a) Due diligence c.b) Access to remedy for c.b.a) Internal stakeholders c.b.b) External stakeholders c.b.d) where the participant c.b.d.a) caused or contributed to c.b.d.b) adverse human rights and environmental impacts. c.c) Continuous improvement d) Appropriate for the nature and scope of the facility's operations. * Management interview: Ms. Grace LO / Senior Technology Manager confirms the audit observations. * Worker interview: 20 out of 20 workers confirm the audit observations. * Supporting evidence reference(s): N/A

E2) MATERIALS RESTRICTIONS	
Question #	VAP-E2.1
Question Text	An adequate and effective program is in place for Materials Restrictions as a formal part of the procurement and manufacturing processes.
Rating	Conformance
Conclusion	Adequate and effective program is in place for materials restrictions as a formal part of the procurement and manufacturing processes.

Validated Audit Report

Data points	* Record review: Hazardous Substance Free Policy (Doc. No: Nil, Rev. Nil, Issue date: Nil) a) Is adequate. b) Is effective. c) Requires chemical composition of materials. d) Requires chemical composition of packaging. e) Requires chemical composition of components. f) Requires chemical composition of products. g) Requires conformance with customer requirements. h) Requires conformance with legal requirements. * Record review: Hazardous Substances Management Procedure (Doc. No: B0000-4100, Rev. B, Issue date: 28 November 2022) a) Is adequate. b) Is effective. c) Requires chemical composition of materials. d) Requires chemical composition of packaging. e) Requires chemical composition of components. f) Requires chemical composition of products. g) Requires conformance with customer requirements. h) Requires conformance with legal requirements. i) Comparing customer requirements to own specifications. It confirms a senior representative is assigned responsibility a) To ensure compliance with laws and regulations. b) Is authorized to implement. b.a) programs. b.b) process actions. b.c) corrective actions as needed. * Record review: 10 out of 10 corporate proofs of implementation covering the period October 2022 to September 2024 demonstrate a) Assessment of the process to verify conformance. b) Analytical data from material/parts Suppliers. c) Statements and certificates of conformance. d) Chemical composition of the products. * Record review: Hazardous Substances Control Operation Management Specifications (Doc. No: B4000-0130, Rev. N, Issue date: 31 May 2024) a) Is adequate. b) Is effective. c) Includes chemical composition of materials. d) Includes chemical composition of packaging. e) Includes chemical composition of components. f) Includes chemical composition of products. g) Are conform with customer requirements. h) Are conform with legal requirements. i) Compares customer requirements to own specifications. * Record review: 10 out of 10 material restriction action plans covering the period October 2022 to September 2024 a) Restricted material restrictions on-track. b) An action plan for each indicator, objective or target which is off-track. * Record review: 10 out of 10 analytical data reports covering the period October 2022 to September 2024 are a) Available. b) Adequate. c) Current. d) Conform with material restriction requirements. * Record review: 10 out of 10 product chemical compositions covering the period October 2022 to September 2024 are a) Available. b) Adequate. c) Current. d) Conform with material restriction requirements. * Record review: 10 out of 10 certificates of conformance covering the period October 2022 to September 2024 are a) Available. b) Adequate. c) Current. d) Conform with material restriction requirements. * Record review: 10 out of 10 specifications from suppliers covering the period October 2022 to September 2024 are a) Available. b) Adequate. c) Current. d) Conform with material restriction requirements. * Record review: 10 out of 10 monitoring & reporting records covering the period October 2022 to September 2024 are a) Available. b) Adequate. c) Current. d) Conform with material restriction requirements. * Management interview: Ms. Grace LO / Senior Technology Manager confirms the audit observations. * Supporting evidence reference(s): N/A
E3) RESPONSIBLE SOURCING OF MINERALS	
Question #	VAP-E3.1
Question Text	An adequate and effective Conflict Minerals Supply Chain Policy and Management System is designed and implemented to reasonably assure that the tantalum, tin, tungsten, gold, and Cobalt (3TG+C) in the products they manufacture are sourced in a way consistent with the OECD Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD Due Diligence Guidance) or an equivalent and recognized due diligence framework.
Rating	Conformance
Conclusion	An adequate and effective Conflict Minerals Supply Chain Policy and Management System is designed and implemented to reasonably assure that the tantalum, tin, tungsten, gold, and Cobalt (3TG+C) in the products they manufacture are sourced in a way consistent with the OECD Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD Due Diligence Guidance) or an equivalent and recognized due diligence framework.

Validated Audit Report

Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Requires contracts for all next-tier suppliers. c.a) With the enforcement of the implementation of the RBA Code provisions. c.b) Labor agents and recruitment agents comply with legal requirements in both home and sending country. d) Requires contract enforcement notification are issued to the next-tier supplier if a contract violation, including a violating of the RBA code provisions become known. It confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) Is authorized to implement: b.a) programs. b.b) process actions. b.c) corrective actions as needed. * Record review: Winbond Vendor Survey Procedure (Doc. No.: 3560-0900, Rev. 19, issued date: 21 August 2023) a) Is adequate. b) Is effective. c) Requires contracts for all next-tier suppliers. c.a) With the enforcement of the implementation of the RBA Code provisions. c.b) Labor agents and recruitment agents comply with legal requirements in both home and sending country. d) Requires contract enforcement notification are issued to the next-tier supplier if a contract violation, including a violating of the RBA code provisions become known. * Record review: 10 out of 10 corporate proofs of implementation covering the period October 2023 to September 2024 demonstrate a) Contracts for all next tier suppliers shows enforcement of the implementation of the RBA Code provisions. b) Labor agents and recruitment agents contracts show compliance requirements with legal requirements in both home and sending country. c) Contract enforcement notification to the next tier supplier for a contract violation including a violating of the RBA code provision. * Record review: No labor agents and contractors are used in the facility. * Record review: 10 out of 10 communications to supplier management covering the period October 2023 to September 2024 demonstrate: a) Are in place for all next-tier suppliers. b) Enforcement of the implementation of the RBA Code provisions. c) Contract enforcement notification are issued to the next tier supplier if a contract violation including a violating of the RBA code provisions become known. * Record review: 10 out of 10 contract enforcement notifications covering the period October 2023 to September 2024 a) are issued to the next tier supplier if a contract violation including a violation of the RBA code provisions becomes known. * Management interview: Ms. Pi-Ling LI / Senior Engineer of TQC Department and Ms. Grace LO / Technology Manager of TQC Department confirm the audit observations. * Worker interview: 2 out of 2 procurement staff confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-E4.2
Question Text	Next tier major suppliers have been identified.
Rating	Conformance
Conclusion	Next tier major suppliers have been identified.
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Includes supplier identification process. d) Defines Major supplier. e) Identifies next tier major suppliers. f) Defines all on-site service providers are major next tier suppliers. g) Defines all labor agents and recruitment agents are major next tier suppliers. It confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) Is authorized to implement: b.a) Programs. b.b) Process actions. b.c) Corrective actions as needed. * Record review: Winbond Vendor Survey Procedure (Doc. No.: 3560-0900, Rev. 19, issued date: 21 August 2023) a) Is adequate. b) Is effective. c) Includes supplier identification process. d) Defines Major supplier. e) Identifies next tier major suppliers. f) Defines all on-site service providers are major next tier suppliers. g) Defines all labor agents and recruitment agents are major next tier suppliers. h) States the communication process with its next tier major suppliers on the RBA code, its requirements and additional contract requirements. * Record review: 10 out of 10 corporate proofs of implementation covering the period October 2023 to September 2024 a) List of next-tier major suppliers. b) Definition of major supplier. c) Communication materials to major next-tier suppliers on the RBA code, its requirements and additional contract requirements. * Record review: Major next tier supplier list (Doc. No: Nil, Rev. Nil, Issue date: 03 January 2024) a) Includes all next tier major suppliers. b) Is current. c) Is accurate. d) Includes all on-site service providers are major next-tier suppliers. * Record review: 10 out of 10 communications to supplier management covering the period October 2023 to September 2024 demonstrate: a) Are in place for all next-tier suppliers. b) Enforcement of the implementation of the RBA Code provisions. c) Contract enforcement notification are issued to the next tier supplier if a contract violation including a violating of the RBA code provisions become known. * Record review: 10 out of 10 contract enforcement notifications covering the period October 2023 to September 2024 a) are issued to the next tier supplier if a contract violation including a violation of the RBA code provisions becomes known. * Management interview: Ms. Pi-Ling LI / Senior Engineer of TQC Department and Ms. Grace LO / Technology Manager of TQC Department confirm the audit observations. * Worker interview: 2 out of 2 procurement staff and HR staff confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-E4.3
Question Text	An adequate and effective process is established to ensure that the next-tier major suppliers implement the RBA Code.
Rating	Conformance
Conclusion	An adequate and effective process is established to ensure that the next-tier major suppliers implement the RBA Code.

Validated Audit Report

Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Defines the RBA code implementation verification process for all next tier major suppliers. d) Includes a self-reported risk assessment that is validated to verify risk information. e) an audit. f) Includes on-site service providers with assigned workers to the site. g) If there is any allegation or indication of nonconformance with an excluded next tier supplier then an audit is performed. It confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) Is authorized to implement: b.a) programs. b.b) process actions. b.c) corrective actions as needed. * Record review: 10 out of 10 corporate proofs of implementation covering the period October 2023 to September 2024 demonstrate a) Audits of next tier major supplier. b) Audits of on-site service provider. * Management interview: Ms. Pi-Ling LI / Senior Engineer of TQC Department and Ms. Grace LO / Technology Manager of TQC Department confirm the audit observations. * Worker interview: 9 out of 9 workers of on-site service providers confirm the audit observations. * Supporting evidence reference(s): N/A
Question #	VAP-E4.4
Question Text	An adequate and effective process is established to ensure suppliers' RBA Code implementation performance and continuous improvement.
Rating	Conformance
Conclusion	An adequate and effective process is established to ensure suppliers' RBA Code implementation performance and continuous improvement.
Data points	* Record review: RBA Code of Conduct Management Procedure (Document No.: B0000-4200, Rev. L, issued date: 28 June 2024) a) Is adequate. b) Is effective. c) Obliges the CAP process with the Supplier If non-conformances are detected. d) States a commitment to not immediately de-source at a priority non-conformance discovery state but only at the non-implementation of the CAP process. e) Increases Supplier RBA code implementation performance by closing all Priority and Major findings. f) Includes a verification mechanism that corrective actions are implemented. It confirms a senior representative is assigned responsibility: a) To ensure compliance with laws and regulations. b) Is authorized to implement: b.a) programs. b.b) process actions. b.c) corrective actions as needed. * Record review: 10 out of 10 corporate proofs of implementation covering the period October 2023 to September 2024 demonstrate a) CAPs for next tier major supplier. b) CAPs for on-site service providers. c) Do not resource when a priority finding is confirmed. * Management interview: Ms. Pi-Ling LI / Senior Engineer of TQC Department and Ms. Grace LO / Technology Manager of TQC Department confirm the audit observations. * Supporting evidence reference(s): N/A

Question #	VAP-Info19.7
Question Text	Process and summary: Executive summary
Rating	The validated initial audit of Winbond Fab 6 evaluates the facility's Labor, Ethics, Occupational Health and Safety and Environmental practices, and supply chain management systems against the RBA Audit criteria as contained in the RBA Audit Protocol 8.0 and applicable laws and regulations. The validated initial audit takes place on 7-8 October 2024. Two RBA auditors spend a total of 4 person days for onsite audit. It is a full scope audit of all manufacturing buildings and common areas. No integrity issue is encountered during the audit. The audit findings are based on objective evidence gathered through management, staff and worker interviews, pertinent documents and workplace observations. No non-conformance is found during the audit.
Conclusion	
Data points

Jonathan LIU / Deputy Director, Jui-Man CHIEN / Department Manager, MH TSAI / Section Manager, Chao-Chih WANG / Manager, Grace LO / TQC Department Senior Technology Manager, Ching-Wen PAN / HR Department Senior Professional Manager Amanda LIAO / HR Department Senior Administrator and other staff participate in the closing meeting. All the findings are explained and discussed among them. They are receptive to the findings and stated that they will take corrective actions.
VAP-Info19.5	Process and summary: Exception management	N/A
VAP-Info19.6	Process and summary: Legal Nonconformance Risks	No legal non-conformance risks are identified.
VAP-Info19.7	Process and summary: Executive summary	The validated initial audit of Winbond Fab 6 evaluates the facility's Labor, Ethics, Occupational Health and Safety and Environmental practices, and supply chain management systems against the RBA Audit criteria as contained in the RBA Audit Protocol 8.0 and applicable laws and regulations. The validated initial audit takes place on 7-8 October 2024. Two RBA auditors spend a total of 4 person days for onsite audit. It is a full scope audit of all manufacturing buildings and common areas. No integrity issue is encountered during the audit. The audit findings are based on objective evidence gathered through management, staff and worker interviews, pertinent documents and workplace observations. No non-conformance is found during the audit.
